California. Legislature. Senate. Interim Committee on Subdivision Development and Planning, 1959 **Final Report to Congress** United States. Army. Corps of Engineers, 1981 **Energy-Efficient Timber-Glass Houses** Vesna Žegarac

Leskovar, Miroslav Premrov, 2013-09-30 The book discusses combining timber and glass two eco materials with a view to developing an optimal contemporary energy efficient house with an attractive design Furthermore the book connects an architectural design approach with structural research to show the possibilities of stabilizing the building with an increased size of the glazing Research results where the glazing is considered as a load bearing structural element are therefore presented in a manner leading to the development of an optimal model of the timber glass house considering both the structural and energy related aspects The presented research work can be useful to designers and future experts in their planning of optimal energy efficient timber buildings The study is based on using timber and glass which were previously neglected as construction materials With suitable technological development and appropriate use they are nowadays becoming essential construction materials as far as energy efficiency is concerned However their combined use is extremely complicated from both the constructional point of view as well as from that of energy efficiency and sets multiple traps for designers A good knowledge of their advantages and drawbacks is thus vitally important which is shown in the present monograph Energy efficient timber glass houses was selected by the Slovenian National Research Agency as an extraordinary scientific achievement in the field of technical sciences civil engineering for the year 2013 **Navy Broadway**
