Interregional Travel National Academies of Sciences, Engineering, and Medicine, Transportation Research Board, Policy Studies, Committee for a Study of Intercity Passenger Travel Issues and Opportunities in Short-Haul Markets, 2016-04-07 TRB Special Report 320 *Interregional Travel A New Perspective for Policy Making* examines the demand for and supply of interregional transportation in the United States. Major additions to transportation infrastructure including high speed rail are being considered for some of the country's most heavily traveled 100 to 500 mile corridors. The availability and use of the automobile, airplane, and train for interregional travel are reviewed along with the rejuvenated intercity bus. U.S. interregional corridors and transportation options are contrasted with those in Japan and Europe where substantial investments have been made in passenger rail. Public investments in new long-lived transportation infrastructure can be risky because of uncertainty about future demand and the development of new technologies and competing transportation services. Decisionmakers in interregional corridors face the added challenge of having to coordinate investments across multiple jurisdictions. The report recommends actions to reduce this uncertainty and create stronger institutional means for developing the country's interregional corridors. TR News 303 features an article on *Interregional Travel A New Perspective for Policy Making*. A video about the research is now available. At the 2016 TRB Annual Meeting January 10-14, 2016, a session entitled *Interregional Travel Policymaking from a New Perspective* was webcast live. These videos provide an overview of various components of the project: Introduction, Part 1: Overview of Project Scope, Part 2: Data and Information Needs, Part 3: Intercity Bus Operations Question and Answer Session. Presenters: Tom Deen, Nancy McGuckin, Joe Schweiterman. Moderated by Martin Wachs. *My Life with Trains* Jim McClellan, 2017-06-16. Hofsommer, Carlos Arnaldo Schwantes, 2022-09-20. *Crossroads of a Continent: Missouri Railroads 1851-1921* tells the story of the state's railroads and their vital role in American history. Hofsommer, and Carlos Arnaldo Schwantes explore the history of Missouri railroads.

*Octopus's Garden* Benjamin T. Jenkins, 2023-07-10 As Southern California recovered from the collapse of the cattle industry in the 1860s the arrival of railroads attacked by newspapers as the greedy octopus and the expansion of citrus agriculture transformed the struggling region into a vast idealized and prosperous garden New groves of the latest citrus varieties and new towns like Riverside quickly grew directly along the tracks of transcontinental railroads The influx of capital industrial technology and workers especially people of color energized Southern California and tied it more closely to the economy and culture of the United States than ever before Benjamin Jenkins's *Octopus's Garden* argues that citrus agriculture and railroads together shaped the economy landscape labor systems and popular image of Southern California Orange and lemon growing boomed in the 1870s and 1880s while railroads linked the region to markets across North America and ended centuries of geographic isolation for the West Coast Railroads competed over the shipment of citrus fruits from multiple counties engulfed by the orange empire resulting in an extensive rail network that generated lucrative returns for grove owners and railroad businessmen in Southern California from the 1890s to the 1950s While investment from white Americans particularly wealthy New Englanders formed the financial backbone of the *Octopus's Garden* citrus and railroads would not have thrived in Southern California without the labor of people of color Many workers of color took advantage of the commercial developments offered by railroads and citrus to economically advance their families and communities however these people also suffered greatly under the constant realities of bodily harm low wages and political and social exclusion Promoters of the railroads and citrus cooperatives touted California as paradise for white Americans and minimized the roles of non white laborers by stereotyping them in advertisements and publications These practices fostered conceptions of California's racial hierarchy by praising privileged whites and maligning the workers who made them prosper The *Octopus's Garden* continues to shape Southern Californians understanding of their past In bringing together multiple storylines Jenkins provides a complex and fresh perspective on the impact of citrus agriculturalists and railroad companies in Southern Californian history
