# **NIKOLAI KREMENTSOV**

ALEXANDER BOGDANOV, BLOOD TRANSFUSIONS,

AND PROLETARIAN SCIENCE

Mark Bould, Andrew M. Butler, Sherryl Vint

A Martian Stranded on Earth Nikolai Krementsov, 2011-07-15 Examines Bogdanov s roles as revolutionary novelist and scientist presenting his protagonist as a coherent thinker who pursued his ideas in a wide range of venues This title offers an A Martian Stranded on Earth Nikolai analysis of the interactions between scientific ideas and societal values Krementsov, 2011-07-05 Much like Vladimir Lenin his onetime rival for the leadership of the Bolshevik party during its formative years Alexander Bogdanov 1873 1928 was a visionary In two science fiction novels set on Mars Bogdanov imagined a future in which the workers of the world liberated from capitalist exploitation create a physiological collective that rejuvenates and unites its members through regular blood exchanges But Bogdanov was not merely a dreamer He worked tirelessly to popularize and realize his vision founding the first research institute devoted to the science of blood transfusion In A Martian Stranded on Earth the first broad based book on Bogdanov in English Nikolai Krementsov examines Bogdanov s roles as revolutionary novelist and scientist presenting his protagonist as a coherent thinker who pursued his ideas in a wide range of venues Through the lens of Bogdanov s involvement with blood studies on one hand and of his fictional and philosophical writings on the other Krementsov offers a nuanced analysis of the interactions between scientific ideas and Alexander Bogdanov and the Politics of Knowledge after the October Revolution Maria societal values Chehonadskih, 2023-12-30 In this book Maria Chehonadskih unsettles established narratives about the formation of a revolutionary canon after the October Revolution Displacing the centre of gravity from dialectical materialism to the rapid dissemination canonisation and decline of a striking convergence of empiricism and Marxism she explores how this tendency overshadowed by official historiography establishes a new attitude to modernity and progress nature and environment agency and subjectivity party and class knowledge and power The book traces the adventure of the synthesis of empiricism and Marxism across philosophy science politics art and literature from the 1890s to the 1930s offering a radical rethinking of the true scope and scale that the main proponent of Empirio Marxism Alexander Bogdanov had on the post revolutionary socialist legacies Chehonadskih draws on both key and forgotten figures and movements such as Proletkult Productivism and Constructivism filling a gap in the literature that will be particularly significant for Marxism continental philosophy art theory and Slavic studies specialists **Tunguska** Andy Bruno, 2022-06-30 Examining the role of mystery in environmental history this book is an intriguing new account of the enigmatic 1908 Tunguska disaster Gan's Constructivism Kristin Romberg, 2019-01-08 This compelling new account of Russian constructivism repositions the agitator Aleksei Gan as the movement's chief protagonist and theorist Primarily a political organizer during the revolution and early Soviet period Gan brought to the constructivist project an intimate acquaintance with the nuts and bolts of making revolution Writing slogans organizing amateur performances and producing mass media objects define an alternative conception of the work of art no longer an autonomous object but a labor process through which solidarities are built In an expansive analysis touching on

aesthetic and architectural theory the history of science and design sociology and feminist and political theory Kristin Romberg invites us to consider a version of modernism organized around the radical flattening of hierarchies a broad distribution of authorship and the negotiation of constraints and dependencies Moving beyond Cold War abstractions Gan s Constructivism offers a fine grained understanding of what it means for an aesthetics to be political Immortality Anya Bernstein, 2019-06-25 A gripping account of the Russian visionaries who are pursuing human immortality As long as we have known death we have dreamed of life without end In The Future of Immortality Anya Bernstein explores the contemporary Russian communities of visionaries and utopians who are pressing at the very limits of the human The Future of Immortality profiles a diverse cast of characters from the owners of a small cryonics outfit to scientists inaugurating the field of biogerontology from grassroots neurotech enthusiasts to believers in the Cosmist ideas of the Russian Orthodox thinker Nikolai Fedorov Bernstein puts their debates and polemics in the context of a long history of immortalist thought in Russia with global implications that reach to Silicon Valley and beyond If aging is a curable disease do we have a moral obligation to end the suffering it causes Could immortality be the foundation of a truly liberated utopian society extending beyond the confines of the earth something that Russians historically have pondered more than most If life without end requires radical genetic modification or separating consciousness from our biological selves how does that affect what it means to be human As vividly written as any novel The Future of Immortality is a fascinating account of techno The Gulag Doctors Dan scientific and religious futurism and the ways in which it hopes to transform our very being Healey, 2024-02-27 A pioneering history of medical care in Stalin's Gulag showing how doctors and nurses cared for inmates in appalling conditions A byword for injustice suffering and mass mortality the Gulag exploited prisoners compelling them to work harder for better rations in shocking conditions From 1930 to 1953 eighteen million people passed through this penal industrial empire Many inmates not reaching their guotas succumbed to exhaustion emaciation and illness It seems paradoxical that any medical care was available in the camps But it was in fact ubiquitous By 1939 the Gulag Sanitary Department employed 10 000 doctors nurses and paramedics about 40 percent of whom were prisoners Dan Healey explores the lives of the medical staff who treated inmates in the Gulag Doctors and nurses faced extremes of repression supply shortages and isolation Yet they still created hospitals re fed prisoners treated diseases and saved a proportion of their patients They taught apprentices and conducted research too This groundbreaking account offers an unprecedented view of Stalin's forced labour camps as experienced by its medical staff Alternative Kinships Jacob Emery, 2017-05-15 According to Marx the family is the primal scene of the division of labor and the germ of every exploitative practice In this insightful study Jacob Emery examines the Soviet Union's programmatic effort to institute a global siblinghood of the proletariat revealing how alternative kinships motivate different economic relations and make possible other artistic forms A time in which literary fiction was continuous with the social fictions that organize the social economy the early Soviet period

magnifies the interaction between the literary imagination and the reproduction of labor onto a historical scale Narratives dating back to the ancient world feature scenes in which a child looks into a mirror and sees someone else reflected there typically a parent In such scenes two definitions of the aesthetic coincide art as a fantastic space that shows an alternate reality and art as a mirror that reflects the world as it is In early Soviet literature mirror scenes illuminate the intersection of imagination and economy yielding new relations destined to replace biological kinship relations based in food language or spirit These metaphorical kinships have explanatory force far beyond their context providing a vantage point onto for example the Gothic literature of the early United States and the science fiction discourses of the postwar period Alternative Kinships will appeal to scholars of Russian literature comparative literature and literary theory as well as those interested in reconciling formalist and materialist approaches to culture The Technocene Hermínio Martins, 2018-12-15 Herm nio Martins was one of the key pioneers of the sociology of science and technology He published extensively in Portuguese and was recognized for his academic contributions with an honorary doctorate at Lisbon 2006 and two Portuguese Medals of Honour Following his retirement from the University of Oxford he wrote prolifically in English on a wide range of topics that examined the ethical and societal consequences of the commoditization of the human body and mind These essays are deep philosophical reflections on our contemporary world and draw extensively and eclectically upon a wide range of theoretical influences including continental philosophy history and psychology to name but a few disciplines The Technocene is a selection of some of these insightful essays made available to a global audience for the first time Russian Revolution Daniel Orlovsky, 2020-10-19 A compendium of original essays and contemporary viewpoints on the 1917 Revolution The Russian revolution of 1917 reverberated throughout an empire that covered one sixth of the world It altered the geo political landscape of not only Eurasia but of the entire globe The impact of this immense event is still felt in the present day The historiography of the last two decades has challenged conceptions of the 1917 revolution as a monolithic entity the causes and meanings of revolution are many as is reflected in contemporary scholarship on the subject A Companion to the Russian Revolution offers more than thirty original essays written by a team of respected scholars and historians of 20th century Russian history Presenting a wide range of contemporary perspectives the Companion discusses topics including the dynamics of violence in war and revolution Russian political parties the transformation of the Orthodox church Bolshevism Liberalism and more Although primarily focused on 1917 itself and the singular Revolutionary experience in that year this book also explores time periods such as the First Russian Revolution early Soviet government the Civil War period and even into the 1920 s Presents a wide range of original essays that discuss Brings together in depth coverage of political history party history cultural history and new social approaches Explores the long range causes influence on early Soviet culture and global after life of the Russian Revolution Offers broadly conceived contemporary views of the revolution largely based on the author's original research Links Russian revolutions to Russian Civil Wars as concepts A Companion to

the Russian Revolution is an important addition to modern scholarship on the subject and a valuable resource for those interested in Russian Late Imperial or Soviet history as well as anyone interested in Revolution as a global phenomenon

Showcasing the Great Experiment Michael David-Fox, 2011-10-01 During the 1920s and 1930s thousands of European and American writers professionals scientists artists and intellectuals made a pilgrimage to experience the Soviet experiment for themselves Showcasing the Great Experiment explores the reception of these intellectuals and fellow travelers and their cross cultural and trans ideological encounters in order to analyze Soviet attitudes towards the West Many of the twentieth century's greatest writers and thinkers including Theodore Dreiser Andr Gide Paul Robeson and George Bernard Shaw notoriously defended Stalin s USSR despite the unprecedented violence of its prewar decade While many visitors were profoundly affected by their Soviet tours so too was the Soviet system The early experiences of building showcases and teaching outsiders to perceive the future in the making constitute a neglected international part of the emergence of Stalinism at home Michael David Fox contends that each side critically examined the other negotiating feelings of inferiority and superiority admiration and enmity emulation and rejection By the time of the Great Purges these tensions gave way to the dramatic triumph of xenophobia and isolationism whereas in the twenties the new regime assumed it had much to learn from Western modernity by the Stalinist thirties the Soviet order was declared superior in all respects Drawing on the declassified archival records of the agencies charged with crafting the international image of communism David Fox shows how Soviet efforts to sell the Bolshevik experiment abroad through cultural diplomacy shaped and were in turn shaped by the ongoing project of defining the Soviet Union from within These interwar Soviet methods of mobilizing the intelligentsia for the international ideological contest he argues directly paved the way for the cultural Cold War An Intellectual Biography of N.A. Rozhkov John A. González, 2016-09-19 An Intellectual Biography of N A Rozhkov is the first English language study to follow Russia's most gifted and important historian to emerge from the school of VO Kliuchevskii through the transformative decades that bridged the nineteenth and twentieth centuries Rozhkov's early philosophical influences are examined to explain his radicalisation from middle class intellectual academic to Leninist Bolshevik to Menshevik social democrat His Marxist socialist beliefs landed him in gaol several times and eventually he was exiled to Siberia for a decade where he was able to refine his political worldview and develop his theory of historical development Critical of Lenin and the 1917 revolution he spent the last decade of his life being persecuted by the Bolshevik regime Energy Culture Jillian Porter, Maya Vinokour, 2023-04-06 This volume investigates energy as a shaping force in Russian and Soviet literature visual culture and social practice Chronologically arranged chapters explain how nineteenth century ideas about energy informed realist novels and paintings how the poetics of energy defined pre Revolutionary and Stalinist utopianism and how fossil fuels electricity and nuclear fission generated distinct aesthetic features in Imperial Russian Soviet and post Soviet literature cinema and landscape The volume s concentration on Russia responds to a clear need to understand the role the country

plays in social political and economic processes endangering life on Earth today The cultural dimension of Russia's efforts at energy dominance deserves increased scholarly attention not only in its own right but also because it directly affects global energy policy As the contributors to this volume argue the nationally inflected cultural myths that underlie human engagements with energy have been highly consequential in the Anthropocene **Toxic Voices** Eric Laursen, 2013-01-30 Introduction Scrounging in the Soviet garbage pit Writing a precarious balance He does not love us when we are dirty Things that should not be found Lost in translation Conclusion Writers forward Stalin and the Scientists Simon Ings, 2017-02-21 One of the finest most gripping surveys of the history of Russian science in the twentieth century Douglas Smith author of Former People The Final Days of the Russian Aristocracy Stalin and the Scientists tells the story of the many gifted scientists who worked in Russia from the years leading up to the revolution through the death of the Great Scientist himself Joseph Stalin It weaves together the stories of scientists politicians and ideologues into an intimate and sometimes horrifying portrait of a state determined to remake the world They often wreaked great harm Stalin was himself an amateur botanist and by falling under the sway of dangerous charlatans like Trofim Lysenko who denied the existence of genes and by relying on antiquated ideas of biology he not only destroyed the lives of hundreds of brilliant scientists he caused the death of millions through famine But from atomic physics to management theory and from radiation biology to neuroscience and psychology these Soviet experts also made breakthroughs that forever changed agriculture education and medicine A masterful book that deepens our understanding of Russian history Stalin and the Scientists is a great achievement of research and storytelling and a gripping look at what happens when science falls prey to politics Longlisted for the Baillie Gifford Prize for Non Fiction in 2016 A New York Times Book Review Paperback Row selection Ings s research is impressive and his exposition of the science is lucid Filled with priceless nuggets and a cast of frauds crackpots and tyrants this is a lively and interesting book and utterly relevant today The New York Times Book Review A must read for understanding how the ideas of scientific knowledge and technology were distorted and subverted for decades across the Soviet Union The Washington Post The New Routledge Companion to Science Fiction Mark Bould, Andrew M. Butler, Sherryl Vint, 2024-06-13 The New Routledge Companion to Science Fiction provides an overview of the study of science fiction across multiple academic fields It offers a new conceptualisation of the field today marking the significant changes that have taken place in sf studies over the past 15 years Building on the pioneering research in the first edition the collection reorganises historical coverage of the genre to emphasise new geographical areas of cultural production and the growing importance of media beyond print It also updates and expands the range of frameworks that are relevant to the study of science fiction The periodisation has been reframed to include new chapters focusing on science fiction produced outside the Anglophone context including South Asian Latin American Chinese and African diasporic science fiction The contributors use both well established critical and theoretical approaches and embrace a range of new ones including biopolitics climate crisis critical

ethnic studies disability studies energy humanities game studies medical humanities new materialisms and sonic studies This book is an invaluable resource for students and established scholars seeking to understand the vast range of engagements with science fiction in scholarship today Chapter 39 of this book is freely available as a downloadable Open Access PDF at http www taylorfrancis com under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 The Art and Science of Making the New Man in Early 20th-Century Russia Yvonne Howell, Nikolai license Krementsov, 2021-12-30 Introduction On words and meanings Nikolai Krementsov Encyclopedic Worldbuilding Alexander Bogdanov and the cognitive creation of the new man Michael Coates The Road to Life educating the new man Lyubov Bugaeva The new man in the nursery making Soviet dolls and regulating children's play in the 1920s and 1930s Olga Ilyukha New sciences new worlds and New Men Nikolai Krementsov Entertaining sciences unlikely horrors the changing image of Man in Soviet popular scientific literary genres Matthais Schwartz The New Man as a monster of eugenic imagination the criminal brain in Mikhail Bulgakov s Heart of a Dog and James Whale s Frankenstein Irina Golovacheva A School of the Peasantry of the Future constructing the image of a New Peasant at the All Russian Agricultural Exhibition 1923 Olga Elina Revolutionary evolution in apes and humans in the 1920s sculpture and constructs of the New Man at the Moscow Darwin Museum Pat Simpson A New Man in the Ethnographic Museum between the socialist content and the national form Stanislav Petriashin Conclusion The New Man one hundred years later Yvonne Howell The Philosophy of Living Experience Alexander Aleksandrovich Bogdanov, 2015-10-05 The Philosophy of Living Experience is the single best introduction to the thought of Alexander Bogdanov 1873 1928 a Russian polymath who was co founder with Lenin of the Bolshevik Party His landmark achievements are Empiriomonism 1904 6 a philosophy of radical empiricism that he developed to replace what he considered to be the crude materialism of contemporary Marxists and Tektology Universal Organisational Science 1912 17 a precursor of cybernetics and systems theory The Philosophy of Living Experience 1913 was written at a transitional point between the two it is a final summing up of empiriomonism an illustration of his theory of the social genesis of ideas and an anticipation of Tektology Life and Evolution Lorenzo Baravalle, Luciana Zaterka, 2020-04-10 This book offers to the international reader a collection of original articles of some of the most skillful historians and philosophers of biology currently working in Latin American universities During the last decades increasing attention has been paid in Latin America to the history and philosophy of biology but since many local authors prefer to write in Spanish or in Portuguese their ideas have barely crossed the boundaries of the continent This volume aims to remedy this state of things providing a good sample of this production to the English speaking readers bringing together contributions from researchers working in Brazilian Argentinean Chilean Colombian and Mexican universities The stress on the regional provenance of the authors is not intended to suggest the existence of something like a Latin American history and philosophy of biology supposedly endowed with distinctive features On the contrary the editors firmly believe that advances in this field can be achieved only by

stimulating the integration in the international debate Based on this assumption the book focuses on two topics life and evolution and presents a selection of contributions addressing issues such as the history of the concept of life the philosophical reflection on life manipulation and life extension the structure and development of evolutionary theory as well as human evolution Life and Evolution Latin American Essays on the History and Philosophy of Biology will provide the international reader with a rather complete picture of the ongoing research in the history and philosophy of biology in Latin America offering a snapshot of this dynamic community It will also contribute to contextualize and develop the debate concerning life and evolution and the relation between the two phenomena The Darwinian Tradition in Context Richard G. Delisle, 2017-12-29 The main goal of this book is to put the Darwinian tradition in context by raising questions such as How should it be defined Did it interact with other research programs Were there any research programs that developed largely independently of the Darwinian tradition Accordingly the contributing authors explicitly explore the nature of the relationship between the Darwinian tradition and other research programs running in parallel In the wake of the Synthetic Theory of Evolution which was established throughout the 1930s 1940s and 1950s historians and philosophers of biology devoted considerable attention to the Darwinian tradition i e linking Charles Darwin to mid Twentieth Century developments in evolutionary biology Since then more recent developments in evolutionary biology have challenged in part or entirely the heritage of the Darwinian tradition Not surprisingly this has in turn been followed by a historiographical recalibration on the part of historians and philosophers regarding other research programs and traditions in evolutionary biology In order to acknowledge this shift the papers in this book have been arranged on the basis of two main threads Part I A perspective that views Darwinism as either being originally pluralistic or having acquired such a pluralistic nature through modifications and borrowings over time Part II A perspective blurring the boundaries between non Darwinian and Darwinian traditions either by contending that Darwinism itself was never quite as Darwinian as previously assumed or that non Darwinian traditions took on board various Darwinian components when not fertilizing Darwinism directly Between a Darwinism reaching out to other research programs and non Darwinian programs reaching out to Darwinism the least that can be said is that this interweaving of intellectual threads blurs the historiographical field This volume aims to open vital new avenues for approaching and reflecting on the development of evolutionary biology

Embracing the Tune of Term: An Emotional Symphony within **A Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science** 

In a global consumed by screens and the ceaseless chatter of fast conversation, the melodic elegance and psychological symphony developed by the prepared term often fade in to the back ground, eclipsed by the relentless sound and distractions that permeate our lives. Nevertheless, situated within the pages of **A Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science** a stunning literary treasure brimming with raw feelings, lies an immersive symphony waiting to be embraced. Constructed by a masterful composer of language, that captivating masterpiece conducts readers on an emotional journey, well unraveling the hidden tunes and profound impact resonating within each cautiously crafted phrase. Within the depths of this touching examination, we can examine the book is main harmonies, analyze their enthralling writing design, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.

#### A Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science Introduction

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In todays fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free A Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science PDF books and manuals is the internets largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek. The availability of free PDF books and manuals on this platform demonstrates its commitment to democratizing education and empowering individuals with the tools needed to succeed in their chosen fields. It allows anyone, regardless of their background or financial limitations, to expand their horizons and gain insights from experts in various disciplines. One of the most significant advantages of downloading PDF books and manuals lies in their portability. Unlike physical copies, digital books can be stored and carried on a single device, such as a tablet or smartphone, saving valuable space and weight. This convenience makes it possible for readers to have their entire library at their fingertips, whether they are commuting, traveling, or simply enjoying a lazy afternoon at home. Additionally, digital files are easily searchable, enabling readers to locate specific information within seconds. With a few keystrokes, users can search for keywords, topics, or phrases, making research and finding relevant information a breeze. This efficiency saves time and effort, streamlining the learning process and allowing individuals to focus on extracting the information they need. Furthermore, the availability of free PDF books and manuals fosters a culture of continuous learning. By removing financial barriers, more people can access educational resources and pursue lifelong learning, contributing to personal growth and professional development. This democratization of knowledge promotes intellectual curiosity and empowers individuals to become lifelong learners, promoting progress and innovation in various fields. It is worth noting that while accessing free A

Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science PDF books and manuals is convenient and cost-effective, it is vital to respect copyright laws and intellectual property rights. Platforms offering free downloads often operate within legal boundaries, ensuring that the materials they provide are either in the public domain or authorized for distribution. By adhering to copyright laws, users can enjoy the benefits of free access to knowledge while supporting the authors and publishers who make these resources available. In conclusion, the availability of A Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science free PDF books and manuals for download has revolutionized the way we access and consume knowledge. With just a few clicks, individuals can explore a vast collection of resources across different disciplines, all free of charge. This accessibility empowers individuals to become lifelong learners, contributing to personal growth, professional development, and the advancement of society as a whole. So why not unlock a world of knowledge today? Start exploring the vast sea of free PDF books and manuals waiting to be discovered right at your fingertips.

# FAQs About A Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. A Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science is one of the best book in our library for free trial. We provide copy of A Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science. Where to download A Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science online for free? Are you looking for A Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science online for free? Are you looking for A Martian Stranded On Earth Alexander Bogdanov Blood Transfusions And Proletarian Science online for free? Are you looking for Save you time and

cash in something you should think about.
