Leland, 2015-08-06 Excerpt from A Manual of Wood Carving This manual like that on Drawing and Designing previously published is intended to form one of a series in furtherance of the principles set forth in Mr Leland's work on Practical Education It has rarely happened that a volume such as this latter proposing as one critic declared nothing less than a complete revolution in Education has been so favourably received by the public and so highly approved by competent authorities as was the case with it Should it be unknown to any friends of educational reform into whose hands this handbook may fall it is to be hoped that they will think it worth while to make themselves acquainted with the principles upon which Mr Leland's practical manuals are based As regards this in particular it may be observed that it is almost the only one which treats Wood carving in a general and extended sense and regards it as an art widely applicable to ornamentation and not one confined to small chefs d'uvre and prize toys facsimiles of fruit and leaves or the like It is the first book in which the sweep cut which is the very soul of all good and bold carving has ever been described It may be added that the work has derived great advantage from the friendly interest taken in it by Mr John J Holtzapffel for which the thanks of both author and publishers are due About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **A Manual of Wood Carving** Charles G.
