with work in other arts and media Others seek to analyze how Anglo American and European models were inflected in a different temporal frame and in quite distinct geographical contexts The Handbook is divided into six sections in order to reflect changed critical perspectives upon modernism s formal innovation and experiment to foreground the relation of literature and the other arts and to understand these in appropriate intellectual social and geocultural settings The received canon is therefore revisited and made new as the varying aspects of metropolitan regional national and transnational modernisms come into view
