The Good Country Jon K. Lauck, 2022-11-21 At the center of American history is a hole a gap where some scholars indifference or disdain has too long stood in for the true story of the American Midwest A first ever chronicle of the Midwest's formative century *The Good Country* restores this American heartland to its central place in the nation's history Jon K Lauck the premier historian of the region puts midwestern squares center stage an unorthodox approach that leads to surprising conclusions The American Midwest in Lauck's cogent account was the most democratically advanced place in the world during the nineteenth century *The Good Country* describes a rich civic culture that prized education literature libraries and the arts developed a stable social order grounded in Victorian norms republican virtue and Christian teachings and generally put democratic ideals into practice to a greater extent than any nation to date The outbreak of the Civil War and the fight against the slaveholding South only deepened the Midwest's dedication to advancing a democratic culture and solidified its regional identity The good country was of course not the perfect country and Lauck devotes a chapter to the question of race in the Midwest finding early examples of overt racism but also discovering a steady march toward racial progress He also finds many instances of modest reforms enacted through the democratic process and designed to address

particular social problems as well as significant advances for women who were active in civic affairs and took advantage of the Midwest's openness to women in higher education. Lauck reaches his conclusions through a measured analysis that weighs historical achievements and injustices, rejects the acrimonious tones of the culture wars, and seeks a new historical discourse grounded in fair readings of the American past. In a trying time of contested politics and culture, his book locates a middle ground fittingly in the center of the country.

Impermanence Sue Leaf, 2024-01-09 A personal journey through the ever-changing natural and cultural history of Lake Superior's South Shore. Lake Superior's South Shore is as malleable as it is enduring: its red sandstone cliffs, clay bluffs, and golden sand beaches reshaped by winds and water from season to season, and sometimes from one hour to the next. Generations of people have inhabited the South Shore, harvesting the forests and fish, mining copper, altering the land for pleasure and profit for better or worse. In *Impermanence*, author Sue Leaf explores the natural and human histories that make the South Shore what it is, from the gritty port city of Superior, Wisconsin, to the shipping locks at Sault Ste. Marie, Michigan. For Leaf, what began as a bicycling adventure on the coast of Lake Superior in 1977 turned into a lifelong connection with the area and her experience, not least as owner of a rustic cabin on a rapidly eroding lakeside cliff, imbues these essays with a passionate sense of place and an abiding curiosity about its past and precarious future. As waves slowly consume the shoreline where her family has spent countless summers, Leaf is forced to confront the complexity of loving a place that all too quickly is being reclaimed by the great lake. *Impermanence* is a journey through the South Shore's story from the early days of the Anishinaabe and fur traders through the heyday of commercial fishing, lumber camps, and copper mining on the Keweenaw Peninsula to the awakening of the Northland, to the perils and consequences of plundering its natural splendor. Noting the geological, ecological, and cultural features of each stop on her tour along the South Shore, Leaf writes about the restoration of the heavily touristed Apostle Islands National Lakeshore to its pristine conditions, even as Lake Superior maintains its allure for ice fishers, kayakers, and long-distance swimmers. She describes efforts to protect the endangered piping plover and to preserve the diverse sand dunes on the Michigan coast, and she observes the slough that supports rare, intact wild rice beds central to Anishinaabe culture. Part memoir, part travelogue, part natural and cultural history, Leaf's love letter to Lake Superior's South Shore is an invitation to see this liminal world in all its seasons and guises, to appreciate its ageless, ever-changing wonders and intimate charms.

Minnesota's Geologist Sue Leaf, 2020-06-09 Winner of the 2021 Minnesota Book Award for Minnesota Nonfiction. The story of the scientist who first mapped Minnesota's geology set against the backdrop of early scientific inquiry in the state. At twenty, Newton Horace Winchell declared, "I know nothing about rocks." At twenty-five, he decided to make them his life's work. As a young geologist tasked with heading the Minnesota Geological and Natural History Survey, Winchell (1839-1914) charted the prehistory of the region, its era of inland seas, its volcanic activity, and its several ice ages, laying the foundation for the monumental five-volume *Geology of Minnesota*. Tracing Winchell's remarkable path from impoverished fifteen-year-old schoolteacher to a leading light

of an emerging scientific field Minnesota's Geologist also recreates the heady early days of scientific inquiry in Minnesota a time when one man's determination and passion for learning could unlock the secrets of the state's distant past and present landscape Traveling by horse and cart by sailboat and birchbark canoe Winchell and his group surveyed rock outcrops river valleys basalt formations on Lake Superior and the vast Red River Valley He studied petrology at the Sorbonne in Paris bringing cutting edge knowledge to bear on the volcanic rocks of the Arrowhead region As a founder of the American Geological Society and founding editor of American Geologist the first journal for professional geologists Winchell was the driving force behind scientific endeavor in early state history serving as mentor to many young scientists and presiding over a household the Winchell House located on the University of Minnesota's present day mall that was a nexus of intellectual ferment His life story told here for the first time draws an intimate picture of this influential scientist set against a backdrop of Minnesota's geological complexity and splendor *Science Museums in Transition* Carin Berkowitz, Bernard

Lightman, 2017-07-19 The nineteenth century witnessed a dramatic shift in the display and dissemination of natural knowledge across Britain and America from private collections of miscellaneous artifacts and objects to public exhibitions and state sponsored museums The science museum as we know it an institution of expert knowledge built to inform a lay public was still very much in formation during this dynamic period *Science Museums in Transition* provides a nuanced comparative study of the diverse places and spaces in which science was displayed at a time when science and spectacle were still deeply intertwined when leading naturalists curators and popular showmen were debating both how to display their knowledge and how and whether they should profit from scientific work and when ideals of nationalism class politics and democracy were permeating the museum's walls Contributors examine a constellation of people spaces display practices experiences and politics that worked not only to define the museum but to shape public science and scientific knowledge Taken together the chapters in this volume span the Atlantic exploring private and public museums short and long term exhibitions and museums built for entertainment education and research and in turn raise a host of important questions about expertise and about who speaks for nature and for history **Portage** Sue Leaf, 2015-10-15 When as a child she first saw a canoe gliding on Lake Alexander in central Minnesota Sue Leaf was mesmerized The enchantment stayed with her and shimmers throughout this book as we join Leaf and her family in canoeing the waterways of North America always on the lookout for the good life amid the splendors and surprises of the natural world The journey begins with a trip to the border lakes of the Boundary Waters Canoe Area Wilderness then wanders into the many beautiful little rivers of Minnesota and Wisconsin the provincial parks of Canada the Louisiana bayou and the arid West A biologist and birder Leaf considers natural history and geology noticing which plants are growing along the water and which birds are flitting among the branches Traveling the routes of the Ojibwe voyageurs and map making explorers she reflects on the region's history peopling her pages with Lewis and Clark Jean Lafitte Henry Schoolcraft and Canada's Group of Seven artists Part travelogue part natural

and cultural history Portage is the memoir of one family's thirty five year venture into the watery expanse of the world Through sunny days and stormy hours and a few hair raising moments Sue and her husband Tom celebrate anniversaries on the water haul their four kids along on family adventures and occasionally make the paddle a social outing with friends Along the way they contend with their own human nature they run rapids when it would have been wiser to portage take portages and learn truths about aging avoid portages and ponder risk taking Through it all out in the open in the wild in the blue exploring the river means encountering life good decisions and missed chances risks and surprises and the inevitable changes that occur as a family canoes through time and learns what it means to be human in this natural world
