## 14 Exemplar Life Science Memorandum:

**The Good Life in the Scientific Revolution** Matthew L. Jones, 2008-09-15 Amid the unrest, dislocation and uncertainty of seventeenth century Europe, readers seeking consolation and assurance turned to philosophical and scientific books that offered ways of conquering fears and training the mind, guidance for living a good life. *The Good Life in the Scientific Revolution* presents a triptych showing how three key early modern scientists, René Descartes, Blaise Pascal, and Gottfried Leibniz, envisioned their new work as useful for cultivating virtue and for pursuing a good life. Their scientific and philosophical innovations stemmed in part from their understanding of mathematics and science as cognitive and spiritual exercises that could create a truer mental and spiritual nobility. In portraying the rich contexts surrounding Descartes' geometry, Pascal's arithmetical triangle, and Leibniz's calculus, Matthew L. Jones argues that this drive for moral therapeutics guided important developments of early modern philosophy and the Scientific Revolution.

**Cultivating Development** David Mosse, 2004-11-20 What if development agencies and researchers are not driven by policy? Suppose that the things that make for good policy—policy that legitimises and mobilises political support in reality—make it impossible to implement. By focusing in detail on the unfolding activities of a development project in western India over more than ten years, as it falls under different policy regimes, this book takes a close look at the relationship between policy and practice in development. David Mosse shows how the actions of development workers are shaped by the exigencies of organisations and the need to maintain relationships rather than by policy, but also that development actors work hardest of all to maintain coherent representations of their actions as instances of authorised policy. Raising unfamiliar questions, Mosse provides a rare self-critical reflection on practice while refusing to endorse current post-modern dismissal of development.

*Age of System* Hunter Heyck, 2015-09 In the years after World War II, a new generation of scholars redefined the central concepts and practices of social science in America. Before the Second World War, social scientists struggled to define and defend their disciplines. After the war, high modern social scientists harnessed new resources in a quest to create a unified understanding of human behavior and to remake the world in the image of their new model man. In *Age of System*, Hunter Heyck explains why social scientists, shaped by encounters with the ongoing organizational revolution and its revolutionary technologies of communication and control, embraced a new and extremely influential perspective on science and nature, one that conceived of all things in terms of system, structure, function, organization, and process. He also explores how this emerging unified theory of human behavior implied a troubling similarity between humans and machines, with freighted implications for individual liberty and self-direction. These social scientists trained a generation of decision makers in schools of business and public administration, wrote the basic textbooks from which millions learned how the economy, society, politics, culture, and even the mind worked, and drafted the position papers, books, and articles that helped set the terms of public discourse in a new era of mass media, think tanks, and issue networks. Drawing on close readings of key texts and a broad survey of more than 1,800

journal articles Heyck follows the dollars and the dreams of a generation of scholars that believed in the system He maps the broad landscape of changes in the social sciences focusing especially intently on the ideas and practices associated with modernization theory rational choice theory and modeling A highly accomplished historian Heyck relays this complicated story with unusual clarity

MacKenzie, Desiree Tommasi, 2019-06-28 Tremendous advances in oceanographic observing and modeling systems over the last decade have led to unprecedented developments in the nature of information available to marine science While improvements in observational technologies and networks have garnered much attention remarkable developments in forecasting the ocean have received much less focus Exploiting this new predictive skill to improve scientific understanding generate advice and aid in the management of marine resources is emerging as one of the new challenges of marine science Translating predictions of the physical environment

into biological outcomes however is not straightforward Fisheries scientists for example have been trying to understand the links between physics and biology and generate predictions of variables such as recruitment for close to a century with limited success Nevertheless spatial distributions and the timing of key events which have received less focus are often tightly linked to the physical environment and may have management relevant applications The first such forecasts based on this skill are now starting to emerge This Frontiers in Marine Science Research Topic provides a snapshot of the state of the art in Marine Ecological Prediction It covers the opportunities for developing such forecasts technical approaches that could be employed and examples where the technology is already being applied This body of work therefore marks an important milestone on the route to developing this new and exciting field of marine science *Arctic Superstars* William Lowell Putnam,2001-02-01 *Arctic Superstars* is a thoroughly researched account of the fascinating lives and harrowing journeys of Adolphus Washington Greely and George Wallace Melville career military officers and Civil War heroes who explored vast reaches of the Arctic during the early 1880s Greely was best known for commanding the ill fated Lady Franklin Bay Expedition and Melville for exploring the bitter cold reaches of Siberia Both men were among the first five Honorary Members elected by The American Alpine Club shortly after the organization was founded in 1902 [Index-catalogue of the Library of the Surgeon-General's Office, United States Army National Library of Medicine \(U.S.\)](#),1928 **The Athenaeum** ,1850 [Literary Gazette and Journal of Belles Lettres, Arts, Sciences, Etc](#) William Jerdan,William Ring Workman,Frederick Arnold,John Morley,Charles Wycliffe Goodwin,1831 **The Literary Gazette and Journal of Belles Lettres, Arts, Sciences, &c** ,1831 [A Cyclopaedia of Biblical Literature: Ibz-Zuz](#) John Kitto,1846 [General Catalogue of Printed Books](#) British Museum.
