## **A Thousand Years Of Nonlinear History:**

A Thousand Years of Nonlinear History Manuel De Landa, 2021-09-14 Following in the wake of his groundbreaking work *War in the Age of Intelligent Machines* Manuel De Landa presents a brilliant radical synthesis of historical development of the last thousand years *A Thousand Years of Nonlinear History* sketches the outlines of a renewed materialist philosophy of history in the tradition of Fernand Braudel Gilles Deleuze and Félix Guattari while engaging in an entirely unprecedented manner the critical new understanding of material processes derived from the sciences of dynamics Working against prevailing attitudes that see history merely as the arena of texts discourses ideologies and metaphors De Landa traces the concrete movements and interplays of matter and energy through human populations in the last millennium The result is an entirely novel approach to the study of human societies and their always mobile semi stable forms cities economies technologies and languages De Landa attacks three domains that have given shape to human societies economics biology and linguistics In each case De Landa discloses the self directed processes of matter and energy interacting with the whim and will of human history itself to form a panoramic vision of the West free of rigid teleology and naive notions of progress and even more important free of any deterministic source for its urban institutional and technological forms The source of all concrete forms in the West's history rather is shown to derive from internal morphogenetic capabilities that lie within the flow of matter energy itself A Swerve Edition

between vernacular and cosmopolitan values This volume theorizes the cooperative actions of activist and advocacy networks as legitimating processes for the work of participating groups In doing so Acosta argues they address the issues that justify a joint campaign or effort and also crucially underpin each participating collective as a worthy organization of civil society
