## **Architecture Concepts Red Is Not A Color:**

*Architecture Concepts*, 2012      **Architectural Drawings as Investigating Devices** Marianna Charitonidou, 2023-07-10 *Architectural Drawings as Investigating Devices* explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries It traces their transformations paying special attention to Le Corbusier and Ludwig Mies van der Rohe's preference for perspective representation to the diagrams of Team 10 architects to the critiques of functionalism and the upgrade of the artefactual value of architectural drawings in Aldo Rossi John Hejduk Peter Eisenman and Oswald Mathias Ungers and finally to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture OMA Particular emphasis is placed on the spirit of truth and clarity in modernist architecture the relationship between the individual and the community in post war era architecture the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post autonomy era This book is based on extensive archival research in Canada the USA and Europe and will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics      **Architecture Concepts** Bernard Tschumi, 2012 *Philosophy and architecture* by Bernard Tschumi      **Drawing and Experiencing Architecture** Marianna Charitonidou, 2022-11-07 How were the concepts of the observer and user in architecture and urban planning transformed throughout the 20th and 21st centuries Marianna Charitonidou explores how the mutations of the means of representation in architecture and urban planning relate to the significance of city's inhabitants She investigates Le Corbusier and Ludwig Mies van der Rohe's fascination with perspective Team Ten's interest in the humanisation of architecture and urbanism Constantinos Doxiadis and Adriano Olivetti's role in reshaping the relationship between politics and urban planning during the postwar years Giancarlo De Carlo's architecture of participation Aldo Rossi's design methods Denise Scott Brown's active socioplactics and Bernard Tschumi's conception praxis      Event-Cities 5 Bernard Tschumi, 2024-11-12 An essential resource on the work of Bernard Tschumi Architects with a focus on how concept context and program intersect with intuition in singular and unexpected ways *Event Cities 5* is the fifth and final volume in the MIT Press series documenting recent built and unbuilt projects by renowned architect Bernard Tschumi This volume expands on the theoretical preoccupations that have shaped Tschumi's work in practice and pedagogy In this volume Tschumi embarks on what he calls a poetics that addresses both the rational elaboration of work and the irrational eruption of inexplicable elements in architectural projects How do chance intuition and analogy among other elements intersect with the logical play of concept context and program to generate innovative and informed design Highlights of this volume include circular

building projects works with suspended gardens and floating rectangular masses superposed structures created via surrealist tactics an immense educational research complex in France that hovers between building and urban design a museum in China made from intersecting conic shapes and a project for a cultural center in Italy that is structured as an investigation into courtyards and facades The book features nearly 30 projects developed over the last fifteen years and highlights Tschumi's longstanding interest not only in producing conceptual clarity but in questioning architecture itself

**Is the Tehran Bazaar Dead? Foucault, Politics, and Architecture** Farzaneh Haghighi, 2018-10-01 To examine the political role of architecture this book presents an original engagement with the largest center of attraction in Tehran namely its bazaar Through a rigorous study it goes beyond the conventional sociopolitical and architectural discourses of this marketplace by considering architecture as an event This book offers alternative modes of spatial thinking on a micropolitical level Emphasis is placed on the focused exploration of key notions mainly drawn from the works of Michel Foucault It deploys effective methods and shows how philosophical concepts can be deployed as a tool to analyse the ways through which architecture transforms individuals through the act of exchange whether of words things bodies or thoughts **Global Perspectives on Critical Architecture** Gevork Hartoonian, 2016-03-03 Judging from the debates taking place in both education and practice it appears that architecture is deeply in crisis New design and production techniques together with the globalization of capital and even skilled labour have reduced architecture to a commodified object its aesthetic qualities tapping into the current pervasive desire for the spectacular These developments have changed the architect's role in the design and production processes of architecture Moreover critical architectural theories including those of Breton Heidegger and Benjamin which explored the concepts of technology modernism labour and capital and how technology informed the cultural along with later theories from the 1960s which focused more on the architect's theorization of his/her own design strategies seem increasingly irrelevant In an age of digital reproduction and commodification these theoretical approaches need to be reassessed Bringing together essays and interviews from leading scholars such as Kenneth Frampton Peggy Deamer Bernard Tschumi Donald Kunze and Marco Biraghi this volume investigates and critically addresses various dimensions of the present crisis of architecture It poses questions such as Is architecture a conservative cultural product servicing a given producer-consumer system Should architecture's affiliative ties with capitalism be subjected to a measure of criticism that can be expanded to the entirety of the cultural realm Is architecture's infusion into the cultural the reason for the visibility of architecture today What room does the city leave for architecture beyond the present delirium of spectacle Should the thematic of various New Left criticisms of capitalism be taken as the premise of architectural criticism Or alternatively putting the notion of criticality aside is it enough to confine criticism to the production of insightful and pleasurable texts *Transgression* Louis Rice, David Littlefield, 2014-11-20 Transgression means to cross over borders disciplines practices professions and legislation This book explores how the transgression of boundaries produces new forms

of architecture education built environments and praxis Based on material from the 10th International Conference of the AHRA this volume presents contributions from academics practicing architects and artists activists from around the world to provide perspectives on emerging and transgressive architecture Divided into four key themes boundaries violations place and art practice it explores global processes transformative praxis and emerging trends in architectural production examining alternative and radical ways of practicing architecture and reimagining the profession The wide range of international contributors are drawn from subject areas such as architecture cultural geography urban studies sociology fine art film making photography and environmentalism and feature examples from regions such as the United States Europe and Asia At the forefront of exploring inter disciplinary and trans disciplinary research and practice Transgression will be key reading for students researchers and professionals with an interest in the changing nature of architectural and spatial disciplines **The Routledge Handbook of Architecture, Urban Space and Politics, Volume II** Nikolina

Bobic, Farzaneh Haghighi, 2024-11-22 Architecture and the urban are connected to challenges around violence security race and ideology spectacle and data The first volume of this handbook extensively explored these oppressive roles This second volume illustrates that escaping the corporatized and bureaucratized orders of power techno managerial and consumer oriented capitalist economic models is more urgent and necessary than ever before Herein lies the political role of architecture and urban space including the ways through which they can be transformed and alternative political realities constituted The volume explores the methods and spatial practices required to activate the political dimension and the possibility for alternative practices to operate in the existing oppressive systems while not being swallowed by these structures Fostering new political consciousness is explored in terms of the following themes Events and Dissidence Biopolitics Ethics and Desire Climate and Ecology Urban Commons and Social Participation Marginalities and Postcolonialism Volume II embraces engagement across disciplines and offers a wide range of projects and critical analyses across the so called Global North and South This multidisciplinary collection of 36 chapters provides the reader with an extensive resource of case studies and ways of thinking for architecture and urban space to become more emancipatory Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license *Dialogues between Psychoanalysis and Architecture* Christina

Moutsou, 2023-11-28 *Dialogues between Psychoanalysis and Architecture* explores the multisensory space of therapy real or virtual and how important it is in providing the container for the therapeutic relationship and process This book is highly original in bringing psychoanalysis and architecture together and highlighting how both disciplines strive to achieve transformation of our psychic space It brings together contributions that comprise three parts the first explores the space of the consulting room through the senses to examine issues such as smell and its link with memory and belonging hearing out the Other the psychoanalytic couch the medical therapy room and the so called sixth sense secondly the book questions how

the consulting room can represent or be redesigned to reflect the philosophy that underlies the therapy process foregrounding an architectural point of view and thirdly the book attends to the significance of the consulting room as a virtual space as it emerged during the pandemic of COVID 19 and beyond Architectural psychotherapeutic and interdisciplinary perspectives allow for an important new dimension on the psychological use of space and will appeal to psychoanalysts psychoanalytic and integrative psychotherapists art therapists students of psychotherapy as well as architects and designers

*A Study on the Concepts of Harmony Embodied in the Ancient Chinese Architecture* Ling Li, Jun Li, Kefeng Ji, 2024-10-31 This book explores the core concept of Chinese ancient architecture from a multidisciplinary perspective It aims to contribute to the development inheritance and protection of Chinese ancient architectural culture while also benefiting the sustainable development of modern architecture This book follows a main line of inquiry exploring the rich and harmonious ideas present in Chinese ancient architecture It combines the traditional Chinese culture and architectural ideas and examines the original thought that forms the foundation of the traditional Chinese architectural culture of harmony from various aspects Firstly the book describes the Taoist theory of the harmony between man and nature as expressed through different architectural elements Secondly it discusses the system of harmony among people influenced by Confucianism Lastly it explores the significance of Buddhism in Buddhist architecture Finally it also examines the difference in the embodiment of harmonious ideas between Chinese and Western architectures This book studies and analyzes the type and characteristics of Chinese

ancient architecture the architectural objects and the simple ecological environment views contained within the architectural concept It not only analyzes the historical development context but also provides physical examples of architectural types and explores the influence of regional environmental factors The target audience for this book includes scholars in universities and scientific research departments particularly those studying architectural aesthetics history and philosophy it is also suitable for the ordinary readers who have interest in Chinese traditional architectural culture Bare Architecture

Chris L. Smith, 2019-06-27 Bare Architecture a schizoanalysis is a poststructural exploration of the interface between architecture and the body Chris L Smith skilfully introduces and explains numerous concepts drawn from poststructural philosophy to explore the manner by which the architecture body relation may be rethought in the 21st century Multiple well known figures in the discourses of poststructuralism are invoked Gilles Deleuze and Félix Guattari Roland Barthes Georges Bataille Maurice Blanchot Jorge Luis Borges and Michel Serres These figures bring into view the philosophical frame in which the body is formulated Alongside the philosophy the architecture that Smith comes to refer to as bare architecture is explored Smith considers architecture as a complex construction and the book draws upon literature art and music to provide a critique of the limits extents and opportunities for architecture itself The book considers key works from the architects Douglas Darden Georges Pingusson Lacatan and Vassal Carlo Scarpa Peter Zumthor Marco Casagrande and Sami Rintala and Raumlabor Such works are engaged for their capacities to foster a rethinking of the relation between architecture and the body **Social Robots: Technological, Societal and Ethical Aspects of Human-Robot**

**Interaction** Oliver Korn, 2019-07-01 Social robots not only work with humans in collaborative workspaces we meet them in shopping malls and even more personal settings like health and care Does this imply they should become more human able to interpret and adequately respond to human emotions Do we want them to help elderly people Do we want them to support us when we are old ourselves Do we want them to just clean and keep things orderly or would we accept them helping us to go to the toilet or even feed us if we suffer from Parkinson's disease The answers to these questions differ from person to person They depend on cultural background personal experiences but probably most of all on the robot in question This book covers the phenomenon of social robots from the historic roots to today's best practices and future perspectives To achieve this we used a hands on interdisciplinary approach incorporating findings from computer scientists engineers designers psychologists doctors nurses historians and many more The book also covers a vast spectrum of applications from collaborative industrial work over education to sales Especially for developments with a high societal impact like robots in health and care settings the authors discuss not only technology design and usage but also ethical aspects Thus this book creates both a compendium and a guideline helping to navigate the design space for future developments in social robotics

**Ideas and Structures** Almantas Samalavicius, 2011-02-04 This book is a scholarly inquiry into several dimensions of culture exploring the close relationship between architecture and metaphysical ideas as well as religious and philosophical

concepts in each period of human history a relationship which has however been largely forgotten or neglected by modernity Rather than being a specialized account of any particular epoch it is an intellectual attempt to map out a general picture of how certain ideas have made their way into architectural structures or shaped them in one or another way from classical Antiquity through the Middle Ages and the Renaissance to the present The four essays it contains focusing on light water color and sound in architecture are written by an author who is a historian and critic of architecture as well as literary scholar who firmly believes in the value of discussing these issues from the perspective of the history of ideas The author is conscious about the limits of any generalizations but he believes that architecture should be studied not only as an art in its own right but as something larger enveloping many layers of culture and reflecting the bonds between human thinking and the practice of the art of building

*Balkanization and Global Politics* Nikolina Bobic, 2019-03-25 Balkanization territorial fragmentation is becoming a significant urban and geopolitical pursuit in contemporary times Countries cities and regions are ever increasingly voicing the desire for independence and balkanization from the nation or union they are a part of This monograph generally maps the historical and theoretical emergence of balkanization as well its more recent spread into fields as far ranging as law medicine data and security studies sociology architecture and the urban The spatialization of balkanization is particularly addressed in terms of destruction and renewal through a detailed sociopolitical interrogation of architecture and the urban including their changing symbolic ideological and functional forms The spatial connections between balkanization violent remaking destruction and renewal and global politics have predominantly been analyzed via the former Yugoslav context and the Balkans however spotlight has also been directed to the current political climate of the UK Australia and the Anglo Saxon geopolitics The analysis helps in understanding broader emergent patterns of sociospatial polarization across various scales and in respect to global geoeconomic and geopolitical restructuring This is particularly important because drawing connections between balkanization economics law media and technology is to gain an awareness of and engagement with the emerging implications of spatial remaking and global politics This monograph is a valuable resource and will be relevant to academics and students interested in spatial politics including architecture urbanism geography sociology politics international development conflict and cultural studies
