**Transportation Research Record** ,1999 Sustainability Issues in Civil Engineering G.L. Sivakumar Babu, Sireesh Saride, B. Munwar Basha, 2016-11-23 This compilation on sustainability issues in civil engineering comprises contributions from international experts who have been working in the area of sustainability in civil engineering Many of the contributions have been presented as keynote lectures at the International Conference on Sustainable Civil Infrastructure ICSCI held in Hyderabad India The book has been divided into core themes of Sustainable Transportation Systems Sustainable Geosystems Sustainable Environmental and Water Resources and Sustainable Structural Systems Use of sustainability principles in engineering has become an important component of the process of design and in this context design and analysis approaches in civil engineering are being reexamined to incorporate the principles of sustainable designs and construction in practice

Developing economies are on the threshold of rapid infrastructure growth and there is a need to compile the developments in various branches of civil engineering and highlight the issues. It is this need that prompted the composition of this book. The contents of this book will be useful to students, professionals and researchers working on sustainability related problems in civil engineering. The book also provides a perspective on sustainability for practicing civil engineers who are not directly researching the problems but are affected by the concerns in the course of their profession. The book can also serve to highlight to policy makers and governing bodies the need to have a mandate for sustainable infrastructural development.

**Roads and Airfields in Cold Regions** Ted S. Vinson, James W. Rooney, Wilbur H. Haas, 1996-01-01. This state-of-the-practice report on the design and development of roads and airfields is the eighth monograph in a series prepared by the Technical Council on Cold Regions Engineering of the American Society of Civil Engineers. Previous reports in the series covered such topics as frost action and its control, embankment design and arctic coastal processes. This book discusses such topics as: 1. Route location siting 2. frost action 3. design for permafrost conditions 4. low temperature cracking 5. maintenance 6. use of geosynthetics and 7. materials specifications and testing. This monograph contributes a substantial amount of new material to the Cold Regions Engineering series. *Effects of Heavy Loading on Wisconsin's Concrete Pavement* Samuel Owusu-Ababio, Robert L.
