Among The Ancients Adventures In The Eastern Old Growth Forests:

Ecology and Recovery of Eastern Old-Growth Forests Andrew M. Barton, William S. Keeton, 2018-11-08 The landscapes of North America including eastern forests have been shaped by humans for millennia through fire agriculture hunting and other means But the arrival of Europeans on America s eastern shores several centuries ago ushered in the rapid conversion of forests and woodlands to other land uses By the twentieth century it appeared that old growth forests in the eastern United States were gone replaced by cities farms transportation networks and second growth forests Since that time however numerous remnants of eastern old growth have been discovered meticulously mapped and studied Many of these ancient stands retain surprisingly robust complexity and vigor and forest ecologists are eager to develop strategies for their restoration and for nurturing additional stands of old growth that will foster biological diversity reduce impacts of climate change and serve as benchmarks for how natural systems operate Forest ecologists William Keeton and Andrew Barton bring together a volume that breaks new ground in our understanding of ecological systems and their importance for forest resilience in an age of rapid environmental change This edited volume covers a broad geographic canvas from eastern Canada and the Upper Great Lakes states to the deep South It looks at a wide diversity of ecosystems including spruce fir northern deciduous southern Appalachian deciduous southern swamp hardwoods and longleaf pine Chapters authored by leading old growth experts examine topics of contemporary forest ecology including forest structure and dynamics below ground soil processes biological diversity differences between historical and modern forests carbon and climate change mitigation management of old growth and more This thoughtful treatise broadly communicates important new discoveries to scientists land managers and students and breathes fresh life into the hope for sensible effective management of old growth stands in eastern forests

Handbook of Research on Science Literacy Integration in Classroom Environments Tai, Chih-Che, Moran, Renee M. R., Robertson, Laura, Keith, Karin, Hong, Huili, 2018-10-12 Secondary schools are continually faced with the task of preparing students for a world that is more connected advanced and globalized than ever before In order to adequately prepare students for their future educators must provide them with strong reading and writing skills as well as the ability to understand scientific concepts The Handbook of Research on Science Literacy Integration in Classroom Environments is a pivotal reference source that provides vital research on the importance of cross curriculum discipline connections in improving student understanding and education While highlighting topics such as curriculum integration online learning and instructional coaching this publication explores practices in teaching students how to analyze and interpret data as well as reading writing and speaking This book is ideally designed for teachers graduate level students academicians instructional designers administrators and education researchers seeking current research on science literacy adoption in contemporary classrooms

Nature's Temples Joan Maloof, 2023-04-04 An impassioned case for the importance of ancient forests and their preservation Standing in an old growth forest you can instinctively sense the ways it

is different from forests shaped by humans These ancient undisturbed ecosystems are increasingly rare and largely misunderstood Nature s Temples explores the science and alchemy of old growth forests and makes a compelling case for their protection Many foresters are proponents of forest management while ecologists and conservation biologists believe that the healthiest forests are those we leave alone Joan Maloof brings together the scientific data we have about old growth forests drawing on diverse fields of study to explain the ecological differences among forests of various ages She describes the life forms and relationships that make old growth forests unique from salamanders and micro snails to plants that communicate through fungi and reveals why human attempts to manage forests can never replicate nature s sublime handiwork This revised and expanded edition also sheds new light on the special role forests play in removing carbon from the atmosphere and shares what we know about the interplay between wildfires and ancient forests With drawings by Andrew Joslin that illustrate scientific concepts and capture the remarkable beauty of ancient trees Nature s Temples invites you to discover the power of these fragile realms that are so inextricably connected to our planet our fellow species and our spirits

Among the Ancients Joan Maloof, 2011 Finalist for the Eric Hoffer Award A natural history primer packed with travel ideas this tour of 26 old growth forests one in each state east of the Mississippi River and all open to the public aims to dispel the misconception that these forests are located only on the west coast With intelligence and lyricism the book highlights the adventure in getting to each forest and what visitors will find when they arrive From giant hemlock groves in Pennsylvania to a lonely stand of pines in Wisconsin each journey provides face to face experiences with forests containing majestic trees and a rich diversity of life As an impassioned plea to preserve and support the few untouched stretches of forest that remain the discussion touches upon the perseverance of these locations despite modern development as well as the vital link between old growth forests and humanity s own survival

Soil and Spirit Scott Chaskey, 2023-05-09 As a farmer with decades spent working in fields Scott Chaskey has been shaped by daily attention to the earth A leader in the international Community Supported Agriculture CSA movement he has combined a longstanding commitment to food sovereignty and organic farming with a belief that humble attention to microbial life and diversity of species provides invaluable lessons for building healthy human communities Along the way even while planning rotations of fields ordering seeds tending to crops and their ecosystems Chaskey was writing And in this lively collection of essays he explores the evolution of his perspective as a farmer and as a poet Tracing the first stage in his development back to a homestead in Maine on the ancestral lands of the Abenaki he recalls learning to cultivate plants and nourish reciprocal relationships among species even as he was reading Yeats and beginning to write poems He describes cycling across Ireland a surprise meeting with Seamus Heaney and later farming in Cornwall s ancient landscape of granite bramble and windswept trees He travels to China for an international conference on Community Supported Agriculture reading ancient wilderness poetry along the way and then on to the pueblo of Santa Clara in New Mexico where he joins a group of Indigenous women
