**Sociology, Social Theory, and Organization Studies** Paul S. Adler, Paul Du Gay, Glenn Morgan, Michael I. Reed, 2014

Sociology and social theory has always been a major source of new perspectives for organization studies Access to a series of authoritative accounts of theorists and research themes in sociology and social theory which have influenced developments in organization studies is essential for those wishing to deepen and extend their knowledge of the intersection of sociology and organization studies This goal is achieved by drawing on a group of internationally renowned scholars committed in their own work to strengthening these links and asking them to provide critical accounts of particular theorists and research themes which have straddled this divide This volume aims to strengthen ties between organization studies and contemporary sociological work at a time when there are increasing institutional barriers to such cooperation potentially generating a myopia that constricts new developments Used in conjunction with its companion volume The Oxford Handbook of Sociology and Organization Studies Classical Foundations the reader is provided with a comprehensive account of the productive and critical interaction between sociology and organization studies over many decades Highly international in scope theorists and themes are drawn from both the USA and Europe in equal measure Similarly the authors of the chapters are drawn from both sides of the Atlantic The result is a series of chapters on individuals and key research themes and debates which will provide faculty and post graduate researchers with appreciative authoritative and critical accounts that can be drawn on to design courses or provided guided reading to the field Animal Spaces, Beastly Places Chris Philo, Chris

Wilbert, 2004-08-02 Animal Spaces Beastly Places examines how animals interact and relate with people in different ways Using a comprehensive range of examples which include feral cats and wild wolves to domestic animals and intensively farmed cattle the contributors explore the complex relations in which humans and non human animals are mixed together Our emotions involving animals range from those of love and compassion to untold cruelty force violence and power As humans we have placed different animals into different categories according to some notion of species usefulness domesticity or wildness As a result of these varying and often contested orderings animals are assigned to particular places and spaces Animal Spaces Beastly Places shows us that there are many exceptions and variations on the spatiality of human animal spatial orderings within and across cultures and over time It develops new ways of thinking about human animal interactions and encourages us to find better ways for humans and animals to live together **Environment & Planning**, 2003

*Care in Technology* Xavier Guchet, 2021-04-27 Today it is widely recognized that in order to meet environmental challenges it will not simply be enough to make our lifestyles greener also critical is putting an end to the modern conception of the human as master and possessor of nature However to bear fruit this change in anthropology must also be accompanied by a revision in our conception of technology Since the Enlightenment and the development of industrialization technology no longer seems to be subject to the guiding principles set by the Greeks prudence and the search for the right measure in all which leads to the care of beings and the world Care in Technology analyzes the historical changes that have led technology to become an unthinkable part of care and care an unthinkable part of technology It also establishes the conditions for care to once again become a regulatory principle of the activity of engineers who design technology

**Cross-disciplinary Perspectives on a Contested Buddhist Site** David Geary, Matthew R. Sayers, Abhishek Singh Amar, 2012-06-25 Bodh Gaya in the North Indian state of Bihar has long been recognized as the place where the Buddha achieved enlightenment This book brings together the recent work of twelve scholars from a variety of disciplines anthropology art history history and religion to highlight their various findings and perspectives on different facets of Bodh Gaya s past and present Through an engaging and critical overview of the place of Buddha s enlightenment the book discusses the dynamic and contested nature of this site and looks at the tensions with the on going efforts to define the place according to particular histories or identities It addresses many aspects of Bodh Gaya from speculation about why the Buddha chose to sit beneath a tree in Bodh Gaya to the contemporary struggles over tourism development education and non government organizations to bring to the foreground the site s

longevity reinvention and current complexity as a UNESCO World Heritage monument The book is a useful contribution for students and scholars of Buddhism and South Asian Studies      *TechnoFeminism* Judy Wajcman, 2013-05-20 This timely and engaging book argues that technoscientific advances are radically transforming the woman machine relationship However it is feminist politics rather than the technologies themselves that make the difference TechnoFeminism fuses the visionary insights of cyberfeminism with a materialist analysis of the sexual politics of technology      **The Oxford Handbook of Management Information Systems** Robert D Galliers, Wendy Currie, 2011-07-28 This Handbook provides critical interdisciplinary contributions from leading international academics on the theory and methodology practical applications and broader context of Management Information Systems as well as offering potential avenues for future research

Communicating Mobility and Technology Ehren Helmut Pflugfelder, 2016-07-07 Winner of the 2018 CCCC Technical and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to the effects of human mobility and crises such as depleting oil supplies Ehren Helmut Pflugfelder turns specifically to automobility a term used to describe the kinds of mobility afforded by autonomous automobile based movement technologies and their ramifications Thus far few studies in technical communication have explored the development of mobility technologies the immense power that highly structured environmentally significant systems have in the world or the human machine interactions that take place in such activities Applying kinaesthetic rhetoric a rhetoric that is sensitive to and developed from the mobile material context of these technologies Pflugfelder looks at transportation projects such as electric taxi cabs from the turn of the century to modern day open source vehicle projects and a large case study of an autonomous electric pod car network that ultimately failed Kinaesthetic rhetoric illuminates how mobility technologies have always been persuasive wherever and whenever linguistic symbol systems and material interactions enroll us often unconsciously into regimes of movement and ways of experiencing the world As Pflugfelder shows mobility technologies involve networks of sustained arguments that are as durable as the bonds between the actors in their networks      **The Cambridge Handbook of**

**Material Culture Studies** Lu Ann De Cunzio, Catharine Dann Roeber, 2022-06-09 Material culture studies is an interdisciplinary field that examines the relationships between people and their things the production history preservation and interpretation of objects It draws on theory and practice from disciplines in the social sciences and humanities such as anthropology archaeology history and museum studies Written by leading international scholars this Handbook provides a comprehensive view of developments methodologies and theories It is divided into five broad themes embracing both classic and emerging areas of research in the field Chapters outline transformative moments in material culture scholarship and present research from around the world focusing on multiple material and digital media that show the scope and breadth of this exciting field Written in an easy to read style it is essential reading for students researchers and professionals with an interest in material culture      **Philosophy of Technology** Maarten J Verkerk, Jan Hoogland, Jan van der Stoep, Marc J. de

Vries, 2015-09-16 *Philosophy of Technology* An introduction for technology and business students is an accessible guide to technology's changes, their ubiquitousness, and the many questions these raise. Designed for those with no philosophical background in mind, it is ideal for technology and engineering students or specialists who want to learn to think critically about how their work influences society and our daily lives. The technological business environment and daily experiences are the starting point of the book, and the authors reflect upon these practices from a philosophical point of view. The text goes on to present a critical analysis of the subject, including development, manufacturing, sales, and marketing, and the use of technological products and services. The abstract ideas are made easier to grasp with a story-telling approach, a vivid history of the discipline, and colourful portraits of the core thinkers in this domain, as well as four case studies drawing from various engineering disciplines to demonstrate how philosophy can and should influence technology in practice. The first comprehensive introduction to this vibrant young sub-discipline in over 20 years, this is an ideal textbook for students of technology and engineering beginning a course or project in the philosophy of their subject. Urban Infrastructure Joseph Heathcott, Jonathan Soffer, Rae Zimmerman, 2022-10-11 *Urban Infrastructures* creates space for an encounter between historians, humanists, and social scientists who seek new methodological approaches to the history of urban infrastructure. It draws on recent work across history, anthropology, science, and technology studies, geography, resilience, sustainability, and other disciplines to explore the social effects of infrastructure. The volume rejects narrow conceptions of infrastructure history as only the history of public works and instead expands the definition to all business enterprises and public bodies that provide the goods and services essential for the day-to-day lives of most people. Essays examine traditional artifacts such as roads, highways, and waterworks, as well as nontraditional topics like regimes of heating and cooling, the processing and distribution of food, and even the metaphysics of electromagnetic infrastructure. Contributors reveal both the material grounding of urban social relations and the social life of material infrastructure. In the end, they show that infrastructure profoundly reshapes urban life, even as residents fight to reshape infrastructure to their own ends.
