Community Participation in School Management Kazuro Shibuya, 2022-09-12 Nobody denies that trust in schools is key to success in generating any educational outcomes However trust is often eroded resulting in conflicts alienation and differentiation among school level stakeholders This book analyses school based management SBM of education through the lens of relational trust in the context of Ghana revealing how community participation in school management leads to educational outcomes Conducting quantitative analysis of headteacher questionnaires from public basic schools and qualitative analysis of case study schools in the Akatsi South District of Ghana Shibuya offers critical insights into building sustainable relationships between individual households and geographical school communities He argues it is critical to highlight relational trust as an analytical tool to examine relationships between actors and factors in school management The research finds that trust in schools is a two way mechanism and the mutuality of expectations and obligations among stakeholders is essential if children s learning outcomes are to improve With its mixed methods approach this book will be a valuable resource for scholars in comparative education those in educational development and those interested in African contexts

development It is argued that contrary to development as we know it not working a greater part of the problem is that conventional development approaches that work have in fact not truly been followed to the letter and hence the quagmire All this is ironic since everything we do about our world is development So how come there is difficult knowledge when it comes to learning from what we know i.e. what local peoples do and have done for centuries as a starting point to reconstructing and reframing development In getting our heads around this paradox we are tempted to ask more questions How do we as African scholars and researchers begin to develop home grown solutions to our problems How do we pioneer new analytical systems for understanding our communities and offer a pathway to genuine African development i.e. Indigenist African development see also Yankah 2004 How do we speak of Indigenist development mindful of global developments and entanglements around us Can we afford to pursue development still mired in a catch up scenario Are we in a race with the development world and where do we see this race ending or where do we define as the finishing line A Publication of the Centre for School and Community Science and Technology Studies SACOST University of Education Winneba Ghana
