Cognition and Interaction: From Computers to Smart Objects and Autonomous Agents Amon Rapp, Maurizio Tirassa, Tom Ziemke, 2019-10-10 Cognitive sciences have been involved under numerous accounts to explain how humans interact with technology as well as to design technological instruments tailored to human needs As technological advancements in fields like wearable and ubiquitous computing virtual reality robotics and artificial intelligence are presenting novel modalities for interacting with technology there are opportunities for deepening exploring and even rethinking the theoretical foundations of human technology use This volume entitled Cognition and Interaction From Computers to Smart Objects and Autonomous Agents is a collection of articles on the impacts that novel 3 September Frontiers in Psychology 2019 Cognition and Interaction interactive technologies are producing on individuals It puts together 17 works spanning from research on social cognition in human robot interaction to studies on neural changes triggered by Internet use that tackle relevant technological and theoretical issues in human computer interaction encouraging us to rethink how we conceptualize technology its use and development The volume addresses fundamental issues at different levels The first part revolves around the biological impacts that technologies are producing on our bodies and brains The second part focuses on the psychological level exploring how our psychological characteristics may affect the way we use understand and perceive technology as well as how technology is changing our cognition The third part addresses relevant theoretical problems presenting reflections that aim to reframe how we conceptualize ourselves technology and interaction itself Finally the last part of the volume pays attention to the factors involved in the design of technological artifacts

providing suggestions on how we can develop novel technologies closer to human needs Overall it appears that human computer interaction will have to face a variety of challenges to account for the rapid changes we are witnessing in the current technology landscape

The Early Information Society Alistair Black,Dave Muddiman,2016-03-23 Whether termed the network society the knowledge society or the information society it is widely accepted that a new age has dawned unveiled by powerful computer and communication technologies Yet for millennia humans have been recording knowledge and culture engaging in the dissemination and preservation of information In The Early Information Society the authors argue for an earlier incarnation of the information age focusing upon the period 1900 1960 In support of this they examine the history and traditions in Britain of two separate but related information rich occupations information management and information science repositioning their origins before the age of the computer and identifying the forces driving their early development The Early Information Society offers an historical account which questions the novelty of the current information society It will be essential reading for students researchers and practitioners in the library and information science field and for sociologists and historians interested in the information society
