The Somatic Chromosomes of the Mongolian Gerbil (*Meriones Unguiculatus*) Steven P. Pakes,1969 A study was initiated to characterize the somatic chromosomes of the Mongolian gerbil *Meriones unguiculatus* prior to conducting experiments concerned with the effects of various environmental factors encountered in space flight on mammalian chromosomes From the study of bone marrow cells after intraperitoneal injection of colchicine it was determined that the diploid number of chromosomes for the Mongolian gerbil is 44 The karyotype was conducted by arranging the chromosomes into four distinct groups and includes 32 meta or submetacentric and 10 acrocentric autosomal chromosomes The X element was identified as a large submetacentric chromosome and the Y element as a medium sized submetacentric chromosome Author *Devotions of A Gerbil* Traci Stead,2014-01-31 Sometimes I think I am a gerbil in dog s clothing I believe I am a dog I am desired longed for patiently waited for and loved At least I can tell myself that but perhaps I am a gerbil not really wanted a replacement fun for a while but sure to be returned Then God comes along Do you ever feel like a stray dog alone and frightened cowering in the cold corner of an animal shelter God scoops us up into his arms and carries us home from the shelter He washes us and gives us a name But life with the Master is new and difficult The Master s new rules sometimes make us look through the fence slats of His kingdom We dig holes and crawl back into the world God continues to whistle from his porch even while we chase cars and cats and dig through the neighbors trash Eventually we have to decide if we will leave our doggy lives behind and enjoy a relationship with the Master
