Small Satellites for Earth Observation Rainer Sandau, Hans-Peter Roeser, Arnaldo Valenzuela, 2008-04-18 The 6th IAA Symposium on Small Satellites for Earth Observation initiated by the International Academy of Astronautics IAA was again hosted by DLR the German Aerospace Center The participation of scientists engineers and managers from 24 countries reflected the high interest in the use of small satellites for dedicated missions applied to Earth observation As in the previous symposia the contributions showed that dedicated Earth observation missions cover a wide range of very different tasks These missions provide increased opportunities for access to space and can be conducted relatively quickly and inexpensively The spacecraft bus the instruments and the ground systems can be based either on optimized off the shelf systems with little or no requirements for new technology or on new high technology designs Thus a new class of advanced small satellite missions including autonomously operating intelligent satellites and satellite constellations can be created opening new fields of application for science and the public The symposium provided 11 sessions for oral presentations and one poster session Furthermore in our 6th Symposium the Student Prize Paper Competition has been continued The student papers have been evaluated by distinguished judges selected from academia industry and government coming from four continents The finalists presented their papers in the Student Conference session
