The Boy Who Played with Fusion Tom Clynes,2015-06-09 This story of a child prodigy and his unique upbringing is an engrossing journey to the outer realms of science and parenting Paul Greenberg author of Four Fish A PEN E O Wilson Literary Science Writing Award Finalist Like many young children Taylor Wilson dreamed of becoming an astronaut Only Wilson mastered the science of rocket propulsion by the age of nine When he was eleven he tried to cure his grandmother s cancer and discovered new ways to produce medical isotopes Then at fourteen Wilson became the youngest person in history to achieve nuclear fusion building a 500 million degree reactor in his parents garage In The Boy Who Played with Fusion science journalist Tom Clynes narrates Wilson s extraordinary story Born in Texarkana Arkansas Wilson quickly displayed an advanced intellect Recognizing their son s abilities and the limitations of their local schools his parents took a bold leap and moved the family to Reno Nevada There Wilson could attend a unique public high school created specifically for academic superstars Wilson is now designing devices to prevent terrorists from shipping radioactive material and inspiring a new generation to take on the challenges of science If you re wondering how someone so young can achieve so much The Boy Who Played with Fusion has the answer Along the way Clynes narrative teaches parents teachers and society how and why we urgently need to support high achieving kids An essential contribution to our understanding of the most important underlying questions about the development of giftedness talent creativity and intelligence Psychology Today A compelling study of the thrills and burdens of being born with an alpha intellect Financial Times Unsafe Shigeo Atsuji,2016-11-15 This is the first book to examine the linkages among natural and organizational accidents and disasters in the modern era

and clarifies the mechanisms involved and the significance of emerging problems from the aging of vital infrastructure for the supply of water gas oil and electricity to the breakdown of pensions healthcare and other social systems The book demonstrates how we might check the underlying civilizational collapse and then explore translational systems approaches toward resilient management and policy for sustainability In *Unsafety* the author focuses on the kinds of unnatural disasters and organizational accidents that arise as repercussions of natural hazards Japan serves as an example where earthquakes tsunamis and typhoons are common with the Fukushima nuclear disaster as an outstanding case of this link between natural disasters and organizational accidents Natural and human made disasters happen worldwide and cause misery through loss of life destruction of livelihoods as in agriculture fisheries and the manufacturing industry and interruption of urban life *Unsafety* from a disaster in one place increases uncertainty elsewhere presenting urgent issues in all nations for individuals organizations regions and the state The author explains that one factor in the Fukushima catastrophe which followed in the wake of the earthquake and tsunami in 2011 was the latent deterioration and aging of systems at all levels from the physical to the social leading through a chain reaction to unsought and unforeseen consequences Here the aging of the nuclear reactor system the breakdown of safety management and inappropriate instructions from the regulatory authorities combined to create the three fold disaster in which technological organizational and governmental dysfunction have been diagnosed as reflecting a systems pathology infecting all levels

Meltdown Joel Levy, 2024-06-01 *Meltdown* investigates and recreates the dramatic events behind the most notorious nuclear accidents in history as well as those shrouded in secrecy Combining human tragedy with intriguing science each account reveals new aspects of humanity's complex relationship with nuclear power and the ongoing struggle to harness and control it From the pioneers of Los Alamos who got up close and personal with the cores of atomic bombs to the hapless engineers in Soviet fuel processing plants who unwittingly mixed up a disaster in a bucket and from the terrifying impact of a tsunami at Fukushima to the mystery of the recent Russian incident *Meltdown* explores the past and future of this extraordinary and potentially lethal source of infinite power

Life and Death Rays Alan Perkins, 2021-07-05 This unique book provides an accessible introduction to both the scientific background and the key people involved in the discovery and use of radiation and radioactivity It begins by providing a short history of radiation exposures and radiation poisoning from the early inappropriate use of X rays and radium cures through the misadventures of the Manhattan Project and the Chernobyl disaster to the high profile and deliberate poisoning of Alexander Litvinenko in London with polonium 210 which gave rise to worldwide media attention The chapters provide a catalogue of deliberate criminal acts unfortunate accidents and inadvertent radiation exposures exploring well known events in detail as well as some not so well known occurrences It works through the topics by focusing on human stories and events and their biological impact In addition it covers descriptions of the beneficial uses of radiation and radioactivity This book can be enjoyed by any reader with a general interest in science as well as by students and

professionals within the scientific and medical communities Key features Authored by a subject area specialist who has worked in both clinical practice and academia and was involved with the national media following incidents of national and international importance Provides a unique human perspective into well known and some lesser known events and a concise history of the discovery of radiation and the events that followed Adds scientific and medical background to a subject of high media interest
