A History of Greek Philosophy: Volume 6, Aristotle: An Encounter W. K. C. Guthrie, William Keith Chambers

Guthrie, 1990-03-29 All volumes of Professor Guthrie's great history of Greek philosophy have won their due acclaim. The most striking merits of Guthrie's work are his mastery of a tremendous range of ancient literature and modern scholarship, his fairness and balance of judgement, and the lucidity and precision of his English prose. He has achieved clarity and comprehensiveness. **A history of Greek philosophy. 6. Aristotle : an encounter** William Keith Chambers Guthrie, 1990

Worshipping a Crucified Man Jeremy Hudson, 2021-01-01 By the mid second century Christian writers were engaging in debates with educated audiences from non Jewish Graeco Roman cultural backgrounds. A remarkable feature of some of the texts from this period is how extensively they refer to the Jewish scriptures even though those scriptures were unfamiliar to non Jewish Graeco Romans. In *Worshipping a Crucified Man* Jeremy Hudson explores for the first time why this should have been so by examining three works by Christian converts originally educated in Graeco Roman traditions: Justin Martyr's First Apology, Tatian's Oratio, and Theophilus of Antioch's Ad Autolycum. Hudson considers their literary strategies, their use of quotations and allusions, and how they present the Jewish scriptures all against the background of the Graeco Roman literary culture familiar to both authors and audiences. The scriptures are presented as a critically defining feature of Christianity instrumental in shaping the way the new religion presented itself as it strove to engage with and challenge the cultural traditions of the Graeco Roman world. **A Dialectical Journey through Fashion and Philosophy** Eun Jung

Kang, 2020-01-01 This book takes an in depth look at the integration of fashion and philosophy. It challenges the deeply rooted prejudice or misconception that fashion is a field limited to body oriented and appearance related themes and practices. It also reveals that fashion is intermeshed with distinctively modern issues that belong to the realm of the mind as well as the body. In doing so it refashions philosophy and philosophizes fashion which ultimately amount to the same thing. The book argues that while the philosophization of fashion can give a clearer understanding of some esoteric areas of philosophy and fashion's close connection to modern societies and politics, it also shows that philosophy can assist in redeeming fashion from the objective bodily world, positioning it as an indispensable part of the humanities. This is because fashion manifests critical aspects of human culture in our time and is an expression of the zeitgeist which is interwoven with the unfolding of history. This book will be highly relevant to students and researchers in fashion studies who are looking for the theoretical underpinnings and insights for their own work. It will also be of keen interest to scholars in the field of philosophy who are seeking to apply philosophical concepts to both everyday life and our empirical world. The Oxford Handbook of Aristotle Christopher Shields, 2012-08-16 This book reflects the lively international character of Aristotelian studies, drawing contributors from Europe, North America, and Asia. It also reflects the broad range of activity Aristotelian studies comprise today, informed by cutting edge philological research and focusing as its core activity on textual exegesis and philosophical

criticism **Theistic Evolution** Mariusz Tabaczek, 2023-11-02 In this book Mariusz Tabaczek develops a contemporary reimagined proposal of an Aristotelian Thomistic perspective on theistic evolution Deeply rooted in classical philosophy and theology the volume combines careful textual analysis of ancient medieval and contemporary literature with innovative original and constructive argumentation and modelling Tabaczek offers a wide ranging set of arguments on behalf of those who advocate for the relevance of classical philosophical and theological thought in the context of contemporary science and the dialogue between science and religion Avoiding simplistic answers to complex questions concerning the origin of species including the human species his book inspires critical thinking and a systematic approach to all major philosophical presuppositions and both philosophical and theological repercussions of the theory of evolution Without contradicting or abandoning the letter of the tradition Tabaczek echoes the spirit of Aristotle's and Aquinas's philosophy and theology moving them forward to embrace the evolutionary aspect of the contemporary view of reality Studies in Ancient Greek Philosophy D. M. Spitzer, 2023-03-24 Spanning a wide range of texts figures and traditions from the ancient Mediterranean world this volume gathers far reaching interdisciplinary papers on Greek philosophy from an international group of scholars The book's 16 chapters address an array of topics and themes extending from the formation of philosophy from its first stirrings in archaic Greek as well as Egyptian Persian Mesopotamian and Indian sources through central concepts in ancient Greek philosophy and literatures of the classical period and into the Hellenistic age Studies in Ancient Greek Philosophy offers both in depth rigorous attentive investigations of canonical texts in Western philosophy such as Plato's *Phaedo* *Gorgias* *Republic* *Phaedrus* *Protagoras* and the *Metaphysics* *De Caelo* *Nicomachean Ethics* *Generation and Corruption* of Aristotle's corpus as well as inquiries that reach back into the rich archives of the Mediterranean Basin and forward into the traditions of classical philosophy beyond the ancient world Studies in Ancient Greek Philosophy is of interest to students and scholars working on different aspects of ancient Greek philosophy as well as ancient philosophy more broadly Aristotle on Method and Metaphysics E. Feser, 2013-07-12 Aristotle on Method and Metaphysics is a collection of new and cutting edge essays by prominent Aristotle scholars and Aristotelian philosophers on themes in ontology causation modality essentialism the metaphysics of life natural theology and scientific and philosophical methodology *Elegy for Theory* D. N. Rodowick, 2014-01-06 Rhetorically charged debates over theory have divided scholars of the humanities for decades In *Elegy for Theory* D N Rodowick steps back from well rehearsed arguments pro and con to assess why theory has become such a deeply contested concept Far from lobbying for a return to the high theory of the 1970s and 1980s he calls for a vigorous dialogue on what should constitute a new ethically inflected philosophy of the humanities Rodowick develops an ambitiously cross disciplinary critique of theory as an academic discourse tracing its historical displacements from ancient concepts of *theoria* through late modern concepts of the aesthetic and into the twentieth century The genealogy of theory he argues is constituted by two main lines of descent one that goes back to philosophy and the other rooted instead in the history of

positivism and the rise of the empirical sciences Giving literature philosophy and aesthetics their due Rodowick asserts that the mid twentieth century rise of theory within the academy cannot be understood apart from the emergence of cinema and visual studies To ask the question What is cinema is to also open up in new ways the broader question of what is art *The Interval* Rebecca Hill,2014-11-14 The Interval offers the first sustained analysis of the concept grounding Irigaray s thought the constitutive yet incalculable interval of sexual difference In an extension of Irigaray s project Hill takes up her formulation of the interval as a way of rereading Aristotle s concept of topos and Bergson s concept of duration Hill diagnoses a sexed hierarchy at the heart of Aristotle s and Bergson s presentations Yet beyond that phallocentrism she points out how Aristotle s theory of topos as a sensible relation between two bodies that differ in being and Bergson s intuition of duration as an incalculable threshold of becoming are indispensable to the feminist effort to think about sexual difference Reading Irigaray with Aristotle and Bergson Hill argues that the interval cannot be grasped as a space between two identities it must be characterized as the sensible threshold of becoming constitutive of the very identity of beings The interval is the place of the possibility of sexed subjectivity and intersubjectivity the interval is also a threshold of the becoming of sexed forces

Metaphysics in the Age of Scientific Hegemony Jürgen Lawrenz,2023-08-24 This book consists of a series of essays which concern themselves with the persisting relevance of metaphysical speculation in our time It delves into Hegel s politics the ethics of Confucius and Aristotle the research of Leibniz with its astonishing anticipations of modern ideas Wittgenstein s reflections on language the meaning of music and art and a capital instance of a failed enquiry into life and mind from a scientific point of view In all these instances the focus is on the autonomous agency of the human being Metaphysics as a philosophical discipline has long been under fire for its doctrinal presumptions but never more so than under the hegemony of science Yet as the essays in this volume demonstrate it remains an indispensable tool for thinkers in all areas of research in which the human creature is under the spotlight That this involves a reversal of competences has not been seriously accepted predominantly in terms of the gulf between autonomous agency and the mechanistic doxa under which science is compelled to operate This volume seeks to put the torch on these discrepancies where presuppositions end and understanding must take over Graceful reason Lloyd P. Gerson,2024-10-07 *Achilles Tatius: Leucippe and*

Clitophon Books I-II Achilles Tatius,2020-06-11 The first modern commentary in English on this most sophisticated and brilliant of ancient Greek novels With its freewheeling plotline its setting on the edge of the Greek world its ironic play with the reader s expectations and its sallies into obscenity it will appeal strongly to students and instructors Emotions across Cultures David Konstan,2022-06-21 It is now recognized that emotions have a history In this book eleven scholars examine a variety of emotions in ancient China and classical Greece in their historical and social context A general introduction presents the major issues in the analysis of emotions across cultures and over time in a given tradition Subsequent chapters consider how specific emotions evolve and change For example whereas for early Chinese thinkers worry was a moral defect

it was later celebrated as a sign that one took responsibility for things In ancient Greece hope did not always focus on a positive outcome and in this respect differed from what we call hope Daring not to do or undaring was itself an emotional value in early China While Aristotle regarded the inability to feel anger as servile the Roman Stoic Seneca rejected anger entirely Hatred and revenge were encouraged at one moment in China and repressed at another Ancient Greek responses to tragedy do not map directly onto modern emotional registers and yet are similar to classical Chinese and Indian descriptions There are differences in the very way emotions are conceived This book will speak to anyone interested in the many ways that human beings feel

Aristotle: Semantics and Ontology L.M. de Rijk, 2016-06-21 This study intends to show that the ascription of many shortcomings or obscurities to Aristotle is due to the persistent misinterpretation of key notions in his works including anachronistic perceptions of statement making In the first volume Aristotle's semantics is culled from the *Organon* The second volume presents Aristotle's ontology of the sublunar world and pays special attention to his strategy of argument in light of his semantic views The reconstruction of the semantic models that come forward as genuinely Aristotelian can give a new impetus to the study of Aristotelian philosophic and semantic thought

The Dynamics of Aristotelian Natural Philosophy from Antiquity to the Seventeenth Century, 2021-08-04 This book explores the dynamics of the commentary and textbook traditions in Aristotelian natural philosophy under the headings of doctrine method and scientific and social status It enquires what the evolution of the Aristotelian commentary tradition can tell us about the character of natural philosophy as a pedagogical tool as a scientific enterprise and as a background to modern scientific thought In a unique attempt to cut old fashioned historiographic divisions it brings together scholars of ancient medieval Renaissance and seventeenth century philosophy The book covers a remarkably broad range of topics it starts with the first Greek commentators and ends with Leibniz

History of Political Thought, 1999 *History of Universities* Mordechai Feingold, 2017-08-03 This double issue of *History of Universities* Volume XXX 1 2 contains the customary mix of learned articles and book reviews which makes this publication such an indispensable tool for the historian of higher education The volume is as always a lively combination of original research and invaluable reference material

Aristotle's Ethics in the Italian Renaissance (ca. 1300-1650) David Lines, 2022-07-04 This volume studies the teaching of Aristotle's Nichomachean Ethics the standard textbook for moral philosophy in the universities of Renaissance Italy Special attention is given to how university commentaries on the Ethics reflect developments in educational theory and practice and in humanist Aristotelianism After surveying the fortune of the Ethics in the Latin West to 1650 and the work's place in the universities the discussion turns to Italian interpretations of the Ethics up to 1500 Part Two and then from 1500 to 1650 Part Three The focus is on the universities of Florence Pisa Padua Bologna and Rome including the Collegio Romano Five substantial appendices document the institutional context of moral philosophy and the Latin interpretations of the Ethics during the Italian Renaissance Largely based on archival and unpublished sources this study provides striking evidence for the continuing

vitality of university Aristotelianism and for its fruitful interaction with humanism on the eve of the early modern era

From Aristotle to Augustine David Furley, 2016-08-01 This second volume opens with Aristotle's immense influence on philosophy from the beginnings of Christian philosophy in the fifth century AD
