Atos Maintenance Manual:

Air Transportation Operations Inspector's Handbook United States. Federal Aviation Administration, 1988 **The Federal Aviation Administration's Oversight of Outsourced Air Carrier Maintenance** United States. Congress. House. Committee on Transportation and Infrastructure. Subcommittee on Aviation, 2007 *Air Carriers' Outsourcing of Aircraft Maintenance* David A. Dobbs, 2009-03 This is a review of the FAA's oversight of air carriers' outsourced aircraft maintenance. As of July 14, 2008, there were 4,159 domestic and 709 foreign repair stations certificated by FAA to perform maintenance on U.S. aircraft. When an air carrier uses an FAA-certificated repair station to repair its aircraft or parts, the repair station's organization becomes an extension of the air carrier's maintenance organization. This report 1 identifies the type and quantity of maintenance performed by external repair stations and 2 determines whether FAA is effectively monitoring air carriers' oversight of external repair stations' work and verifying that safety requirements are met. Illustrations Aviation Unit and Intermediate Maintenance Manual, 1990 FAA Needs to Improve Risk Assessment Processes for Its Air Transportation Oversight System, **Technical Manual** Naval Air Systems Command, 2018-10-19 Technical Order TO 1 1A 1 is one of a series of manuals prepared to assist personnel engaged in the general maintenance and repair of military aircraft. This manual covers general aircraft structural repair. This is a Joint Service manual and some information may be directed at one branch of the service and not the other. Wherever the text of the manual refers to Air Force technical orders for supportive information, refer to the comparable Navy documents. See Table 1. The satisfactory performance of aircraft requires continuous attention to maintenance and repair to maintain aircraft structural integrity. Improper maintenance and repair techniques can pose an immediate and potential danger. The reliability of aircraft depends on the quality of the design as well as the workmanship used in making the repairs. It is important that maintenance and repair operations be made according to the best available techniques to eliminate or at least minimize possible failures **AR 95-1 03/11/2014**

Two FAA Aviation Safety Inspectors have provided evidence raising serious questions of conduct violating the Federal Aviation Regulations (FARs) in the inspection and maintenance program of Southwest Airlines (SWA). FAA employees have engaged in conduct which constitutes a violation of Federal law, rule or regulation, gross mismanagement, an abuse of authority, and a substantial damage to public safety. The Maintenance Inspector for SWA knowingly allowed the airline to operate in March 2007 and possibly beyond, and well after the inspection deadlines on a mandatory FAA Airworthiness Directive. There may be a pattern of regulatory abuse and that these regulatory lapses may be more
