Rise of Automation Adidas Wilson, You probably have an idea how robots will affect human workers negatively Chief

players in the tech world like Bill Gates and Elon Musk have provided their solutions universal basic income or robot tax But amidst the serious warnings and the utter sci fi utopias the human pain that will follow future job loss seems to be forgotten 15 years or so from now the US economy will lose 38% of its jobs to automation This rate is alarming And yet many people maintain that automation should not and cannot slow down However what if the progress is decelerated a little Just enough to match the slow fashion and slow food trends maybe At the very least people should rethink the ownership of autonomous trucks Robotization would not be that bad if truck drivers owned the automatic trucks instead of having a corporation own them all In the meantime robotization is a real threat and poses a danger to crucial human infrastructure
