Dictionary of Marine Natural Products John W. Blunt, Murray H. G. Munro, 2007-09-19 The first of its kind this dictionary defines more than 25 000 marine natural products It indexes each by chemical name organism type and compound type Following a similar format to the Chapman Hall Chemical Database each entry includes biological source chemical structure physical properties biological activity and literature references With an accompanying CD this invaluable tool offers immediate access to information essential to the development of novel pharmaceuticals pesticides and marine anti fouling agents derived from unique molecular structures of marine natural products Geometry, Particles, and Fields Bjoern Felsager, 2012-12-06 Geometry Particles and Fields is a direct reprint of the first edition From a review of the first edition The present volume is a welcome edition to the growing number of books that develop geometrical language and use it to describe new developments in particle physics It provides clear treatment that is accessible to graduate students with a knowledge of advanced calculus and of classical physics The second half of the book deals with the principles of differential geometry and its applications with a mathematical machinery of very wide range Here clear line drawings and illustrations supplement the multitude of mathematical definitions This section in its clarity and pedagogy is reminiscent of Gravitation by Charles Misner Kip Thorne and John Wheeler Felsager gives a very clear presentation of the use of geometric methods in particle physics For those who have resisted learning this new language his book provides a very good introduction as well as physical motivation The inclusion of numerous exercises worked out renders the book useful for independent study also I hope this book will be followed by others from authors with equal flair to provide a readable excursion into the next step PHYSICS TODAY Bjoern Felsager is a high school teacher in Copenhagen Educated at the Niels Bohr Institute he has taught at the Universities of Copenhagen and Odense *The Sensual (quadratic) Form* John Horton Conway, 1997-12-31 John Horton Conway s unique approach to quadratic forms was the subject of the Hedrick Lectures that he gave in August of 1991 at the Joint Meetings of the Mathematical Association of America and the American Mathematical Society in Orono Maine This book presents the substance of those lectures The book should not be thought of as a serious textbook on the theory of quadratic forms It consists rather of a number of essays on particular aspects of quadratic forms that have interested the author The lectures are self contained and will be accessible to the generally informed reader who has no particular background in quadratic form theory The minor exceptions should not interrupt the flow of ideas The afterthoughts to the lectures contain discussion of related matters that occasionally presuppose greater knowledge Connections Between Algebra, Combinatorics, and Geometry Susan M. Cooper, Sean Sather-Wagstaff, 2014-05-16 Commutative algebra combinatorics and algebraic geometry are thriving areas of mathematical research with a rich history of interaction Connections Between Algebra and Geometry contains lecture notes along with exercises and solutions from the Workshop on Connections Between Algebra and Geometry held at the University of Regina from May 29 June 1 2012 It also contains

research and survey papers from academics invited to participate in the companion Special Session on Interactions Between Algebraic Geometry and Commutative Algebra which was part of the CMS Summer Meeting at the University of Regina held June 2 3 2012 and the meeting Further Connections Between Algebra and Geometry which was held at the North Dakota State University February 23 2013 This volume highlights three mini courses in the areas of commutative algebra and algebraic geometry differential graded commutative algebra secant varieties and fat points and symbolic powers It will serve as a useful resource for graduate students and researchers who wish to expand their knowledge of commutative algebra algebraic geometry combinatorics and the intricacies of their intersection

Quantum Theory of the Electron Liquid Gabriele Giuliani, Giovanni Vignale, 2005-03-31 Modern electronic devices and novel materials often derive their extraordinary properties from the intriguing complex behavior of large numbers of electrons forming what is known as an electron liquid This book provides an in depth introduction to the physics of the interacting electron liquid in a broad variety of systems including metals semiconductors artificial nano structures atoms and molecules One two and three dimensional systems are treated separately and in parallel Different phases of the electron liquid from the Landau Fermi liquid to the Wigner crystal from the Luttinger liquid to the quantum Hall liquid are extensively discussed Both static and time dependent density functional theory are presented in detail Although the emphasis is on the development of the basic physical ideas and on a critical discussion of the most useful approximations the formal derivation of the results is highly detailed and based on the simplest most direct methods
