## **Americas War Machine Vested Interests Endless Conflicts:**

**America's War Machine** James McCartney, Molly Sinclair McCartney, 2015-10-27 A veteran Washington reporter reveals how years of military slanted domestic and foreign policy have turned the U S into a perpetual war machine When President Dwight D Eisenhower prepared to leave the White House in 1961 he did so with an ominous message for the American people about the disastrous rise of the military industrial complex Fifty years later the complex has morphed into a virtually unstoppable war machine one that dictates U S economic and foreign policy in a direct and substantial way Based on his experiences as an award winning Washington based reporter covering national security James McCartney presents a compelling history from the Cold War to present day that shows that the problem is far worse and far more wide reaching than anything Eisenhower could have imagined Big Military has become too big to fail and has grown to envelope the nation s political cultural and intellectual institutions These centers of power and influence including the now complicit White House and Congress have a vested interest in preparing and waging unnecessary wars The authors persuasively argue that not one foreign intervention in the past 50 years has made us or the world safer With additions by Molly Sinclair McCartney a fellow journalist with 30 years of experience America s War Machine provides the context for today s national security state and explains what can be done about it

Domestic Causes of American Wars Ivan Eland, 2025-08-01 Domestic Causes of American Wars offers a unique and critical take on the causes of major American wars throughout its history Unlike most histories that designate foreign threats as casus belli this work examines their important underlying economic triggers reaching the striking conclusion that many were unnecessary for national security nor were they as heroic in upholding American values as commonly concluded Further conventional histories often dwell on the positive outcomes of those wars rather than on their much more important domestic ill effects the erosion of the American founders constitution and of the civil liberties and constitutional checks and balances therein while enabling the rise of an imperial presidency This historical volume addresses those often buried domestic causes and effects in particular how the American elections cycle often affects U S entry into wars and how economic motives incentivize war America s early wars the 1812 war against Canada the Mexican war the wars against Native Americans all concerned territorial aggrandizement and acquisition of the rich resources therein The industrial north fought the Civil War to prevent the expansion of the South s cheaper mode of production based on slavery into the expansive territories acquired during the Mexican War The Spanish American war marked the U S lift off beyond its new domestic borders in pursuit of domination and exploitation in Latin America and the acquisition of new territories overseas The United States entered World War I to save its trade and loans with Britain and France During World War II a unique permanent U S military industrial complex arose that lobbied for continued weapons production during peacetime to sustain its fragile local economies Thus by exaggerating the Soviet threat pressures arose for military interventions in Korea and then Vietnam during the Cold War The threat of terrorism similarly served to keep the

war economy afloat during the post Cold War era by an overly expansive war on terrorism The prospect of accessing Iraq's oil incentivized the war in that country The need for ongoing wars to feed the voracious appetite of the military industrial complex through billions of dollars of arms sales has been an ever present factor in the wars in Afghanistan and Ukraine

In Search of Monsters to Destroy Christopher J. Coyne, 2022-12-08 Imperialism and militarism build empires not liberalism So says Christopher Coyne Senior Fellow at the Independent Institute and professor of economics at George Mason University in this eye opening must read book on America's recent foreign policy failures The attempt by the United States since 9/11 to establish liberal political regimes in the Middle East and in the mountains of Afghanistan was doomed to fail And the logic is simple illiberal means can lead only to illiberal ends What else are the hundreds of thousands of dead and mutilated civilians the US military left behind from 2003 to 2021 in these regions The destroyed ancient cultures and nearly obliterated nation states Coyne also points out that the illiberal perpetrators also can end up not only nearly bankrupt and humiliated but also profoundly less secure If we do not absorb these hard truths says Coyne the rest of the twenty first century will be a repeat of its bloodstained unstable beginning But Coyne is no isolationist A vocal champion of global engagement Coyne insists there are workable proven alternatives to imperialism militarism and empire ones deeply rooted in human experience that preserve freedom promote security and foster mutually enriching friendship among the nations of the earth Read In Search of Monsters to Destroy and you'll never look at the nation state or international relations the same again

Human Costs of War Bulent Gokay, Lily Hamourtziadou, 2024-09-12 Human Costs of War documents and analyses the direct and indirect toll that war takes on civilians and their livelihoods taking a human security approach exploring personal economic political and community security in Afghanistan Iraq and Ukraine in the contexts of the War on Terror and the New Cold War The book offers an understanding of war through the recording and comprehension of its civilian casualties and evaluates whether the force used has been proportionate to the threat that prompted it and the concern for human welfare In the 21st century the power of the USA has declined while countries such as China and India become more powerful The global power balance has been altered in a fundamental way towards a multi polar world system with the West no longer able to enforce its policies abroad Regional and global governance are not assured and devastating wars have taken a heavy toll in terms of death poverty and displacement which feed into the cycle of long term insecurity The authors argue that it is important for any conflict to be understood not only in terms of the perpetrators of violence or of the political and economic reasons behind it but also in terms of its impact on the civilian population and their security focusing on conflicts in the Middle East which followed 9/11 and Russia's invasion of Ukraine The book will be of interest to academics the public the media security agencies and international organisations It will be useful for undergraduate and postgraduate students of International Relations International Law Security Politics Policing Human Rights Ethics Peace Studies Eastern Europe American Studies and the Middle East

Legacies of the Degraded Image in Violent Digital Media Stuart Marshall Bender, 2017-08-16 This book undertakes a concentrated study of the impact of degraded and low quality imagery in contemporary cinema and real world portrayals of violence Through a series of case studies the book explores examples of corrupted digital imagery that range from mainstream cinema portrayals of drone warfare and infantry killing through to real world recordings of terrorist attacks and executions as well as perpetrator created murder videos live streamed on the internet Despite post modernist concerns of cultural inurement during the seminal period of digitalized and virtualized killing in the 1990s real world reactions to violent media indicate that our culture is anything but desensitized to these media depictions Against such a background this book is a concentrated study of how these images are created and circulated in the contemporary media landscape and how the effect and affect of violent material is impacted by the low resolution aesthetic

**Big Wars** John Storey, 2021-09-01 World War II was the biggest and most destructive war in history For two centuries wars had grown ever larger with the use of more terrible weapons and rising casualties culminating in the cataclysmic global events of 1939-45 And then quite suddenly large international wars have all but disappeared What caused wars to grow in size to such an extent and then shrink so precipitously Is this a permanent state of affairs or could big wars make a comeback Lawyer and historian John P Storey explores these questions by looking at the evolution of military technology and tactics over the long history of warfare From ancient bronze spears and chariots to World War II tanks and warplanes from the nuclear weapons of the Cold War to the drones and robotics of the future the changes in our methods of waging war has had and will continue to have a major impact on their size and destructiveness The sobering conclusion Storey makes is that based on past trends and the weapons in the pipeline for the future there is a much higher risk of there being much bigger wars in the coming decades

**Public Choice Theory and the Illusion of Grand Strategy** Richard Hanania, 2021-12-28 This book argues that while the US president makes foreign policy decisions based largely on political pressures it is concentrated interests that shape the incentive structures in which he and other top officials operate The author identifies three groups most likely to be influential government contractors the national security bureaucracy and foreign governments This book shows that the public choice perspective is superior to a theory of grand strategy in explaining the most important aspects of American foreign policy including the war on terror policy toward China and the distribution of US forces abroad Arguing that American leaders are selected to respond to public opinion not necessarily according to their ability to formulate and execute long term plans the author shows how mass attitudes are easily malleable in the domain of foreign affairs due to ignorance with regard to the topic the secrecy that surrounds national security issues the inherent complexity of the issues involved and most importantly clear cases of concentrated interests The book will be of interest to students and scholars of American Studies Foreign Policy Analysis and Global Governance

*Manufacturing Militarism* Christopher J. Coyne, Abigail R. Hall, 2021-08-03 The U S government's prime enemy in the War on Terror is not a shadowy mastermind dispatching suicide bombers It is the informed American citizen With *Manufacturing Militarism* Christopher J Coyne and Abigail R Hall detail how military propaganda has targeted Americans since 9 11 From the darkened cinema to the football field to the airport screening line the U S government has purposefully inflated the actual threat of terrorism and the necessity of a proactive military response This biased incomplete and misleading information contributes to a broader culture of fear and militarism that far from keeping Americans safe ultimately threatens the foundations of a free society Applying a political economic approach to the incentives created by a democratic system with a massive national security state Coyne and Hall delve into case studies from the War on Terror to show how propaganda operates in a democracy As they vigilantly watch their carry ons scanned at the airport despite nonexistent threats or absorb glowing representations of the military from films Americans are subject to propaganda that Coyne and Hall argue erodes government by citizen consent

**The Lost Peace** Richard Sakwa, 2023-01-01 The end of the Cold War was an opportunity our inability to seize it has led to today's renewed era of great power competition An eloquent and persuasive argument about how the world squandered the promise of the end of the Cold War Maria Lipman Foreign Affairs The year 1989 heralded a unique prospect for an enduring global peace as harsh ideological divisions and conflicts began to be resolved Now three decades on that peace has been lost With war in Ukraine and increasing tensions between China Russia and the West great power politics once again dominates the world stage But could it have been different Richard Sakwa shows how the years before the first mass invasion of Ukraine represented a hiatus in conflict rather than a lasting accord and how since then we have been in a Second Cold War Tracing the mistakes on both sides that led to the current crisis Sakwa considers the resurgence of China and Russia and the disruptions and ambitions of the liberal order that opened up catastrophic new lines of conflict This is a vital strongly argued account of how the world lost its chance at peace and instead saw the return of war in Europe global rivalries and nuclear brinksmanship
