Models of Religious

Freedom Marcel Stüssi, 2012 In this thesis the US Swiss and Syrian models of religious freedom are illustrated in legal settings The Analytical Representation comprises more than statements of positive law or mechanical comparison Each chapter is introduced by thought forms predominant in the respective legal culture The objective of the Methodological Representation is to investigate the logic and legitimate pattern by which the US and Swiss judiciary come to the conclusion that an alleged interference is covered under the right to religious freedom The last dimension which is the Eclectic Representation pursues a dual aim Firstly the idea is to develop an actual guideline of religious freedom rules and secondly to evaluate how much religious freedom is internalized in the US Swiss and Syrian legal systems Dissertation Series ReligionsRecht im Dialog Vol 12
