

A person in a blue shirt and jeans stands on a dark, reflective surface, looking towards a futuristic city skyline. The skyline features a large, metallic, dome-shaped structure, a tall building with a cat-like face, and several other skyscrapers. The scene is set against a blue sky with white clouds. A Short History Of The Future:

A Short History of the Future W. Warren Wagar, 1999-08 Narrated by a far future historian Peter Jensen leaves an account of the world from the 1990s to the opening of the 23rd century as a gift to his granddaughter A combination of fiction and scholarship this third edition of Wagar's speculative history of the future alternates between descriptions of world events and intimate glimpses of this historian's family into the first centuries of the new millennium

A Short History of the Future Colin Mason, 2012-06-25 Has the future a future Are we bringing history to an end Observing any one of several individual but critical trends suggests that without rapid and positive action history may have only a very short way to run Whether it is the growth of world population of greenhouse gas concentrations and the accelerating rate of climate change the running down of oil and natural gas reserves growing shortages of fresh water for agriculture industry and domestic use or the increasing difficulty in controlling epidemic diseases we are facing a mounting global crisis that will peak in less than a generation around the year 2030 Taken together these trends point to a potentially apocalyptic period if not for the planet itself then certainly for human societies and for humankind In this compelling book and update to *The 2030 Spike* Colin Mason explains in clear and irrefutable terms what is going on largely below the surface of our daily or weekly news bulletins The picture he paints is stark and yet it is not bleak Being forewarned we are forearmed and he draws on his own extensive political experience to describe how much we can do as individuals and above all collectively not merely to avert crisis but to engineer thoroughgoing change that can usher in genuinely sustainable and valuable alternatives to the way we live now
