ARLIS/NA Update, 1993 *Reading Architecture* Angeliki Siochi, Yoonchun Jung, 2018-04-09 Why write instead of draw when it comes to architecture Why rely on literary pieces instead of architectural treatises and writings when it comes to the study of buildings and urban environments Why rely on literary techniques and accounts instead of architectural practices and analysis when it comes to academic research and educational projects Why trust authors and writers instead of sociologists or scientists when it comes to planning for the future of cities This book builds on the existing interdisciplinary bibliography on architecture and literature but prioritizes literature's capacity to talk about the lived experience of place and the premise that literary language can often express the inexpressible It sheds light on the importance of a literary instead of a pictorial imagination for architects and it looks into four contemporary architectural subjects through a wide variety of literary works Drawing on novels that engage cities from around the world the book reveals aspects of urban space to which other means of architectural representation are blind Whether through novels that employ historical buildings or sites interpreted through specific literary methods it suggests a range of methodologies for contemporary architectural academic research By exploring the power of narrative language in conveying the experience of lived space it discusses its potential for architectural design and pedagogy Questioning the massive architectural production of today's globalized capital-driven world it turns to literature for ways to understand, resist or suggest alternative paths for architectural practice Despite literature's fictional character the essays of this volume reveal true dimensions of and for places beyond their historical, social and political reality dimensions of utmost importance for architects, urban planners, historians and theoreticians nowadays

Science and Technology Historical Association, 1995 *Montréal* Annick Germain, Damaris Rose, 2000-07-26 How did a small French missionary colony become a major pivot of the North American economy and the leading industrial and financial metropolis of Canada in the nineteenth century dominated by a Victorian bourgeoisie only to see its role retrenched by the later twentieth century to one of a contested metropolis of the French speaking province of Quebec? How does the city today reconcile the many facets of its identity as French window on North America but also as a bilingual and increasingly multicultural metropolis? How has a city seemingly allergic to urban planning managed to sustain even revitalize an animated and liveable urban core? How can its economy exhibit an excellent performance in terms of conversion to high technology and knowledge based industries yet suffer from persistent high unemployment? How can a city with such an extreme climate and long cold winter and that remains significantly divided between two cultural and linguistic majorities be so frequently ranked one of the world's most liveable cities? The list of paradoxes characterizing Montréal is a long one. The portrait that Annick Germain and Damaris Rose strive to paint of the intriguing city caught in the maelstrom of political debate that permeates most of its urban issues is both wide ranging and fine grained. At the heart of this debate lies the National Question addressing Quebec's place vis-à-vis the Canadian federation. Building on a vast array of recent research the authors themselves forming a team that reflects the bilingual bicultural character of Montréal explore the twists and turns of Montréal's perennial quest for an identity and a mission worthy of a metropolis.
