Widely acknowledged as an important if highly controversial figure in contemporary literature French novelist and poet Michel Houellebecq has elicited diverse critical responses In this book Carole Sweeney examines his novels as a response to the advance of neoliberalism into all areas of affective human life This historicizing study argues that le monde houellebecquien is an atomised society of banal quotidian alienation populated by quietly resentful men who are the botched subjects of late capitalism Addressing Houellebecq s handling of the failure of the radical thought of 68 Sweeney looks at the ways in which his fiction treats feminism the decline of religion and the family as well as the obsolescence of French theory and the Sartrean notion of engaged literature Reading the world with the disappointed idealism of a contemporary moralist Houellebecq s novels Sweeney argues fluctuate between despair for the world as it is and a limp utopian hope for a post humanity **The Oxford Handbook of Schopenhauer** Robert L. Moral Blindness Zygmunt Bauman,Leonidas Donskis,2013-04-24 Evil is not confined to war or to circumstances in which people are acting under extreme duress Today it more frequently reveals itself in the everyday insensitivity to the suffering of others in the inability or refusal to understand them and in the casual turning away of one s ethical gaze Evil and moral blindness lurk in what we take as normality and in the triviality and banality of everyday life and not just in the

abnormal and exceptional cases The distinctive kind of moral blindness that characterizes our societies is brilliantly analysed by Zygmunt Bauman and Leonidas Donskis through the concept of adiaphora the placing of certain acts or categories of human beings outside of the universe of moral obligations and evaluations Adiaphora implies an attitude of indifference to what is happening in the world a moral numbness In a life where rhythms are dictated by ratings wars and box office returns where people are preoccupied with the latest gadgets and forms of gossip in our hurried life where attention rarely has time to settle on any issue of importance we are at serious risk of losing our sensitivity to the plight of the other Only celebrities or media stars can expect to be noticed in a society stuffed with sensational valueless information This probing inquiry into the fate of our moral sensibilities will be of great interest to anyone concerned with the most profound changes that are silently shaping the lives of everyone in our contemporary liquid modern world **War on the Human** Konstantinos

Blatanis, Theodora Tsimpouki, 2017-05-11 The essays in this collection explore the question of the human both as a contested concept and as it relates to and functions within the wider global conjuncture The authors explore the theoretical underpinnings of the term human inviting the reader to reflect upon the contemporary human condition to identify opportunities and threats in the changes ahead and to determine what aspects of our species we should abandon or strive to maintain The volume approaches these ideas from a myriad of perspectives but the authors are united in their abstention from rejecting humanism outright or indeed fully endorsing posthumanism's teleological narrative of accelerated progress and perfectability Instead the authors argue that the term human itself is better understood as a concept perpetually undergoing revision and is necessarily subject to scrutiny The contributors here are thus concerned with investigating the following questions What does it mean to be human or to have a self What is the current place or status of the human in the contemporary world As technology is increasingly used to modify our bodies and minds to what extent should we alter and how can we improve our very understanding of human nature The authors contend that literature is the art form best placed to answer these questions In its dynamism and discursiveness literature has the capacity to both reflect dominant discourses and ideologies as well as to generate and even anticipate social change to critique and refine conventional ideas and existing cultural modes and to envision new possibilities for the future The human and its literary representation in other words are inherently intertwined **On Bathos** Sara Crangle, Peter Nicholls, 2012-02-23 This essay collection reveals how bathos has become so central to literature fine art and music

The Planetary Clock Paul Giles, 2021 Ranging over various aesthetic forms literature film music in the period since 1960 this volume brings an antipodean perspective into conversation with the art and culture of the Northern Hemisphere to reformulate postmodernism as a properly global phenomenon

Introduction to Computational Cultural Psychology Yair Neuman, 2014-02-06 Draws on state of the art computer technology to introduce a novel approach for studying the interface of culture and psychology **Shakespeare's Individualism** Peter Holbrook, 2010-01-21 Providing a provocative and original perspective on Shakespeare Peter Holbrook

argues that Shakespeare is an author friendly to such essentially modern and unruly notions as individuality freedom self realization and authenticity These expressive values vivify Shakespeare s own writing they also form a continuous and a central part of the Shakespearean tradition Engaging with the theme of the individual will in specific plays and poems and examining a range of libertarian minded scholarly and literary responses to Shakespeare over time Shakespeare s Individualism advances the proposition that one of the key reasons for reading Shakespeare today is his commitment to individual liberty even as we recognize that freedom is not just an indispensable ideal but also potentially a dangerous one Engagingly written and jargon free this book demonstrates that Shakespeare has important things to say about fundamental issues of human existence

Going Nowhere, Slow Mikkel Krause Frantzen,2019-11-29 Using examples from art and literature Frantzen explores the social political and economic implications of both real and imagined depression Is feeling blue a symptom of the death of progress Was the suicide of David Foster Wallace a proverbial canary in a coal mine Margaret Thatcher once declared that there is no alternative to the social order that we now reside within Have we accepted her slogan as a fact and is that why so many are on Prozac and other anti depressants Frantzen examines the works of Michel Houellebecq Claire Fontaine and David Foster Wallace as he seeks out an answer and a way to formulate a new future oriented left movement
