A Long Hard Winter Cuckolded At The Antarctic Research Station:

Notes and Queries ,1855 *Notes and Queries: A Medium of Inter-Communication for Literary Men, Artists, Antiquaries, Genealogists, Etc* ,1855 The Men Remaining Steve Davies,2020-06-22 On an Antarctic research station an unpopular member of the wintering team dies shortly after mid winter At first it looks like an accident but soon some of the men start to suspect otherwise With at least four months of the winter remaining the Station Commander is unsure how to deal with their suspicions His main priority is the smooth running of the station and dealing with a potential murderer threatens to disrupt the social dynamics of the team Should he seek help from headquarters or suppress news to the outside As other members of the team slowly learn more the conflicting evidence points to more than one of the men The author spent over two years in Antarctica overwintering on two of the research stations run by the British Antarctic Survey He worked as a Field Assistant responsible for the safety of the scientists when travelling away from the station His experiences and memories form the basis for this fictitious story of how potential personality clashes and unsuitable temperaments could disrupt the smooth running of an isolated community in a hostile environment **537 Days of Winter** David Knoff,2022-06-14 What would you do if you were stranded in the coldest place on earth as the world you knew back home changed forever As station leader at the Davis Research Station in Antarctica David Knoff was leading 24 expeditioners in a standard mission when the Covid 19 pandemic hit international travel came to a standstill and their ride home was cancelled indefinitely What was supposed to be a routine mission became a high pressure cauldron of uncertainty and anxiety where everyone was pushed to their mental limits They d have to draw on every ounce of resilience to ensure a safe return Facing unprecedented challenges including a complex medical evacuation and a fire on board the ship meant to get them out David would need all his experience as an infantry platoon commander and diplomat to keep the team safe and get them home albeit to a world that was changed forever **Cold** Wayne L. White,2022-09 Winter owns most of the year at the South Pole starting in mid February and ending in early November Total darkness lasts for months temperatures can drop below 100 degrees Fahrenheit and windchill can push temperatures to 140 degrees At those temperatures a person not protected with specialized clothing and an understanding of how to wear it would be reduced to an icicle within minutes Few people on the planet can say they know what it feels like to walk in the unworldly frigid winter darkness at the South Pole but Wayne L White can having walked several thousand miles and never missing a day outside during his stay regardless of the conditions As the winter site manager of the Amundsen Scott South Pole Station in Antarctica White was responsible for the selection training and health and safety of the forty two and forty six person crews Motivated by the determination and bravery of historical pioneers such as Roald Amundsen Robert Falcon Scott and Ernest Shackleton White honed his leadership skills to guide a diverse group of experienced and talented craftsmen scientists and artisans through three winters the longest term of any winter manager Despite hardships disasters and watching helpless as a global pandemic unfolded far beyond their

horizon his crews prevailed In Cold White documents his time in these extreme elements and offers a unique perspective on the United States Antarctic Program at the South Pole **The Longest Winter** Meredith Hooper,2010-10-14 Scott's Northern Party played an integral role in his iconic last expedition but how did they survive Through the eyes of the men involved Meredith Hooper recounts one of the greatest tales of adventure and endurance which has often been overshadowed by the tragedy which befell Scott Their tents were torn their food was nearly finished and the ship had failed to pick them up as planned Gale force winds blew bitter with the cold of approaching winter Stranded and desperate the six men of the Northern Party faced disaster Searching out a snow drift they burrowed inside Lieutenant Victor Campbell drew a line across the floor in the gloom to establish naval order three officers on one side the three seamen on the other A birthday was celebrated with a carefully hoarded biscuit and they sang hymns every Sunday so what kept these men going Circumstances forced them closer together their roles blurred and a shared sense of reality emerged This mutual suffering made them indivisible and somehow they made it through the longest winter To the south the men waiting at headquarters knew that the Polar Party must be dead and hoped that another six men would not be added to the death toll Working from expedition diaries journals and letters written by expedition members Meredith Hooper tells the intensely human story of Scott's other expedition *On the Ice* Gretchen Legler,2005 McMurdo Station Antarctica is home to eighty mile per hour winds minus seventy degree temperatures and months of near total darkness Sent to Antarctica as an observer Gretchen Legler tells the story of her season spent at McMurdo Station Populated by people from all walks of life bankers MBAs therapists carpenters scientists laborers and military brass the individuals that Legler meets have gone to Antarctica to escape everything from parking tickets to angry spouses Hoping to get away from the complexities of her own life Legler arrives at McMurdo Station with the intention of researching the landscape what she finds instead is a zany population of people Part sociological study part historiography and part love story *On the Ice* is an exploration of one of the most unexplored places on earth and the people who are drawn to it **BOOK JACKET** *Innocents on the Ice* John C.

Behrendt,2013-12-01 Adventures in the Antarctic only happen when someone makes a mistake From the Preface In 1956 John C Behrendt had just earned his master's degree in geophysics and obtained a position as an assistant seismologist in the International Geophysical Year glaciological program He sailed from Davisville Rhode Island to spend eighteen months in Antarctica with the IGY expedition as part of a U S Navy supported scientific expedition to establish Ellsworth Station on the Filchner Ice Shelf *Innocents on the Ice* is a memoir based on Behrendt's handwritten journals looking back on his daily entries describing his life and activities on the most isolated of the seven U S Antarctic stations Nine civilians and thirty Navy men lived beneath the snow together and intense personal conflicts arose during the dark Antarctic winter of 1957 Little outside contact was available to ease the tension with no mail delivery and only occasional radio contact with families back home The author describes the emotional stress of the living situation along with details of his parties explorations of the

Filchner Ronne Ice Shelf system during the summers of 1957 and 1958 Along the hazardous 1 300 mile traverse in two Sno Cats the field party measured ice thickness and snow accumulation as part of an international effort to determine the balance of the Antarctic ice sheet and made the first geological observations of the spectacular Dufek Massif in the then unexplored Pensacola Mountains Behrendt also draws upon his forty years of continual participation in Antarctic research to explain the changes in scientific activities and environmental awareness in Antarctica today Including photos maps and a glossary identifying various forms of ice Innocents on the Ice is a fascinating combination of the diary of a young graduate student and the reflections of the accomplished scientist he became *Human Adaptation to Isolated and Confined Environments: Preliminary Findings of a Seven Month Antarctic Winter-over Human Factors Study* Gary W. Evans,1988 This field study was conducted during the last decade of an austral winter over at Palmer Station in the Antarctic The purpose of the study was to understand temporal patterns in physiological arousal and psychological mood over the course of the mission The investigators were principally interested in how people adapted over time to chronic and acute stressors and how people use and modify their built environment The Ice Beneath My Feet Diana Patterson,2010 A riveting true adventure of a year in Antarctica from the first woman to lead an Antarctic research station Illustrated with 16 pages of colour photographs

537 Days of Winter David Knoff,2023-07-25 What would you do if you were stranded in the coldest place on earth as the world you knew back home changed forever As station leader at the Davis Research Station in Antarctica David Knoff was leading 24 expeditioners in a standard mission when the Covid 19 pandemic hit international travel came to a standstill and their ride home was cancelled indefinitely What was supposed to be a routine mission became a high pressure cauldron of uncertainty and anxiety where everyone was pushed to their mental limits They d have to draw on every ounce of resilience to ensure a safe return Facing unprecedented challenges including a complex medical evacuation and a fire on board the ship meant to get them out David would need all his experience as an infantry platoon commander and diplomat to keep the team safe and get them home albeit to a world that was changed forever 537 Days of Winter is a high octane sub zero story unlike any other in modern Antarctic history **Dark Winter** William Dietrich,2001 Geologist Jed Lewis finds himself accused of murder as the long winter sets in on the Amundsen Scott research base at the South Pole **LONGEST WINTER** Katherine Lambert,2004-09-17 In 1912 as the ill fated English explorer Captain Robert Falcon Scott was leading his team back from their race to the South Pole a six member scientific team was stranded several hundred miles to the north The Longest Winter is the definitive account of the men of the Northern Party their desperation and their heroic fight for survival in the Antarctic Their full story is told here for the first time Based on the unpublished diaries of the men Katherine Lambert has woven together an inspirational story of survival In particular she uses the detailed diary of the man who came to be the hero of the party Dr Murray Levick a naval surgeon His day to day entries offer a rare glimpse into the psychology of a group of relative strangers who must depend on each other for survival while suffering through subzero weather

starvation dysentery and mental breakdowns They lived in an igloo carved out of a snowdrift and survived on a small supply of seal blubber penguin meat biscuits and chocolate They attempted to keep their sanity by singing hymns and reading Charles Dickens s David Copperfield aloud After seven long months the group embarked on a grueling 37 day 230 mile journey to an unknown end yet all six men survived and made it back to base camp only to learn of the death of Captain Scott s polar party The Longest Winter is a gripping survival story of human fortitude in the face of almost certain death and ultimately a testament to the indomitable spirit of Dr Levick

BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **The Chilling** Riley James,2024 Keen to flee the wreckage of her marriage Australian scientist Kit Bitterfeld accepts a coveted winter research position at Macpherson Station in Antarctica On the way there Kit and her fellow researchers field a distress call from a nearby ship By the time they reach the vessel it is on fire and the crew has vanished A lone survivor is found but he can t remember who he is or what has happened They bring the survivor identified as geophysicist Nick Coltheart to Macpherson but it s clear that something is wrong More and more of Kit s colleagues are acting strangely And she can t shake the suspicion that Nick knows more than he s letting on With the winter darkness setting in Kit must figure out the truth before they are completely cut off from the outside world But is the danger lurking out on the ice or is it closer than she thinks

Sun at Midnight Rosie Thomas,2004 Alice Peel is a geologist She believes in observation thesis analysis and proof But now she stands along on the deck of a rickety Chilean ship Instead of the familiar measurable world everything that lies ahead of her is unknown and unpredictable Six weeks earlier Alice s life was comfortably unfolding in an Oxford summer Then with a suddenly broken relationship behind her she accepted an invitation to the end of the earth Antarctica James Rooker is a man on the run He s been running since his childhood in New Zealand Leaving women and homes behind he keeps moving Now there is nowhere further to go but the same small Antarctic research station Alice discovers a white and silver world lit by luminous sunlight Nothing has prepared her for the beauty of it or the claustrophobia of the tiny base shared with eight men and one other woman The isolation wipes out everyone s past and tension crackles in the air But there is a jolt of attraction between Alice and James that is like nothing she has ever known And it is in Antarctica that she discover something that will changes her life forever
