The welfare of laying hens directive - implications for the egg industry Great Britain: Parliament: House of Commons: Environment, Food and Rural Affairs Committee, 2011-09-02 The Environment Food and Rural Affairs Committee warn of a potential commercial disaster over animal welfare regulations that could result in unfair competition for UK egg producers New rules are designed to improve conditions for caged battery hens The Welfare of Laying Hens Directive Council Directive 1999/74/EC which applies to businesses with over 350 laying hens provides that conventional cage systems must not be used after 1 January 2012 After this date caged hens must be kept in enriched cages which have more living space per hen 750 cm² cage area per hen compared to 550 cm² in conventional cages less than an A4 sheet of paper a nest perching space litter to allow pecking and scratching and unrestricted access to a feed trough But around one third of Europe's egg production will not comply with the new welfare standards by 2012 UK egg producers have spent around 400 million to improve conditions for laying hens and will be left at a competitive disadvantage if cheaper illegal and non compliant shell eggs and egg products can be imported to the UK from other European countries The UK Government must press for an intra community trade ban on the export of non compliant eggs and egg products and the EU Commission should initiate infringement proceedings against Member States where caged egg producers remain non compliant Failure to enforce this new Directive

effectively will set a worrying precedent for other legislation intended to improve the welfare of farm animals
