**Archi.Pop** D. Medina Lasansky, 2014-11-20 Archi Pop explores the relationship of architecture and design to popular culture through a variety of case studies including television music film magazines and domestic interiors **Architecture as Communication** Ross A. Eaman, 2025-04-08 Media theory has long overlooked the built environment and its communicative capacity how built structures and spaces convey meaning through material embodiment and symbolization Architecture as Communication advances the idea that built environments function as media of communication Using practice theory in conjunction with the concept of style this book is anchored in three historical determinants the quest for perfect proportion in buildings the belief in architectural determinism and the ongoing efforts within other media to influence how those who experience built environments understand them Ross Eaman explores how houses schools places of worship factories office buildings stores malls opera houses plazas and parks have meaning for people as subjective life worlds Architecture as Communication proposes media theory that articulates the social construction of meaning as a unique way of understanding the built environment one in which the users and observers of structures and spaces participate along with architects and designers Architecture according to Eaman encompasses the multiplicity of communication as human interaction preparing people for what they are about to encounter signalling how they should act and selectively enabling them to perform their expected role Using examples across many historical periods and cultures Architecture as Communication argues that we judge our built environments by the values they communicate **Between Dream Houses and "God's Own Junkyard": Architecture and the Built Environment in American Suburban Fiction** Stefanie Strebel, 2021-06-28 The American suburb is a space dominated by architectural mass production sprawl as well as a monotonous aesthetic eclecticism and many critics argue that it has developed from a postwar utopia into a disorienting environment with which it is difficult to identify The typical suburb has come to display characteristics of an atopia that is a space without borders or even a non place a generic space of transience Dealing with the representation of architecture and the built environment in suburban literature and film from the 1920s until present this study demonstrates that in its fictional representations too suburbia has largely turned into a place of non architecture A lack of architectural ethos and an abundance of Junkspace define suburban narratives causing an increasing sense of disorientation and entropy in fictional characters *The Architecture of Survival* Erik Trump, Jake Parcell, 2023-09-05 The Architecture of Survival Setting and Politics in Apocalypse Films offers a compelling exploration of how popular films and TV series from the past two decades use architectural spaces to comment on socio political issues The authors harness varied theoretical perspectives to demonstrate how through set design these works suggest that certain kinds of architecture support human development community and freedom while other kinds separate us from our fellow humans and make democratic politics impossible The clean lines of modernist design serve in films such as Contagion and Ex Machina as a metaphor for the sanitized sterile politics that drive

disaster In The Walking Dead apocalypse survivors favor traditional architectural styles when rebuilding society a choice that symbolically affirms their democratic principles The massive walls and super gentrification as seen in Elysium and Army of the Dead divide humanity with those on one side wielding illegitimate power Empty streetscapes intensify loneliness alienation and the destruction of civil norms Smart cities offering a blend of high tech surveillance and big data erode social capital and community in Her and Transcendence The book concludes with a somewhat hopeful glimpse into architecture s potential to mitigate the catastrophic adverse effects of climate change as seen in films like Zootopia      **The Oxford**

Clucas,2019-01-23 Cultures as well as individuals continually balance the demands of nostalgia and sustainability as they construct historical narratives of futures worth preserving The aim of this volume is to explore those narratives and the underlying assumptions which inform them Drawing on a range of disciplines from the humanities and social sciences the chapters investigate cultural assumptions about which aspects of the past deserve to be remembered and which aspects of the present should be sustained for the future In the process they reveal how contemporary definitions of sustainability are informed by a nostalgic yearning for the past and how nostalgia is motivated by a reciprocal longing to sustain the past for the future      **Gods and Rollercoasters** Crispin Paine,2020-07-23 Religion parks Nostalgia religion and politics The motive for religion in theme parks Religion and escape to the exotic Theme parks as sacred places Authenticity heritage and religion Some theme park themes Religion and the imagineers pallet The religion park business The visitors      **Cold War Cities**
