**Generative Systems and Intelligent Tutoring Systems** Sabine Graf, Angelos Markos, 2025-07-28 This book constitutes the refereed proceedings of the 21st International Conference on Intelligent Tutoring Systems ITS 2025 held in Alexandroupolis Greece during June 2-6 2025. The 21 full papers, 27 short papers and 5 posters included in this book were carefully reviewed and selected from 67 submissions. The papers are organized in the following topical conference tracks: Part I: Generative Tutoring Systems. The goal of this part is to show how new techniques inspired by artificial intelligence (AI) and new methods in education can improve learning, teaching and generate the capacity for knowledge acquisition and much more. Part II: Application areas, environments and techniques for AI systems. This part shows the progress of research investigating the different application areas such as education, health, techniques such as neural networks, data mining, natural language processing and environments such as games, virtual reality, cognitive robots for effective AI systems.

**Aircraft Systems Classifications** Allan Seabridge, Mohammad Radaei, 2022-04-25 *Aircraft Systems Classifications* Enables aerospace professionals to quickly and accurately reference key information about all types of aircraft systems. *Aircraft Systems Classifications: A Handbook of Characteristics and Design Guidelines* provides comprehensive information on aircraft systems delivered in a concise, direct and standardized way, allowing readers to easily find the information they need. The book presents a full set of characteristics and requirements for all types of aircraft systems, including avionics, mission and supporting ground systems, in a single volume. Readers can delve further into specific topics by referencing the detailed glossary and bibliography. To aid in reader comprehension, each aircraft system is broken down according to various criteria such as Purpose, description and safety, Integration with other systems, Key interfaces and design drivers, Modeling and simulation, Best practices and future trends. Written for aerospace professionals, researchers and advanced students with some existing knowledge of the aircraft industry, this book allows readers to quickly reference information on every aspect of aircraft systems.

*Aviation and Its Management* Arif Sikander, 2019-05-22 Aviation has grown leaps and bounds within the last decade. Aviation courses and training at all levels have shown an exponential increase around the globe. There has been a restricted focus on writing books in this sector of the economy, mainly due to the shortage of expertise in this specialist and complex area. This book was written with the purpose of meeting this need of the aviation sector. Due to the diversified nature of aviation knowledge, which includes flying, engineering, airports, allied trades for aircraft and airports, airline and airport management and operations, education, etc., one text alone will not suffice and do justice to address all these areas. It is envisaged to develop subsequent parts of this book to cover all these knowledge areas. This book is the first installment of any subsequent books and explores issues including airline management and operations, airline business models, airport systems, flight operational procedures, aircraft maintenance, runway safety management systems and air traffic management. In

particular attention will be given to aspects such as analysis of air traffic in a domestic market runway safety management systems critical success factors for multiple MRO service providers key pain points of the industry to be addressed to move into the future new research on hub airports for international flights new business models for airlines and runway safety management systems This book is useful to aviation managers educators students and professionals interested in any of the above issues

**Novel and Intelligent Digital Systems: Proceedings of the 4th International Conference (NiDS 2024)** Phivos Mylonas, Dimitris Kardaras, Jaime Caro, 2024-10-15 This book compiles the research findings presented at the 4th International Conference on Novel Intelligent Digital Systems NiDS 2024 which took place in Athens Greece on September 25 27 2024 hosted by the University of West Attica NiDS 2024 was conducted in a hybrid format offering participants the flexibility to join either online or in person The conference highlighted the latest innovations in intelligent systems and emphasized the collaborative research that advances Artificial Intelligence AI in software development It served as a platform for high quality research providing a space to explore challenges and innovations in AI NiDS 2024 referred to experts researchers and scholars in artificial and computational intelligence as well as the broader field of computer science offering insights into interconnected and complementary areas By promoting the exchange of ideas the conference aimed to strengthen and expand the network of researchers academics and industry professionals

**Federal Aviation Regulations/Aeronautical Information Manual 2013** Federal Aviation Administration, 2012-11-01 As every intelligent aviator knows the skies have no room for mistakes Don't be caught with an out of date edition of the FAR AIM In the current environment there is no excuse for ignorance of the rules of the U S airspace system In this newest edition of the FAR AIM all regulations procedures and illustrations are brought up to date to reflect current FAA data This handy reference book is an indispensable resource for members of the aviation community as well as for aspiring pilots looking to get a solid background in the rules requirements and procedures of flight training Not only does this manual present all the current FAA regulations it also includes a study guide for specific pilot training certifications and ratings a pilot controller glossary standard instrument procedures parachute operations airworthiness standards for products and parts the NASA Aviation Safety reporting form important FAA contact information This is the most complete guide to the rules of aviation available anywhere Don't take off without the FAR AIM
