*Social Inquiry After Wittgenstein and Kuhn* John G. Gunnell, 2014-11-04 A distinctive feature of Ludwig Wittgenstein's work after 1930 was his turn to a conception

of philosophy as a form of social inquiry John G Gunnell argues and Thomas Kuhn's approach to the philosophy of science exemplified this conception In this book Gunnell shows how these philosophers address foundational issues in the social and human sciences particularly the vision of social inquiry as an interpretive endeavor and the distinctive cognitive and practical relationship between social inquiry and its subject matter Gunnell speaks directly to philosophers and practitioners of the social and human sciences He tackles the demarcation between natural and social science the nature of social phenomena the concept and method of interpretation the relationship between language and thought the problem of knowledge of other minds and the character of descriptive and normative judgments about practices that are the object of inquiry Though Wittgenstein and Kuhn are often criticized as initiating a modern descent into relativism this book shows that the true effect of their work was to undermine the basic assumptions of contemporary social and human science practice It also problematized the authority of philosophy and other forms of social inquiry to specify the criteria for judging such matters as truth and justice When Wittgenstein stated that philosophy leaves everything as it is he did not mean that philosophy would be left as it was or that philosophy would have no impact on what it studied but rather that the activity of inquiry did not simply by virtue of its performance transform the object of inquiry

[The Unreality of Memory](#) Elisa Gabbert, 2020-08-20 A work of sheer brilliance beauty and bravery Andrew Sean Greer author of *Less* Masterly Her essays have a clarity and prescience that imply a sort of distant retrospective view like postcards sent from the near future New York Times We stare at our phones We keep multiple tabs open Our chats and conversations are full of the phrase Did you see The feeling that we're living in the worst of times seems to be intensifying alongside a desire to know precisely how bad things have gotten Poet and essayist Elisa Gabbert's *The Unreality of Memory* consists of a series of lyrical and deeply researched meditations on what our culture of catastrophe has done to public discourse and our own inner lives In these tender and prophetic essays she focuses in on our daily preoccupation and favorite pastime desperate distraction from disaster by way of a desperate obsession with the disastrous Moving from public trauma to personal tragedy from the Titanic and Chernobyl to illness and loss *The Unreality of Memory* alternately rips away the facade of our fascination with destruction and gently identifies itself with the age of rubbernecking A balm not a burr Gabbert's essays are a hauntingly perceptive analysis of the anxiety intrinsic in our new digital ways of being and also a means of reconciling ourselves to this new world One of those joyful books that send you to your notebook every page or so desperate not to lose either the thought the author has deftly placed in your mind or the title of a work she has now compelled you to read Paris Review

**The Affect Lab** Grant Bollmer, 2023-09-29 Examines how our understanding of emotion is shaped by the devices we use to measure it Since the late nineteenth century psychologists have used technological forms of media to measure and analyze emotion In *The Affect Lab* Grant Bollmer examines the use of measurement tools such as electrical shocks photography video and the electroencephalograph to argue that research on emotions has confused the physiology of emotion with the tools that define its inscription Bollmer shows

that the psychological definitions of emotion have long been directly shaped by the physical qualities of the devices used in laboratory research To investigate these devices The Affect Lab examines four technologies related to the history of psychology in North America spiritualist toys at Harvard University serial photography in early American psychological laboratories experiments on psychopaths performed with an instrument called an Offner Dynograph and the development of the electropsychometer or E Meter by Volney Mathison and L Ron Hubbard Challenging the large body of humanities research surrounding affect theory The Affect Lab identifies an understudied problem in formulations of affect how affect is a construction inseparable from the techniques and devices used to identify and measure it Ultimately Bollmer offers a new critique of affect and affect theory demonstrating how deferrals to psychology and neuroscience in contemporary theory and philosophy neglect the material of experimental scientific research Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions     **The North Carolina Historical Review** ,2013
