2nd Semester Inquiry Review:

New Digital Technology in Education Wan Ng, 2015-04-25 This book addresses the issues confronting educators in the integration of digital technologies into their teaching and their students learning. Such issues include a skepticism of the added value of technology to educational learning outcomes, the perception of the requirement to keep up with the fast pace of technological innovation, a lack of knowledge of affordable educational digital tools, and a lack of understanding of pedagogical strategies to embrace digital technologies in their teaching. This book presents theoretical perspectives of learning and teaching today's digital students with technology and propose a pragmatic and sustainable framework for teachers' professional learning to embed digital technologies into their repertoire of teaching strategies in a systematic, coherent, and comfortable manner so that technology integration becomes an almost effortless pedagogy in their day to day teaching. The materials in this book are comprised of original and innovative contributions including empirical data to existing scholarship in this field. Examples of pedagogical possibilities that are both new and currently practised across a range of teaching contexts are featured.

Assessment of Online Learners Paolina Seitz, S. Laurie Hill, 2023-12-05 Assessment of Online Learners offers essential foundations, insights, and real world examples for preservice teachers preparing to assess students in today's digitized classrooms. When aligned with intended curricula and best practices, assessment not only informs but enhances both instruction and student achievement. Though the recent large scale adaptation of face to face learning to online platforms has yielded new challenges and responsibilities for teachers, this book explores shifts in the research and practice of assessment in online environments, the reconceptualization of course content and assessment frameworks in teacher education, the collection of fair and accurate assessment evidence reflecting students' virtual learning, and more. Drawing from experienced Canadian instructors who overcame the inherent technological obstacles, these chapters showcase how unprecedented changes in schooling can lead to pedagogical renewal, program reevaluation, and a broader understanding of instruction and assessment practices.

Teaching Information Literacy and Writing Studies Grace Veatch, 2018-09-15 This volume, edited by Grace Veatch, explores leading approaches to foregrounding information literacy in first year college writing courses. Chapters describe cross disciplinary efforts underway across higher education as well as innovative approaches of both writing professors and librarians in the classroom. This seminal work unpacks the disciplinary implications for information literacy and writing studies as they encounter one another in theory and practice during a time when fact or truth is less important than fitting a predetermined message. Topics include reading and writing through the lens of information literacy, curriculum design, specific writing tasks, transfer, and assessment.
