Mikoyan MiG-31 Yefim Gordon, Dmitriy Komissarov, 2011-10-30 A history of this advanced Russian jet including useful information for model makers. The MiG 31 started life as an advanced derivative of the famous MiG 25P interceptor, becoming the first Soviet fourth generation combat aircraft. First flown in 1975, it differed from its progenitor primarily in having a crew of two: pilot and weapons systems operator, a highly capable passive phased array radar, a world first, and new R 33 long range missiles as its primary armament. The maximum speed was an impressive Mach 2.82, the cruising speed being Mach 2.35. The type entered service in 1981; more than 500 copies were built between 1981 and 1994. The powerful radar and other avionics allowed the MiG 31 to operate as a mini AWACS, scanning the airspace and guiding other interceptors to their targets; a flight of three such aircraft in line abreast formation could cover a strip 800 km, 500 miles wide. To this day, the MiG 31 remains one of the key air defense assets of the Russian Air Force. This book describes the MiG 31's developmental history, including upgrade programs, and features a comprehensive survey of the MiG 31 model making kits available on the market.
