Above the Atlantic Ocean the crew noticed a dangerous fuel imbalance. The crew changed the planned route for a landing at the Lajes Airport in the Azores. At 06 13 the right engine flamed out. At 06 26 the left engine also flamed out. However after flying 100 miles without fuel the crew managed to land the aircraft at the Lajes Airport at 06 45. After the landing small fires started in the main gear wheels they were extinguished by the crash rescue response vehicles. Only 16 passengers and 2 cabin crew members received injuries. The aircraft suffered damage to the fuselage and to the main landing gear. The investigation uncovered a large crack in the fuel line of the right engine it was caused by mistakes during an engine change just before the start of the flight.
