Fetal Alcohol Abuse Syndrome:

Fetal Alcohol Abuse Syndrome Ernest L. Abel, 2013-03-09 My initial purpose in writing this book was to offer readers an update of my book *Fetal Alcohol Syndrome and Fetal Alcohol Effects* Plenum 1984 which contained a broad overview of the history actually the absence of any history of the awareness of alcohol's teratogenic potential a review of alcohol's pharmacology especially with respect to pregnancy a survey of the physical and behavioral effects of prenatal alcohol exposure and an overview of the mechanisms suspected of being responsible for those effects I have omitted most of the previously examined historical and pharmacological information because not much of what was previously discussed needed revision On the other hand because much more has been learned about the consequences of prenatal alcohol exposure and its potential mechanisms of action I have considerably expanded my discussion of these topics In doing so I have attempted to include as much new material as possible without I hope being overly pedantic and thereby losing the proverbial forest for the trees No book is ever entirely neutral in the topics it discusses the issues it raises or in its conclusions In sifting through hundreds and oftentimes thousands of articles writers have to choose which facts to emphasize and which to ignore Every idea cannot be chronicled and every article cannot and should not be cited In going about the business of picking and choosing however a writer has an obligation to present the arguments for and against a particular conclusion

Fetal Alcohol Syndrome Committee to Study Fetal Alcohol Syndrome, Institute of Medicine, 1996-04-15 It sounds simple Women who drink while pregnant may give birth to children with defects so women should not drink during pregnancy Yet in the 20 years since it was first described in the medical literature fetal alcohol syndrome FAS has proved to be a stubborn problem with consequences as serious as those of the more widely publicized crack babies This volume discusses FAS and other possibly alcohol related effects from two broad perspectives diagnosis and surveillance and prevention and treatment In addition it includes several real life vignettes of FAS children The committee examines fundamental concepts for setting diagnostic criteria in general reviews and updates the diagnostic criteria for FAS and related conditions and explores current research findings and problems associated with FAS epidemiology and surveillance In addition the book describes an integrated multidisciplinary approach to research on the prevention and treatment of FAS The committee Discusses levels of preventive intervention Reviews available data about women and alcohol abuse and treatment among pregnant women Explores the psychological and behavioral consequences of FAS at different ages Examines the current state of knowledge about medical and therapeutic interventions education efforts and family support programs This volume will be of special interest to physicians nurses mental health practitioners school and public health officials policymakers researchers educators and anyone else involved in serving families and children especially in high risk populations
