## **A Watershed Year Anatomy Of The Iowa Floods Of 2008 Bur Oak Book:**

A Watershed Year Cornelia F. Mutel, 2010-03-15 In June 2008 the rivers of eastern Iowa rose above their banks to create floods of epic proportions their amazing size flowing in places at a rate nearly double that of the previous record flood and the rapidity of their rise ruined farmlands and displaced thousands of residents and hundreds of businesses In Cedar Rapids the waters inundated more than nine square miles of the downtown area in Iowa City where the flood was also the most destructive in history the University of Iowa's arts campus was destroyed By providing a solid base of scientific and technical information presented with unusual clarity and a wealth of supporting illustrations the contributors to this far reaching book many of whom dealt firsthand with the 2008 floods provide a detailed roadmap of the causes and effects of future devastating floods The twenty five essays fall naturally into four sections Rising Rivers Spreading Waters begins by comparing the 2008 floods with the midwestern floods of 1993 moves on to trace community responses to the 2008 floods and ends by illuminating techniques for forecasting floods and determining their size and frequency Why Here Why Now searches for possible causes of the 2008 floods and of flooding in general annual crops and urban landscapes inflows into and releases from reservoirs and climate change Flood Damages Flood Costs Flood Benefits considers the complex mix of flood costs and effects emphasizing damages to cities and farmlands as well as potential benefits to natural communities and archaeological sites Looking Back Looking Forward lays out approaches to managing the floods of the future that are sure to come While the book draws most of its examples from one particular region it explains flooding throughout a much larger region the midwestern Corn Belt and thus its sobering yet energizing lessons apply well beyond eastern Iowa By examining the relationships among rivers floodplains weather and modern society by stressing matters of science and fact rather than social or policy issues and by addressing multiple environmental problems and benefits A Watershed Year informs and educates all those who experienced the 2008 floods and all those concerned with the larger causes of flooding **Continuous Living**

Britt Moore, 2023-12-18 **A Sugar Creek Chronicle** Cornelia F. Mutel, 2016-03-15 In 2010 while editing a report on the effects of climate change in Iowa ecologist Cornelia Mutel came to grips with the magnitude and urgency of the problem She already knew the basics greenhouse gas emissions and global average temperatures are rising on a trajectory that could within decades propel us beyond far reaching irreversible atmospheric changes the results could devastate the environment that enables humans to thrive The more details she learned the more she felt compelled to address this emerging crisis The result is this book an artful weaving together of the science behind rising temperatures tumultuous weather events and a lifetime devoted to the natural world Climate change isn't just about melting Arctic ice and starving polar bears It's weakening the web of life in our own backyards Moving between two timelines Mutel pairs chapters about a single year in her Iowa woodland with chapters about her life as a fledgling and then professional student of nature

Stories of her childhood ramblings in Wisconsin and the solace she found in the Colorado mountains during early adulthood are merged with accounts of global environmental dilemmas that have redefined nature during her lifespan. Interwoven chapters bring us into her woodland home to watch nature's cycles of life during a single year 2012 when weather records were broken time and time again. Throughout in a straightforward manner for a concerned general audience, Mutel integrates information about the science of climate change and its dramatic alteration of the planet in ways that clarify its broad reach, profound impact, and seemingly relentless pace. It is not too late, she informs us, we can still prevent the most catastrophic changes. We can preserve a world full of biodiversity, one that supports human lives as well as those of our myriad companions on this planet. In the end, Mutel offers advice about steps we can all take to curb our own carbon emissions and strategies we can suggest to our policy makers. One Week in June Jeff Stein, 2009
