Educational Research for Social Justice Alistair Ross,2021-06-22 This book presents a series of analyses of educational policies largely in the UK but some also in Europe researched by a team of social scientists who share a commitment to social justice and equity in education We explore what social justice means in educational policy and practice and how it impacts on our understanding of both educational science and the public good Using a social constructivist approach the book argues that social justice requires a particular and critical analysis of the meaning of meritocracy and of the way this term turns educational policies towards treating learning as a competition in which many young people are constructed as losers We discuss how many terms in education are essentialised and have specific and different meanings for particular social groups and how this may create issues in both quantitative survey methods and in determining what is the public good We discuss social justice across a range of intersecting social characteristics including social class ethnicity and gender as they are applied across the educational policy spectrum from early years to postgraduate education We examine the ways that young people construct their identities and the implications of this for understanding the public good in educational practice We consider the responsibilities of educational researchers to acknowledge these issues and offer examples of researching with such a commitment We conclude by considering how educational policy might contribute to a socially just equitable and inclusive public good

Diversity and Excellence in Higher Education Rosalind M. O. Pritchard,Matthias Klumpp,Ulrich Teichler,2015-11-03 Diversity and excellence in Higher Education seem to be conflicting concepts Nevertheless they are dynamic and closely intertwined indeed they may even require each other The book brings together insights from ten different countries to analyse these multi faceted phenomena and discuss how they may be reconciled within higher education To set the overall context it critically addresses markets and managerialism whilst foregrounding the dangers of certain behavior that European countries are currently though often unwisely copying from the U S In a mass Higher Education system the social basis of the student body diversifies a fact that creates new challenges for planners and managers The authors study of diversity concentrates particularly upon issues of equity and justice for students addressing their life cycle transitions from school to higher education degree completion postgraduate education and employability It

also considers challenges posed by diversification at the institutional level encompassing changes in management leadership governance and performance assessment It addresses attempts to achieve excellence by selectivity thereby contributing to the stratification of university systems and it explores attempts to achieve excellence by merging smaller institutions to form larger entities The book s overall conclusion is that diversity and excellence are not necessarily enemies but relatives who cannot escape the bond between them

Genders, Sexualities, and Complexities in Africa Gabi Mkhize,Stanley Osezua Ehiane,Lupenga Mphande,2025-02-20 This book s significance is in its African centred border crossing overt and covert forces working against genders and sexualities reinforcing endemic gender and sexual based complexities Pragmatically sexualities and genders in Africa remain contested and an area of power and control contestations in both the private and public spheres Gender based violence and femicide GBVF in particular continue to escalate particularly during the COVID 19 pandemic Such GBVF at most affects young women migrants LGBTIQIA people sex workers informal street traders and widows amongst others This is happening at a time when the feminist and women s movements in Africa are experiencing fragmentations and factions that pull and push organising to the margins of prejudice internally thereby exacerbating an act of subordinated inclusion In this context the term subordinated inclusion connotes another form of complexity where the subaltern has been brought inside a room as an act of inclusion yet systemically subordinated through structure and obedience thereby compromising agency This complexity occurs in private and public domains where a continuum of contestations between structure and agency is sustained Consequently power struggles emerge and proliferate unabated into gendered and sexualised complexities including relations of state coloniality apartheid prejudice marginalization capitalism

and democracy This book thus strives to surface these contestations and complexities and how they continue to thrive in an era that seeks another way possible a way out a jump off a manner of dealing and an exit from the status quo **Financial Aid for First Degree Study at Commonwealth Universities** Association of Commonwealth Universities,1977 **Divided** JoAnn Jaffe,Patricia W.
