Molecular Architecture and Dynamics of Meiotic Chromosomes Ricardo Benavente, Mónica Pradillo, Pedro A. San-Segundo, 2024-03-11 Meiosis is a special type of cell division that allows the generation of haploid gametes and is a key process for sexual reproduction of animals plants and fungi Haploidization requires that meiotic cells undergo a series of unique processes namely pairing synapsis recombination and segregation of homologous chromosomes This involves profound meiosis specific changes in the protein composition and architecture of homologous chromosomes as well as of the condensation and folding of chromatin that require a critical timing and regulation Despite this enormous complexity different organisms may achieve haploidization through common molecular mechanisms A major goal of this article collection is to provide an overview of how meiotic chromosomes and their components are critically involved in the mechanisms of haploidization and how dynamic protein complexes yield important structural intermediates and temporal regulation to this process We welcome submissions of original articles mini reviews and review articles dealing with the composition architecture function and regulation of meiotic chromosomes of animals plants and fungi using microscopic biochemical molecular genetic and or omic techniques

Artificial Intelligence in the Production of Biotherapeutics Alok Kumar Srivastav, Priyanka Das, 2025-08-29 The transformative role of artificial intelligence AI in modern biomanufacturing focuses on key areas such as process analytical technology PAT Good Manufacturing Practice GMP

compliance predictive analytics and AI driven quality systems It bridges cutting edge AI applications with the complexities of biotherapeutic production offering insights into automation real time monitoring and process optimization Delving into the core of biomanufacturing the book provides a structured journey through its critical phases It begins with an introduction to modern biomanufacturing principles quality by design approaches and the integration of AI Subsequent chapters examine raw material management lean manufacturing practices and the application of predictive analytics to optimize supply chains Readers will explore advanced tools such as AI enhanced data acquisition in PAT automated standard operating procedures SOPs and AI driven process controls for fermenters and chromatography systems The text also addresses GMP essentials including personnel management hygienic facility design and pharmaceutical water systems Key chapters highlight AI s role in validation processes sterile packaging and regulatory compliance referencing global guidelines from organizations such as the WHO FDA and ICH Real world case studies featuring therapeutic proteins monoclonal antibodies and vaccines underscore the practical applications of AI in scaling and maintaining biotherapeutic production This book equips readers with a comprehensive understanding of AI s potential to enhance efficiency accuracy and compliance in biomanufacturing Whether you are a professional researcher or student this guide offers actionable insights into leveraging AI to revolutionize biotherapeutic production while adhering to the highest industry standards What You Will Learn Understand how AI enhances every phase of biotherapeutic production from raw material management to regulatory compliance optimizing efficiency accuracy and quality Explore the role of AI in advanced data acquisition process control and continuous improvement including applications in fermenters flow filtration and chromatography systems Gain insights into leveraging AI for automating standard operating procedures SOPs predictive maintenance quality assurance and adhering to global GMP standards like WHO and FDA guidelines Learn how AI transforms upstream and downstream processes ensures sterility in packaging and supports case studies on therapeutic proteins monoclonal antibodies and human vaccines Discover the potential of AI in shaping the future of biomanufacturing including challenges data security and the ethical implications of AI driven automation
