Information Structure and Sentence Form Knud Lambrecht, 1996-11-13 Why do speakers of all languages use different grammatical structures under different communicative circumstances to express the same idea Professor Lambrecht explores the relationship between the structure of the sentence and the linguistic and extra linguistic context in which it is used His analysis is based on the observation that the structure of a sentence reflects a speaker s assumption about the hearer s state of knowledge and consciousness at the time of the utterance This relationship between speaker assumptions and formal sentence structure is governed by rules and conventions of grammar in a component called information structure Four independent but interrelated categories are analysed presupposition and assertion identifiability and activation topic and focus

The Psycholinguistics of Bilingualism François Grosjean,Ping Li,2013-01-09 The Psycholinguistics of Bilingualism presents a comprehensive introduction to the foundations of bilingualism covering language processing language acquisition cognition and the bilingual brain This thorough introduction to the psycholinguistics of bilingualism is accessible to non specialists with little previous exposure to the field Introduces students to the methodological approaches currently employed in the field including observation experimentation verbal and computational modelling and brain imaging Examines spoken and written language processing simultaneous and successive language acquisition bilingual memory and cognitive effects and neurolinguistic and neuro computational models of the bilingual brain Written in an accessible style by two of the field s leading researchers together with contributions from internationally renowned scholars Featuring chapter by chapter research questions this is an essential resource for those seeking insights into the bilingual mind and our current knowledge of the cognitive basis of bilingualism

The Study of Bilingual Language Processing Nan Jiang,2023-03-15 This book offers a detailed account of the issues models and outcomes of research into the cognition of bilingualism The first chapter identifies the most important characteristics of this research and its historical developments before the main part of the book explores studies of four bilingual processing topics The first of these is lexico semantic representation and organization in bilinguals which deals with how words and meanings are represented and connected in the bilingual mind The second cross language priming explores the bilingual lexicon by examining how exposure to words in one language may affect word recognition in another and leads to the discovery of an asymmetry in translation priming The third topic is selective lexical access in bilinguals which examines whether bilinguals can selectively activate one language while suppressing the other while the fourth is code switching focussing on language control and language regulation mechanisms in bilinguals The book concludes with a chapter that reviews research in three areas

beyond lexical processing autobiographical memory the representation and interaction of syntactic knowledge and the consequences of bilingualism The volume demonstrates the theoretical significance and real world practical implications of research into bilingual language processing and will be a valuable resource for seminars and courses from advanced undergraduate level upwards *Scientific and Technical Aerospace Reports* ,1983 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **Chinese Lexical Semantics** Qin Lu,Hong Gao,2016-01-11 This book constitutes the thoroughly refereed post workshop proceedings of the 16th Chinese Lexical Semantics Workshop CLSW 2015 held in Beijing China in May 2015 The 64 regular and 4 short papers included in this volume were carefully reviewed and selected from 248 submissions They are organized in topical sections named lexical semantics lexical resources lexicology natural language processing and applications and syntax *Consciousness and Action Control* T. Andrew Poehlman,Ezequiel Morsella,2014-11-03 The basic nuts and bolts underlying human behavior remain mysterious from a scientific point of view Everyday acts naming an object suppressing the urge to say something or grabbing a waiter s attention with a cappuccino please remain difficult to understand from a mechanistic standpoint Despite these challenges research has begun to illuminate not only the basic processes underlying human action production but the role of conscious processing in the control of behavior This Research Topic Consciousness and the Control of Action is devoted to surveying and synthesizing these developments from disparate fields of study *Nuclear Science Abstracts* ,1975 [Sociolinguistics / Soziolinguistik. Volume 2](#) Ulrich Ammon,Norbert Dittmar,Klaus J. Mattheier,Peter Trudgill,2008-07-14 No detailed description available for SOCIOLINGUISTICS AMMON 2 TLBD HSK 3 2 2A E BOOK **Evolutionary Syntax** Ljiljana Progovac,2015 In this book Ljiljana Progovac proposes a gradualist adaptationist approach to the evolution of syntax subject to natural selection She provides a specific framework for its study combining the fields of evolutionary biology theoretical syntax typology neuroscience and genetics The author pursues an internal reconstruction of the stages of grammar based on the syntactic theory associated with Chomskyan Minimalism and arrives at specific testable hypotheses which are then corroborated by an abundance of theoretically analysed living fossils drawn from a variety of languages Her approach demonstrates that these fossil structures do not just coexist alongside more modern structures but are in fact built into the very foundation of more complex structures leading to quirks and complexities that are suggestive of a gradualist evolutionary scenario By reconstructing a particular path along which syntax evolved Evolutionary Syntax sheds light on the crucial properties of language design itself as well as on the major parameters of crosslinguistic variation As a result this reconstruction can be meaningfully correlated with both the hominin timeline and the ever growing body of genetic evidence that is available
