Computer Aided Design Guide for Architecture, Engineering and Construction Ghassan Aouad, Song Wu, Angela Lee, Timothy Onyenobi, 2013-06-17 Recent years have seen major changes in the approach to Computer Aided Design CAD in the architectural engineering and construction AEC sector CAD is increasingly becoming a standard design tool facilitating lower development costs and a reduced design cycle Not only does it allow a designer to model designs in two and three dimensions but also to model other dimensions such as time and cost into designs Computer Aided Design Guide for Architecture Engineering and Construction provides an in depth explanation of all the common CAD terms and tools used in the AEC sector It describes each approach to CAD with detailed analysis and practical examples Analysis is provided of the strength and weaknesses of each application for all members of the project team followed by review questions and further tasks Coverage includes 2D CAD 3D CAD 4D CAD nD modelling Building Information Modelling parametric design virtual reality and other areas of future expansion With practical examples and step by step guides this book is essential reading for students of design and construction from undergraduate level onwards

Building Information Modelling (BIM) in Design, Construction and Operations III P. De Wilde, L. Mahdjoubi, A Galiano Garrigós, 2019-12-10 Originating from the 2019 International Conference on Building Information Modelling this book presents latest findings in the field This volume presents research from a panel of experts from industry practice and academia touching on key topics the development of innovative solutions and the identification future trends

Building Information Modeling Nawari O. Nawari, Michael Kuenstle, 2015-04-21 This book focuses on how engineers and architects can benefit from new frameworks and technologies by reviewing the building information management BIM concept discussing how BIM will affect education

and practice evaluating current BIM technology exploring critical issues for best practices in BIM environments and reviewing fundamentals of architectural and structural analysis under the new framework The book provides professionals and students with the necessary knowledge and tools to assist them in understanding architectural structures and utilizing BIM to offer practical design solutions

Artificial Intelligence in Design '91 J. S. Gero, 2014-05-23 Artificial Intelligence in Design 91 is a collection of 47 papers from the First International Conference on Artificial Intelligence in Design held at Edinburgh in June 1991 The papers in this book are grouped into 13 headings starting with a background of AI design systems and to which extent AI that results from being used as planning tool be applied to quality oriented design processes in architecture A constraint driven approach to object oriented design is also shown on real world objects The use of CADSYN in the structural design of buildings is examined along with design dependent knowledge and design independent knowledge Discussions on empowering designers with integrated design environments are given whereby design objects may be retrieved from catalogues without requiring users to form queries Mention is given to automated adjustment of parameter values frequently used in computer routine applications The book also introduces the Computer Aided Design CAD as applied to architecture Design representation using data models non monotonic reasoning in design and the cognitive aspects of design using empirical studies are discussed Topics of the industrial applications of AI in design such as the needed steps to develop a successful AI based tool and a review of the Castlemain Project and telecommunication distribution networks follow This book is suitable for programmers computer science students and architects and engineers who use computers in their line of work

Advances in Representation Andrea Giordano, Michele Russo, Roberta Spallone, 2024-08-05 This book presents contributions which discuss the impact of eXtended Reality XR and Artificial Intelligence AI technologies considered jointly in the fields of Cultural Heritage and Innovative Design The rapid development of technologies tools and devices requires a controlled expansion of the theoretical content and application areas as well as careful monitoring of the disciplines that can be involved starting with the AI XR pair XR an acronym for extended reality has emerged in recent years as a concept encompassing AR VR virtual reality and MR mixed reality offering new ways of interacting with the real In this sense the fields of application open to the worlds of tangible and intangible cultural heritage architectural environmental infrastructural and product design and education as a place for advanced training and as a tool for educational enhancement
