A Theory of Case-Based Decisions Itzhak Gilboa, David Schmeidler, 2001-07-26 This work a paradigm for modelling decision making under uncertainty describes the general theory and its relationship to planning repeated choice problems inductive inference and learning and highlights its mathematical and philosophical foundations

Theory of Case-Based Decisions Itzhak Gilboa, David Schmeidler, 2001 Gilboa and Schmeidler provide a new paradigm for modelling decision making under uncertainty one which suggests that people make decisions by analogies to past cases The authors describe the general theory and its relationship to planning repeated choice problems inductive inference and learning

Theory of Decision under Uncertainty Itzhak Gilboa, 2009-03-16 This book describes the classical axiomatic theories of decision under uncertainty as well as critiques thereof and alternative theories It focuses on the meaning of probability discussing some definitions and surveying their scope of applicability The behavioral definition of subjective probability serves as a way to present the classical theories culminating in Savage's theorem The limitations of this result as a definition of probability lead to two directions first similar behavioral definitions of more general theories such as non additive probabilities and multiple priors and second cognitive derivations based on case based techniques

Artificial Intelligence in Wireless Communications Thomas Warren Rondeau, Charles W. Bostian, 2009 This cutting edge resource offers practical overview of cognitive radio a paradigm for wireless communications in which a network or a wireless node changes its transmission or reception parameters The alteration of parameters is based on the active monitoring of several factors in the external and internal radio environment This book offers a detailed description of cognitive radio and its individual parts Practitioners learn how the basic processing elements and their capabilities are implemented as modular components Moreover the book explains how each component can be developed and tested independently before integration with the rest of the engine Practitioners discover how cognitive radio uses artificial intelligence to achieve radio optimization The book also provides an in depth working example of the developed cognitive engine and an experimental scenario to help engineers understand its performance and behavior

Uncertain Decisions Luigi Luini, 2012-12-06 Uncertain Decisions Bridging Theory and Experiments presents advanced directions of thinking on decision theory in particular the more recent contributions on non expected utility theory fuzzy decision theory and case based theory This work also provides theoretical insights on measures of risk aversion and on new problems for general equilibrium analysis It analyzes how the thinking that underlies the theories described above spills over into real decisions and how the thinking that underlies these real decisions can explain the discrepancies between theoretical approaches and

actual behavior This work elaborates on how the most recent laboratory experiments have become an important source both for evaluating the leading theory of choice and decision and for contributing to the formation of new models regarding the subject *Handbook of Research on E-Business Standards and Protocols: Documents, Data and Advanced Web*

Technologies Kajan, Ejub, Dorloff, Frank-Dieter, Bedini, Ivan, 2012-02-29 Electronic business is a major force shaping the digital world Yet despite of years of research and standardization efforts many problems persist that prevent e business from achieving its full potential Problems arise from different data vocabularies classification schemas document names structures exchange formats and their varying roles in business processes Non standardized business terminology lack of common acceptable and understandable processes grammar and lack of common dialog rules protocols create barriers to improving electronic business processes *Handbook of Research on E Business Standards and Protocols Documents Data and Advanced Web Technologies* contains an overview of new achievements in the field of e business standards and protocols offers in depth analysis of and research on the development and deployment of cutting edge applications and provides insight into future trends This book unites new research that promotes harmony and agreement in business processes and attempts to choreograph business protocols and orchestrate semantic alignment between their vocabularies and grammar Additionally this *Handbook of Research* discusses new approaches to improving standards and protocols which include the use of intelligent agents and Semantic Web technology *The Complex Networks of Economic Interactions* Akira Namatame, Taisei

Kaizouji, Yuuji Aruka, 2006-03-09 Understanding the mechanism of a socio economic system requires more than an understanding of the individuals that comprise the system It also requires understanding how individuals interact with each other and how the aggregated outcome can be more than the sum of individual behaviors This book contains the papers fostering the formation of an active multi disciplinary community on socio economic systems with the exciting new fields of age based modeling and econophysics We especially intend to increase the awareness of researchers in many fields with sharing the common view many economic and social activities as collectives of a large scale heterogeneous and interacting agents Economists seek to understand not only how individuals behave but also how the interaction of many individuals leads to complex outcomes Age based modeling is a method for studying socio economic systems exhibiting the following two properties 1 the system is composed of interacting agents and 2 the system exhibits emergent properties that is properties arising from the interactions of the agents that cannot be deduced simply by aggregating the properties of the system's components When the interaction of the agents is contingent on past experience and especially when the agents continually adapt to that experience mathematical analysis is typically very limited in its ability to derive the outcome **Analogies**

and Theories Itzhak Gilboa, Larry Samuelson, David Schmeidler, 2015 The book deals with the way economic agents reason about uncertainty It is thus at the foundations of economic theory touching upon general issues that are common also to statistics philosophy psychology and artificial intelligence Two modes of reasoning are at the heart of the discussion

reasoning by general rules or theories and reasoning by analogies to specific cases The book offers mathematical models of each type of reasoning and a unified model that captures both in a way that allows a formal analysis of modes of reasoning and their evolution

Handbook of Behavioural Economics and Smart Decision-Making Morris Altman, 2017-05-26 This Handbook is a unique and original contribution of over thirty chapters on behavioural economics examining and addressing an important stream of research where the starting assumption is that decision makers are for the most part relatively smart or rational This particular approach is in contrast to a theme running through much contemporary work where individuals behaviour is deemed irrational biased and error prone often due to how people are hardwired In the smart people approach where errors or biases occur and when social dilemmas arise more often than not improving the decision making environment can repair these problems without hijacking or manipulating the preferences of decision makers This book covers a wide range of themes from micro to macro including various sub disciplines within economics such as economic psychology heuristics fast and slow thinking neuroeconomics experiments the capabilities approach institutional economics methodology nudging ethics and public policy

The Foundations of Behavioral Economic Analysis Sanjit S. Dhami, 2016 It considers the evidence against the exponential discounted utility model and describes several behavioral models such as hyperbolic discounting attribute based models and the reference time theory Part IV describes the evidence on classical game theory and considers several models of behavioral game theory including level k and cognitive hierarchy models quantal response equilibrium and psychological game theory Part V considers behavioral models of learning that include evolutionary game theory classical models of learning experience weighted attraction model learning direction theory and stochastic social dynamics Part VI studies the role of emotions among other topics it considers projection bias temptation preferences happiness economics and interaction between emotions and cognition Part VII considers bounded rationality The three main topics considered are judgment heuristics and biases mental accounting and behavioral finance

Making Better Decisions Itzhak Gilboa, 2010-10-19 Making Better Decisions introduces readers to some of the principal aspects of decision theory and examines how these might lead us to make better decisions Introduces readers to key aspects of decision theory and examines how they might help us make better decisions Presentation of material encourages readers to imagine a situation and make a decision or a judgment Offers a broad coverage of the subject including major insights from several sub disciplines microeconomic theory decision theory game theory social choice statistics psychology and philosophy Explains these insights informally in a language that has minimal mathematical notation or jargon even when describing and interpreting mathematical theorems Critically assesses the theory presented within the text as well as some of its critiques Includes a web resource for teachers and students

Granular, Fuzzy, and Soft Computing Tsau-Young Lin, Churn-Jung Liao, Janusz Kacprzyk, 2023-03-29 The first edition of the Encyclopedia of Complexity and Systems Science ECSS 2009 presented a comprehensive overview of granular computing GrC broadly divided into several categories Granular computing

from rough set theory Granular Computing in Database Theory Granular Computing in Social Networks Granular Computing and Fuzzy Set Theory Grid Cloud Computing as well as general issues in granular computing In 2011 the formal theory of GrC was established providing an adequate infrastructure to support revolutionary new approaches to computer data science including the challenges presented by so called big data For this volume of ECSS Second Edition many entries have been updated to capture these new developments together with new chapters on such topics as data clustering outliers in data mining qualitative fuzzy sets and information flow analysis for security applications Granulations can be seen as a natural and ancient methodology deeply rooted in the human mind Many daily things are routinely granulated into sub things The topography of earth is granulated into hills plateaus etc space and time are granulated into infinitesimal granules and a circle is granulated into polygons of infinitesimal sides Such granules led to the invention of calculus topology and non standard analysis Formalization of general granulation was difficult but as shown in this volume great progress has been made in combining discrete and continuous mathematics under one roof for a broad range of applications in data science **Group**

Connectionist Approaches in Economics and Management Sciences Cédric Lesage, Marie Cottrell, 2013-03-09 Since the beginning of the 1980 s a lot of news approaches of biomimetic inspiration have been defined and developed for imitating the brain behavior for modeling non linear phenomenon for providing new hardware architectures for solving hard problems They are named Neural Networks Multilayer Perceptrons Genetic algorithms Cellular Automates Self Organizing maps Fuzzy Logic etc They can be summarized by the word of Connectionism and consist of an interdisciplinary domain between neuroscience cognitive science and engineering First they were applied in computer sciences engineering biological models pattern recognition motor control learning algorithms etc But rapidly it appeared that these methods could be of great interest in the fields of Economics and Management Sciences The main difficulty was the distance between researchers the difference in the vocabulary used by the ones and the others their basic background The main notions used by these new techniques were not familiar to the Social and Human Sciences researchers What are they Four of them are now very briefly

introduced but the reader will find more information in the following chapters **Rational Decisions** Ken

Binmore, 2008-12-29 It is widely held that Bayesian decision theory is the final word on how a rational person should make decisions. However, Leonard Savage, the inventor of Bayesian decision theory, argued that it would be ridiculous to use his theory outside the kind of small world in which it is always possible to look before you leap. If taken seriously, this view makes Bayesian decision theory inappropriate for the large worlds of scientific discovery and macroeconomic enterprise. When is it correct to use Bayesian decision theory and when does it need to be modified? Using a minimum of mathematics, *Rational Decisions* clearly explains the foundations of Bayesian decision theory and shows why Savage restricted the theory's application to small worlds. The book is a wide-ranging exploration of standard theories of choice and belief under risk and uncertainty. Ken Binmore discusses the various philosophical attitudes related to the nature of probability and offers resolutions to paradoxes believed to hinder further progress. In arguing that the Bayesian approach to knowledge is inadequate in a large world, Binmore proposes an extension to Bayesian decision theory allowing the idea of a mixed strategy in game theory to be expanded to a larger set of what Binmore refers to as muddled strategies. Written by one of the world's leading game theorists, *Rational Decisions* is the touchstone for anyone needing a concise, accessible, and expert view on Bayesian decision making.

Rough Sets and Intelligent Systems Paradigms Marzena Kryszkiewicz, James F. Peters, Henryk Rybinski, 2007-07-11 This book constitutes the refereed proceedings of the International Conference on Rough Sets and Emerging Intelligent Systems Paradigms held in Warsaw, Poland, in June 2007. The conference was dedicated to the memory of Professor Zdzisław Pawlak. Seventy-three full papers are presented together with two keynote lectures and eleven invited papers. Each of these papers was subject to a strict editorial review.

Making Hard Choices in Journalism Ethics David E. Boeyink, Sandra L. Borden, 2010-04-05 This book teaches students how to make the difficult ethical decisions that journalists routinely face. By taking a case-based approach, the authors argue that the best way to make an ethical decision is to look closely at a particular situation rather than looking first to an abstract set of ethical theories or principles. This book goes beyond the traditional approaches of many other journalism textbooks by using cases as the starting point for building ethical practices. Casuistry, the technical name of such a method, develops provisional guidelines from the bottom up by reasoning analogically from an easy ethical case, the paradigm, to harder ethical cases. Thoroughly grounded in actual experience, this method admits more nuanced judgments than most theoretical approaches.
