A History of Seafaring Based on Underwater Archaeology George F. Bass, 1974      A History of seafaring George F. Bass, 1972      **A History of Seafaring** George F. Bass, 1972      A Maritime Archaeology of Ships J. R. Adams, 2013-12-11 In the last fifty years the investigation of maritime archaeological sites in the sea in the coastal zone and in their interconnecting locales has emerged as one of archaeology's most dynamic and fast developing fields No longer a niche interest maritime archaeology is recognised as having central relevance in the integrated study of the human past Within maritime archaeology the study of watercraft has been understandably prominent and yet their potential is far from exhausted In this book Jon Adams evaluates key episodes of technical change in the ways that ships were conceived designed built used and disposed of As technological puzzles they have long confounded explanation but when viewed in the context of the societies in which they were created mysteries begin to dissolve Shipbuilding is social practice and as one of the most complex artefacts made changes in their technology provide a lens through which to view the ideologies strategies and agency of social change Adams argues that the harnessing of shipbuilding was one of the ways in which medieval society became modern and while the primary case studies are historical he also demonstrates that the relationships between ships and society have key implications for our understanding of prehistory in which seafaring and communication had similarly profound effects on the tide of human affairs      **Maritime Archaeology** Keith Muckelroy, 1978 Maritime archaeology the scientific investigation of the relics of past ships and seafaring has come into being as a distinctive sub discipline of archaeology only since the wartime invention of the aqualung Keith Muckleroy sets out to define maritime archaeology highlighting on the one hand factors that are unique to working under water and on the other problems of interpretation and method that are shared with its parent discipline archaeology      **The Oxford Handbook of Maritime Archaeology** Alexis Catsambis, Ben Ford, Donny L. Hamilton, 2014-02 This title is a comprehensive survey of maritime archaeology as seen through the eyes of nearly fifty scholars at a time when maritime archaeology has established itself as a mature branch of archaeology      **Reconstructing a Maritime Past** Matthew Harpster, 2022-12-30 Reconstructing a Maritime Past argues that rather than applying geo ethnic labels to shipwrecks to describe Greek or Roman seafaring a more intriguing alternative emphasizes a maritime culture's valorization of the Mediterranean Sea Doing so creates new questions and research agendas to understand the past human relationship with the sea This study makes this argument in three sections Chapters 1 and 2 contrasting intellectual histories of maritime archaeological interpretive approaches common in Northern Europe and the Mediterranean propose that the former perspective which embodies contemporary and fluid perceptions of culture is a better theoretical framework for future research Chapters 3 5 re interpret the corpus of submerged sites in the Mediterranean Sea with this approach arguing that this dataset does not represent Phoenician Muslim or Byzantine seafaring but the practices of a maritime culture Key to this section is the author's method that utilizes superimposed polygons to model patterns of

maritime activity generating centennial results at different scales Having built the models of a maritime culture s valorization of the Mediterranean Sea Chapter 6 contains the first comparisons of these models to other datasets questioning the relevance of textual media to understand maritime activity while finding closer analogues with other archaeological corpora By deconstructing interpretive methods in maritime archaeology offering a new synthesizing interpretive approach that is scalable and decoupled from past perceptions and critically examining the applicability of various media to illuminate the past maritime experience this book will appeal to scholars at various stages of their careers Maritime Archaeology Lawrence E. Babits,Hans Van Tilburg,2013-11-11 This volume initiates a new series of books on maritime or underwater archaeology and as the editor of the series I welcome its appearance with great excitement It is appropriate that the first book of the series is a collection of articles intended for graduate or undergraduate courses in underwater archaeology since the growth in academic opportunities for students is an important sign of the vitality of this subdiscipline The layman will enjoy the book as well Academic and public interest in shipwrecks and other submerged archaeological sites is indicated by a number of factors Every year there are 80 to 90 research papers presented at the Society for Historical Archaeology s Conference on Historical and Underwater Archaeology and the Proceedings are published Public interest is shown by extensive press coverage of shipwreck investigations One of the most important advances in recent years has been the passage of the Abandoned Shipwreck Act of 1987 for the first time providing national level law concerning underwater archeological sites The legislation has withstood a number of legal challenges by commercial treasure salvors a very hopeful sign for the long term preservation of this nonrenewable type of cultural resource The underwater archaeological discoveries of 1995 were particularly noteworthy The Texas Historical Commission discovered the Belle one of La Salle s ships and the CSS Hunley was found by a joint project of South Carolina and a private nonprofit organization called NUMA

**Seafaring in the Arabian Gulf and Oman** Dionisius A. Agius,2012-12-06 This book is a study of the seafaring communities of the Arabian Gulf and Oman in the past 150 years It analyses the significance of the dhow and how coastal communities interacted throughout their long tradition of seafaring In addition to archival material the work is based on extensive field research in which the voices of seamen were recorded in over 200 interviews The book provides an integrated study of dhow activity in the area concerned and examines the consciousness of belonging to the wider culture of the Indian ocean as it is expressed in boat building traditions navigational techniques crew organisation and port towns People of the Dhow brings together the different measures of time past the sea its people and their material culture The Arabian Gulf and Oman have traditionally shared a common destiny within the Western Indian Ocean The seasonal monsoonal winds were fundamental to the physical and human unities of the seafaring communities producing a way of life in harmony with the natural world a world which was abruptly changed with the discovery of oil What remains is memories of a seafaring past a history of traditions and customs recorded here in the recollections of a dying generation and in the rich artistic heritage of

the region     **The Roman Navy** Michael Pitassi, 2012-05-11 The Roman Navy was remarkable for its size reach and longevity As significant as the Royal Navy was to the British Empire in the nineteenth century the Roman Navy was crucial to the extraordinary expansion of Imperial power and for its maintenance over a period of more than 800 years The fabric and organisation of this maritime force is at the core of this new book At the height of its power the Roman Navy was at least in numerical terms the largest maritime force ever to have existed It employed tens of thousands of sailors and maintained and fought fleets of ships larger than any forces since In these pages the author looks at all the aspects of the Navy in turn Shipbuilding rigs and fittings and shipboard weaponry are covered as are all the principal ship from the earliest types to the very last The command structure is outlined as are all aspects of the crews lives their recruitment terms of service training and uniforms Life onboard food and drink discipline religion and superstition are described while seamanship and navigation are dealt with along with bases and shore establishments Operations feature prominently the allied and enemy navies compared and specimen battles employed to explain fighting tactics All these aspects changed and developed hugely over the great span of the Roman empire but this fascinating book brings this complex story together in one brilliant volume

*Admiralty and Maritime Laws in the Mediterranean Sea (ca. 800-1050)* Hassan Khalilieh, 2006-08-01 This is a comparative study dealing with the maritime practices which prevailed in the Byzantine and Islamic worlds around the Mediterranean from 7 10 centuries C E and consists of seven chapters The first chapter describes the physical and legal significance of the ship computation of capacity and the importance of naming commercial vessels Chapter Two examines issues of ownership and possession of a vessel the employment conditions of the crew and the passengers status on board ship Carriage of cargo by sea and forms of contracts liability of the lessor shipping fees and breach of contract are covered in Chapter Three Jettison average and contribution are treated in Chapter Four Chapter Five treats the laws of collision and the rules governing the salvage of jetsam are surveyed in Chapter Six The final chapter explains the legal differences between Byzantine and Islamic mercantile law and outlines the principles of the sea loan chreokoinonia and qirad     International Handbook of Historical Archaeology Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global

community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

**The Protection of the Underwater Cultural Heritage: An Emerging Objective of the Contemporary Law of the Sea** Anastasia Strati,2021-09-27 The marine environment is almost ideal for the preservation of artefacts and until relatively recently it also provided complete protection from destruction by man However the aqualung has made most shallow underwater sites accessible leading to widespread plundering Current deep sea bed technology now threatens deep water sites There is a need for immediate international action to preserve the man made environment alongside the natural one The enunciation of legal rules to protect the underwater cultural heritage is a complex issue involving a matrix of interests and laws both international and national
