Wayne Ross, 2017-03-01 Like the schools in which it is taught social studies is full of alluring contradictions It harbors possibilities for inquiry and social criticism liberation and emancipation Social studies could be a site that enables young people to analyze and understand social issues in a holistic way finding and tracing relations and interconnections both present and past in an effort to build meaningful understandings of a problem its context and history to envision a future where specific social problems are resolved and take action to bring that vision into existence Social studies could be a place where students learn to speak for themselves in order to achieve or at least strive toward an equal degree of participation and better future Social studies could be like this but it is not Rethinking Social Studies examines why social studies has been and continues to be profoundly conversing in nature the engine room of illusion factories whose primary aim is reproduction of the existing social order where the ruling ideas exist to be memorized regurgitated internalized and lived by Rethinking social studies as a site where students can develop personally meaningful understandings of the world and recognize they have agency to act on the world and make change rests on the premises that social studies should not show life to students but bringing them to life and that the aim of social studies is getting students to speak for themselves to understand people make their own history even if they make it in already existing circumstances These principles are the foundation for a new social studies one that is not driven by standardized curriculum or examinations but by the perceived needs interests desires of students communities of shared interest and ourselves as educators Rethinking Social Studies challenges readers to reconsider conventional thought and practices that sustain the status quo in classrooms schools and society by critically engaging with questions and issues such as neutrality in the classroom how movement conservatism shapes the social studies curriculum how corporate driven education affects schools teachers and curriculum ways in which teachers can creatively

disrupt everyday life in the social studies classroom going beyond language and inclusive content in social justice oriented teaching making critical pedagogy relevant to everyday life and classroom practice the invisibility of class in the social studies curriculum and how to make it a central organizing concept class war class consciousness and social studies in the age of empire what are your ideals as a social studies education and how do you keep them and still teach and what it means to be a critical social studies educator beyond the classroom

Education Gender and Climate for Youth Tudás Alapítvány,2023-11-17 The Earth s climate is heavily changing and failure to limit warming to below 2 C could make further impact in the climate system irreversible and characterised by cataclysmic consequences The adverse impacts of climate emergency continue to be too much of a burden for the poorest and most vulnerable especially girls and women with fewer opportunities Despite growing recognition of these differential vulnerabilities as well as the unique experiences and skills

that women and men bring to environmental sustainability efforts the former still have less economic political and legal influence and are therefore less able to cope than those who are most exposed to the adverse effects of climate emergency On the other hand girls and women are powerful agents of change and continue to make increasingly significant contributions to sustainability despite existing structural changes and socio cultural barriers This guide will serve as an approximation towards the above mentioned issues and is destined for Gender and social inclusion specialists seeking a broader range of tips tactics tools and exercises with which to increase the awareness understanding and capacity of other colleagues to integrate gender and social inclusion into climate action Climate degrowth and sustainability practitioners with some knowledge of and openness to gender and social inclusion issues who can use the modules and the references contained within them to deepen their own knowledge and thus gain confidence to use the materials to train others Youth workers and young leaders who are responsible for designing and teaching climate change resilience adaptation and mitigation interventions The materials in this Guide have very broad applicability in these domains Given the evidence we present on the importance of gender sensitivity and social inclusion in the implementation of effective climate projects and programmes we assert that the approaches suggested are not just for people with a formal mandate on these issues the approaches are for everyone working on climate and social justice

Performance Constellations Marcela A. Fuentes,2019-10-21 Performance Constellations maps transnational protest movements and the dynamics of networked expressive behavior in the streets and online as people struggle to be heard and effect long term social justice Its case studies explore collective political action in Latin America including the Zapatistas in the mid 90s protests during the 2001 Argentine economic crisis the 2011 Chilean student movement the 2014 2015 mobilizations for the disappeared Ayotzinapa students and the 2018 transnational reproductive rights movement The book analyzes uses of space time media communication and corporeality in protests such as virtual sit ins flash mobs scarfazos and hashtag campaigns arguing that these protests not only challenge hegemonic

power but are also socially transformative While other studies have focused either on digital activism or on street protests Performance Constellations shows that they are in fact integrally entwined Zooming in on protest movements and art activism in Mexico Argentina and Chile and putting contemporary insurgent actions in dialogue with their historical precedents the book demonstrates how even in moments of extreme duress social actors in Latin America have taken up public and virtual space to intervene politically and to contest dominant powers *Humour in Political Activism* Majken Jul Sørensen, 2016-08-23 This book analyses how humour in political activism contributes to facilitating outreach mobilisation and the sustaining of cultures of resistance Drawing on examples of attention grabbing stunts from around the world Humour in Political Activism demonstrates how they succeed in turning relations of power upside down The ambiguity and unpredictability of humour Sørensen argues makes it difficult to respond to this form of political activism when it is performed in public Humorous political stunts can therefore challenge state power help influence changes in law and make significant contributions to the conversations about how societies should be organised The book also investigates the potential risks and limitations of using humour in nonviolent action and what makes humour unique compared with other forms of non humorous political activism
