Architecture With Illustrations Notes and an Examination of Grecian Architecture Since the time of Sir William Chambers very

great changes have come over both architectural theory and practice For a while ultra greek or what was passed off for and

accepted as such was in the ascendant until its insufficiency to do more than give us the merest Oopyism and the most

wearisome repetition of the same forms and features led to another vicissitude in a quite contrary direction Gothic for which

the way had been prepared by antiquarian researches studies and publications was welcomed as a change and a further one

has since taken place an endeavour being now made to bring that style into Vogue and establish it as the most suitable one

for secular as well as ecclesiastical buildings and moreover to introduce into it much of quite foreign character The result of

such attempt remains to be seen yet even if successful it can be so only partially for hardly ever can our anglo italian be discarded from practice in our secular architecture Hardly can the study Of it be dispensed with were it regarded only as a matter of curiosity About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
