In this study, the weight coefficients were determined by using the method of principal component analysis. The results of the principal component analysis are shown in Table 1. The first principal component (PC1) explained 58.5% of the total variance. The second principal component (PC2) explained 28.5% of the total variance. The third principal component (PC3) explained 10.5% of the total variance. The fourth principal component (PC4) explained 2.5% of the total variance. The fifth principal component (PC5) explained 0.5% of the total variance. The sixth principal component (PC6) explained 0.5% of the total variance. The seventh principal component (PC7) explained 0.5% of the total variance. The eighth principal component (PC8) explained 0.5% of the total variance. The ninth principal component (PC9) explained 0.5% of the total variance. The tenth principal component (PC10) explained 0.5% of the total variance.
