W. Leadbeater,Desmond Gahan,2012-05-01 There is a school of philosophy still in existence of which modern culture has lost sight In these words Mr A P Sinnett began his book *_The Occult World_* the first popular exposition of Theosophy published thirty years ago Namely in 1881 During the years that have passed since then many thousands have learned wisdom in that school yet to the majority its teachings are still unknown and they can give only the vaguest of replies to the query What is Theosophy We often speak of Theosophy as not in itself a religion but the truth which lies behind all religions alike That is so yet from another point of view we may surely say that it is at once a philosophy a

religion and a science It is a philosophy because it puts plainly before us an explanation of the scheme of evolution of both the souls and the bodies contained in our solar system A Textbook of Theosophy Charles Webster Leadbeater, 2004-01-01

There is a school of philosophy still in existence of which modern culture has lost sight In these words Mr A P Sinnett began his book *The Occult World* the first popular exposition of Theosophy published thirty years ago Namely in 1881 During the years that have passed since then many thousands have learned wisdom in that school yet to the majority its teachings are still unknown and they can give only the vaguest of replies to the query What is Theosophy Two books already exist which answer that question Mr Sinnett s *Esoteric Buddhism* and Dr Besant s *The Ancient Wisdom* I have no thought of entering into competition with those standard works what I desire is to present a statement as clear and simple as I can make it which may be regarded as introductory to them We often speak of Theosophy as not in itself a religion but the truth which lies behind all religions alike That is so yet from another point of view we may surely say that it is at once a philosophy a religion and a science It is a philosophy because it puts plainly before us an explanation of the scheme of evolution of both the souls and the bodies contained in our solar system It is a religion in so far as having shown us the course of ordinary evolution it also puts before us and advises a method of shortening that course so that by conscious effort we may progress more directly towards the goal It is a science because it treats both these subjects as matters not of theological belief but of direct knowledge obtainable by study and investigation It asserts that man has no need to trust to blind faith because he has within him latent powers which when aroused enable him to see and examine for himself and it proceeds to prove its case by showing how those powers may be awakened It is itself a result of the awakening of such powers by men for the teachings which it puts before us are founded upon direct observations made in the past and rendered possible only by such development As a philosophy it explains to us that the solar system is a carefully ordered mechanism a manifestation of a magnificent life of which man is but a small part Nevertheless it takes up that small part which immediately concerns us and treats it exhaustively under three heads present past and future It deals with the present by describing what man really is as seen by means of developed faculties It is customary to speak of man as having a soul Theosophy as the result of direct investigation reverses that dictum and states that man is a soul and has a body in fact several bodies which are his vehicles and instruments in various worlds These worlds are not separate in space they are simultaneously present with us here and now and can be examined they are the divisions of the material side of Nature different degrees of density in the aggregation of matter as will presently be explained in detail Man has an existence in several of these but is normally conscious only of the lowest though sometimes in dreams and trances he has glimpses of some of the others What is called death is the laying aside of the vehicle belonging to this lowest world but the soul or real man in a higher world is no more changed or affected by this than the physical man is changed or affected when he removes his overcoat All this is a matter not of speculation but of observation and experiment Theosophy has much to tell us of the past history of man of how in the course of evolution he

has come to be what he now is This also is a matter of observation because of the fact that there exists an indelible record of all that has taken place a sort of memory of Nature by examining which the scenes of earlier evolution may be made to pass before the eyes of the investigator as though they were happening at this moment By thus studying the past we learn that man is divine in origin and that he has a long evolution behind him a double evolution that of the life or soul within and that of the outer form We learn too that the life of man as a soul is of what to us seems enormous length and that what we have been in the habit of calling his life is in reality only one day of his real existence He has already lived through many such days and has many more of them yet before him and if we wish to understand the real life and its object we must consider it in relation not only to this one day of it which begins with birth and ends with death but also to the days which have gone before and those which are yet to come Of those that are yet to come there is also much to be said and on this subject too a great deal of definite information is available Such information is obtainable first from men who have already passed much further along the road of evolution than we and have consequently direct experience of it and secondly from inferences drawn from the obvious direction of the steps which we see to have been previously taken The goal of this particular cycle is in sight though still far above us but it would seem that even when that has been attained an infinity of progress still lies before everyone who is willing to undertake it One of the most striking advantages of Theosophy is that the light which it brings to us at once solves many of our problems clears away many difficulties accounts for the apparent injustices of life and in all directions brings order out of seeming chaos Thus while some of its teaching is based upon the observation of forces whose direct working is somewhat beyond the ken of the ordinary man of the world if the latter will accept it as a hypothesis he will very soon come to see that it must be a correct one because it and it alone furnishes a coherent and reasonable explanation of the drama of life which is being played before him

A Textbook of Theosophy Charles Webster Leadbeater, 1912 [A Textbook of Theosophy \(Aziloth Books\)](#) Charles Webster Leadbetter, 2017-01-07 Leadbeater's textbook explains theosophy or Divine Wisdom This occult discipline shows promulgated by the Theosophical Society us how to acquire higher planes of consciousness to the Creator and to help others do the same *The Textbook of Theosophy* C. W. Leadbeater, 2013-10 This is a new release of the original 1925 edition

A Textbook of Theosophy (Classic Reprint) C. W. Leadbeater, 2017-11-19 Excerpt from A Textbook of Theosophy Of those that are yet to come there is also much to be said and on this subject too a great deal of definite information is available Such information is obtainable first from men who have already passed much further along the road of evolution than we and have consequently direct experience of it and secondly from inferences drawn from the obvious direction of the steps which we see to have been previously taken The goal of this particular cycle is in sight though still far above us but it would seem that even when that has been attained an infinity of progress still lies before everyone who is willing to undertake it One of the most striking advantages of Theosophy is that the light which it brings to us at once solves many of our problems clears away many difficulties accounts for the apparent

injustices of life and in all directions brings order out of seeming chaos Thus while some of its teaching is based upon the observation of forces whose direct working is some what beyond the ken of the ordinary man of the world if the latter will accept it as a hypothesis he will very soon come to see that it must be a correct one because it and it alone furnishes a coherent and reasonable explanation of the drama of life which is being played before him About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

A Textbook of Theosophy C. W. Leadbeater, 2014-03-09 Theosophy literally divine wisdom refers to systems of esoteric philosophy concerning or investigation seeking direct knowledge of presumed mysteries of being and nature particularly concerning the nature of divinity Theosophy is considered a part of the broader field of esotericism referring to hidden knowledge or wisdom that offers the individual enlightenment and salvation The word esoteric dates back to the 2nd century CE The theosophist seeks to understand the mysteries of the universe and the bonds that unite the universe humanity and the divine The goal of theosophy is to explore the origin of divinity and humanity and the world From investigation of those topics theosophists try to discover a coherent description of the purpose and origin of the universe The term theosophy was used as a synonym for theology as early as the 3rd century CE Hellenistic Alexandrian culture expressed religion through a syncretism that included influences from Egypt Chaldea Greece etc It became a philosophizing and systematizing culture containing mythology theosophy and gnosis of the East The 12th century philosopher Al Shahrastani died 548 AH 1153 CE explored theosophy in the context of Islamic thought In the 13th century a clear distinction was made between classical philosophers modern to the people then philosophers theosophers and theologians in the work *Summa philosophiae* attributed to Robert Grosseteste In *Summa* theosophists were described as authors inspired by holy books while theologians

were described as persons whose task was to teach theosophy During that time the term theosopher was applied retroactively to include earlier people including Pseudo Dionysius the Areopagite Ambrose Jerome Augustine and Origen
