Liu,2020-04-21 A history of capitalism in nineteenth and twentieth century China and India that explores the competition between their tea industries Tea remains the world s most popular commercial drink today and at the turn of the twentieth century it represented the largest export industry of both China and colonial India In analyzing the global competition between Chinese and Indian tea Andrew B Liu challenges past economic histories premised on the technical divergence between the West and the Rest arguing instead that seemingly traditional technologies and practices were central to modern capital accumulation across Asia He shows how competitive pressures compelled Chinese merchants to adopt abstract industrial conceptions of time while colonial planters in India pushed for labor indenture laws to support factory style tea plantations Characterizations of China and India as premodern backwaters he explains were themselves the historical result of new notions of political economy adopted by Chinese and Indian nationalists who discovered that these abstract ideas corresponded to concrete social changes in their local surroundings Together these stories point toward a more flexible and globally oriented conceptualization of the history of capitalism in China and India

The Decline of British Industrial Hegemony Indrajit Ray, 2022-06-01

Through two World Wars and the Great Depression this book explores the turbulent history of colonial Indian industry in the period immediately prior to independence Focusing on five major industries in Bengal coal mining iron smelting jute manufacturing paper making and tea plantation the book looks at the impact of the war efforts on production employment and capital some industries experienced rapid growth due to additional investment others suffered due to the dislocation of markets Moreover by drawing lessons from the war economy especially the dearth of various essential commodities including war materials the colonial government took up various measures in the inter war period to promote India's domestic industries for the first time Additionally the book also argues that many of the expatriate firms in India became financially weak because of the Depression which paved the way for the Indianisation of corporate houses These elements were significant factors in the decline of British industrial hegemony in India and aided the de colonisation process which followed This book will be of interest to scholars of Indian economic history as well as those with wider interests in decolonisation industrial history and the first half of the twentieth century

What Is Classical Liberal History? Michael J. Douma, Phillip W. Magness, 2017-12-21

Historians working in the classical liberal tradition believe that individual decision making and individual rights matter in the

making of history History written in the classical liberal tradition emerged largely in the nineteenth century when the field of history was first professionalized in Europe and the Americas Professional historical research was then imbued with liberal values which included rigorous attention to the sources historicist suspicion of an ultimate mover an honest and dispassionate rational outlook and humility towards what could be known Above all liberals wanted to chart the history of liberty warn against threats to liberty and defend it in an evolving political world They believed history was real and that it had lessons to teach but that these lessons could not provide sufficient knowledge to predict the future or reorganize society around a central plan This book demonstrates how the classical liberal tradition in historical writing persists to this day but how it is often neglected and due for renewal The book contrasts the classical liberal view on history with conservative progressive Marxist and post modern views Each of the eleven chapters address a different historical topic from the development of classical liberalism in nineteenth century America to the the history of civil liberties and civil rights that stemmed from this tradition Authors give particular attention to the importance of social and economic analysis Each contributor was chosen as an expert in their field to provide a historiographical overview of their subject and to explain what the classical liberal contribution to this historiography has been and should be Authors then provide guidance towards possible tools of analysis and related research topics that future historians working in the classical liberal tradition could take up The authors wish to call upon other historians to recognize the important contributions to historical understanding that have come and can be provided by the insights of classical liberalism Astronomical Pulses to History's Phases Michael A. Susko, 2025-09-26 Bringing together seven volumes of research Michael A Susko presents a grand synthesis of astronomical biological and cultural evolution Using a logarithmic model he shows how the universe has unfolded in accelerating pulses from galaxies and planets to the rise of life and symbolic humanity This rhythm of time is then extended through the Neolithic tells and into recorded history where generational phases reveal cultures growing and transforming in their own natural cycles Three distinct measures of time logarithmic pulses triadic generational units and fifteen year historical generations converge to reveal a patterned fabric of change Across billions of years and into the present moment the author demonstrates how time is not a smooth line but a structured unfolding marked by phases of complexity consciousness and cultural renewal The result is both a sweeping map of our past and a reflection on the nature of time itself its rhythms its surprises and its promise of transformations yet to come **Forces of Habit** David T. COURTWRIGHT, 2009-06-30 A global history of the acquisition of progressively more potent means of altering ordinary waking consciousness this book is the first to provide the big picture of the discovery interchange and exploitation of the planet's psychoactive resources from tea and kola to opiates and amphetamines *America's China Trade in Historical Perspective* Ernest R. May, John King Fairbank, 1986 This volume explores commercial relations between the United States and China from the eighteenth century until 1949 fleshing out with facts the romantic and shadowy image of the China trade

These nine chapters by specialists in the field have developed from papers they presented at a conference supported by the national Committee on American East Asian Relations The work begins with an Introduction by John K Fairbank then moves on to analysis of the old China trade up to the American Civil War centering on traditional Chinese exports of tea and silk A second section deals with American imports into China cotton textiles and textile related goods cigarettes kerosene Finally the impact of the trade on both countries is assessed and the operations of American owned and multinational companies in China are examined For both the United States and China the economic importance of the trade proves to have been less than the legend might suggest
