A History of Women in 101 Objects Annabelle Hirsch, 2023-10-12 A WATERSTONES BEST BOOK OF 2023 This is a neglected history Not a sweeping definitive exhaustive history of the world but something quieter more intimate and particular A journey picked out in 101 objects through the fascinating too often overlooked manifold histories of women Open up this cabinet of curiosities and you'll find objects that have been highly esteemed and others that are humble and domestic Some like a sixteenth century glass dildo are objects of female pleasure some a thumbscrew of female subjugation There are artefacts of women celebrated by history

and of women unfairly forgotten by it examples of female rebellion and of self revelation objects that are inspiring curious or like radium laced chocolate just fundamentally ill conceived In this compendium Annabelle Hirsch reveals a new history teeming unexpected witty and always illuminating

The Smithsonian's History of America in 101 Objects Richard Kurin,2013-10-29 The Smithsonian Institution is America s largest most important and most beloved repository for the objects that define our common heritage Now Under Secretary for Art History and Culture Richard Kurin aided by a team of top Smithsonian curators and scholars has assembled a literary exhibition of 101 objects from across the Smithsonian s museums that together offer a marvelous new perspective on the history of the United States Ranging from the earliest years of the pre Columbian continent to the digital age and from the American Revolution to Vietnam each entry pairs the fascinating history surrounding each object with the story of its creation or discovery and the place it has come to occupy in our national memory Kurin sheds remarkable new light on objects we think we know well from Lincoln s hat to Dorothy s ruby slippers and Julia Child s kitchen including the often astonishing tales of how each made its way into the collections of the Smithsonian Other objects will be eye opening new discoveries for many but no less evocative of the most poignant and important moments of the American experience Some objects such as Harriet Tubman s hymnal Sitting Bull s ledger Cesar Chavez s union jacket and the Enola Gay bomber tell difficult stories from the nation s history and inspire controversies when exhibited at the Smithsonian Others from George Washington s sword to the space shuttle Discovery celebrate the richness and vitality of the American spirit In Kurin s hands each object comes to vivid life providing a tactile connection to American history Beautifully designed and illustrated with color photographs throughout The Smithsonian s History of America in 101 Objects is a rich and fascinating journey through America s collective memory and a beautiful object in its own right

Between Dream Houses and "God's Own Junkyard": Architecture and the Built Environment in American Suburban Fiction Stefanie Strebel,2021-06-28 The American suburb is a space dominated by architectural mass production sprawl as well as a monotonous aesthetic eclecticism and many critics argue that it has developed from a postwar utopia into a disorienting environment with which it is difficult to identify The typical suburb has come to display characteristics of an atopia that is a space without borders or even a non place a generic space of transience Dealing with the representation of architecture and the built environment in suburban literature and film from the 1920s until present this study demonstrates that in its fictional representations too suburbia has largely turned into a place of non architecture A lack of architectural ethos and an abundance of Junkspace define suburban narratives causing an increasing sense of disorientation and entropy in fictional characters

Journal **The Genesis of Israel and Egypt** Emmet Sweeney, 2023-10-01 The Genesis of Israel and Egypt examines the earliest phase of historical consciousness in the ancient Near East looking in particular at the mysterious origins of Egypt's civilization and its links with Mesopotamia and the early Hebrews The book takes a radically alternative view of the rise of high civilization in the Near East and the forces which propelled it The author Emmet Sweeney finds that the early civilizations developed amidst a background of massive and repeated natural catastrophes events which had a profound effect upon the ancient peoples and left its mark upon their myths legends customs and religions Ideas found in all corners of the globe concepts such as dragon worship pyramid building and human sacrifice are shown by Sweeney to have a common origin in the cataclysmic events of the period termed the eruptive age by legendary English explorer Percy Fawcett Terrified and traumatized by the forces of nature people all over the world began to keep an obsessive watch on the heavens and to offer blood sacrifices to the angry sky gods These events which are fundamental to any understanding of the first literate cultures have nonetheless been completely effaced from the history books and an official history of mankind which is little more than an elaborate fiction now graces the bookshelves of the world's great libraries Starting with clues unearthed by history sleuth Immanuel Velikovsky and others Emmet Sweeney takes the investigation further While the Near Eastern civilizations are generally considered to have taken shape around 3300 BC about 2 000 years before those of China and the New World Ages in Alignment demonstrates that they had no 2 000 year head start All the ancient civilizations arose simultaneously around 1300 BC in the wake of a terrible natural catastrophe recalled in legend as the Flood or Deluge Sweeney points out that the presently accepted chronology of Egypt is not based on science but on venerated literary tradition This chronology had already been established in its present form by the third century BC when Jewish historians utilizing the History of Egypt by the Hellenistic author Manetho sought to tie in Egypt's history with that of the Bible Apparent gaps and weird repetitions resulted Improbable feats like the construction of major cut stone engineering projects before the advent of steel tools or Pythagorean geometry point to the weaknesses of the traditional view Taking a more rigorous approach and pointing to solid evidence Emmet Sweeney shows where names overlap and where one and the same group is mistaken for different peoples in different times Volume 1 The Genesis of Israel and Egypt looks at the archaeological evidence for the Flood evidence now misinterpreted and ignored This volume examines the rise of the first literate cultures in the wake of the catastrophe and goes on to trace the story of the great migration which led groups of early Mesopotamians westward toward Egypt where they helped to establish Egyptian civilization This migration recalled in the biblical story of Abraham provides the first link between Egyptian and Hebrew histories The next link comes a few generations later with Imhotep the great seer who solved the crisis of a seven year famine by interpreting pharaoh Djoser's dream Imhotep is shown to be the same person as Joseph son of Jacob **The Ark, and Odd Fellows' Western Magazine**, 1850 *Manhattan Phoenix* Daniel S. Levy, 2022 Shows vividly how the Great Fire of 1835 which nearly leveled Manhattan

also created the ashes from which the city was reborn In 1835 a merchant named Gabriel Disosway marveled at a great fire enveloping New York commenting on how it spread more and more vividly from the fiery arena rendering every object far and wide minutely discernible the lower bay and its Islands with the shores of Long Island and New Jersey The fire Disosway witnessed devastated a large swath of lower Manhattan clearing roughly the same number of acres as the World Trade Center bombing Manhattan Phoenix explores the emergence of modern New York after it emerged from the devastating fire of 1835 a catastrophe that revealed how truly unprepared and haphazardly organized it was to become a world class city merely a quarter of a century later The one led to other New York effectively had to start over Daniel Levy s book charts Manhattan s almost miraculous growth while interweaving the lives of various New Yorkers who took part in the city s transformation Some are well known such as the land baron John Jacob Astor and Mayor Fernando Wood Others less so as with the African American oysterman Thomas Downing and the Bowery Theatre impresario Thomas Hamblin The book celebrates Fire Chief James Gulick who battled the blaze and celebrates the work of the architect Alexander Jackson Davis who built marble palaces for the rich It chronicles the career of the merchant Alexander Stewart who constructed the first department store follows the struggles of the abolitionist Arthur Tappan and records of the efforts of the engineer John Bloomfield Jervis who brought clean water into homes And this resurgence owed so much to the visionaries such as Frederick Law Olmsted and Calvert Vaux who designed Central Park creating a refuge that it remains to this day Manhattan Phoenix reveals a city first in flames and then in flux but resolute in its determination to emerge as one of the world s greatest metropolises

Engaging Smithsonian Objects through Science, History, and the Arts Mary Jo Arnoldi, 2016-01-05

How do we come to know the world around us What about worlds apart from our own outer space distant cultures or even long past eras of history Engaging Smithsonian Objects through Science History and the Arts explores these questions and suggests an answer we come to know our world and worlds apart through the objects that represent them Objects are a window and by looking through them we can learn and understand more about the people who made them and the time and place they came from In the pursuit of this understanding museums are invaluable they are repositories not just of things but also of past present and future knowledge Engaging Smithsonian Objects puts these ideas into practice using objects to bring us to new knowledge and showing how museums support us in the endeavor The book is organized around ten objects from the Smithsonian s vast collections Some of the objects are iconic the Ruby Slippers from the The Wizard of Oz or three Stradivarius string instruments while others are more ordinary though no less interesting an Iron Lung or a Hawaiian gourd drum Two different authors with expertise in different academic disciplines write about each object from their unique professional and personal perspective Both the authors and the ten featured objects represent a range of academic disciplines from art to anthropology to geology Taken together the twenty essays in the book demonstrate just how much we can learn from objects by considering their kaleidoscopic meaning and significance from a variety of viewpoints The book s

interdisciplinary engagement with objects was inspired by the Smithsonian Material Culture Forum now in its twenty sixth year For students of material culture and museum studies this book illustrates the vitality and value of exploring material culture through the lens of intersecting disciplinary perspectives For students of curiosity and lifelong learning this book offers a lively and thoughtful look into the Smithsonian s collection and the many vibrant worlds it represents Richly illustrated with color plates and photographs throughout Engaging Smithsonian Objects through Science History and the Arts is a beautiful and stimulating answer to the question How do we know our world and how can we know more

Remembering Women Christine Lehen,2025-06-19 Women do have a history of their own All we need to do is remember it In this illuminating new investigation Christine Lehen looks back at our collective memory to explore the myriad ways that women in the past have enjoyed a more egalitarian life Due to advances in bioarchaeological methods scientists have discovered that one out of three women in Ancient Scythia was an active warrior buried with her weapons Far from being confined to their homes these women rode out to hunt travelled to distance places or used weapons to fend off their enemies These warriors were no exceptions to the rule with women enjoying a significantly higher degree of equality than their Greek contemporaries Remembering Women argues that there is a historical precedent for a fairer society From reappraisals of well known objects such as the earliest human bone calendars from the Stone Age to revelatory findings of innovative bioarcheological methods used on human remains from Ancient Scythia evidence is accumulating that there were places in the past where all women were allowed to thrive Interweaving new findings from archaeology with the stories of her mother and grandmothers as well as her everyday experiences as a woman living today Lehen explores our collective memory of women and argues that it needs to change if we are to create an egalitarian society Remembering Women follows the traces

left in the material literary and archaeological record by our foremothers and their heirlooms artwork and stories to take a fresh look at our life in the present Inhabitable Infrastructures CJ Lim,2017-05-25 *Inhabitable Infrastructures* Science fiction or urban future the follow up to *Food City* and *Smartcities* and *Eco Warriors* from one of the world's leading urban design and architectural thinkers explores the potential of climate change related multi use infrastructures that address the fundamental human requirements to protect to provide and to participate The stimulus for the infrastructures derives from postulated scenarios and processes gleaned from science fiction and futurology as well as the current body of scientific knowledge regarding changing environmental impacts on cities Science fiction is interdisciplinary by nature aggregates the past and present and evaluates both lay opinions and professional strategies in an attempt to develop foresight and to map possible futures The research culminates in the creation of innovative multi use infrastructures and integrated self sustaining support systems that meet the challenges posed through climate change and overpopulation and the reciprocal benefits of simultaneously addressing the threat and the shaping of cities J G Ballard has written that the psychological realm of science fiction is most valuable in its predictive function and in projecting emotions into the future The knowledge from the book is widely transferable constituting both solutions and speculative visions of future urban environments The book is indispensable reading for professionals and students in the fields of urban design architecture engineering and environmental socio politics

Lock, Stock, and Barrel Clayton E. Cramer,2018-02-21 This provocative book debunks the myth that American gun culture was intentionally created by gun makers and demonstrates that gun ownership and use have been a core part of American society since our colonial origins Revisionist historians argue that American gun culture and manufacturing are relatively recent developments They further claim that widespread gun violence was largely absent from early American history because guns of all types and especially handguns were rare before 1848 According to these revisionists American gun culture was the creation of the first mass production gun manufacturers who used clever marketing to sell guns to people who neither wanted nor needed them However as proven in this first scholarly history of gun culture in early America gun ownership and use have in fact been central to American society from its very beginnings *Lock Stock and Barrel The Origins of American Gun Culture* shows that gunsmithing and gun manufacturing were important parts of the economies of the colonies and the early republic and explains how the American gun industry helped to create our modern world of precision mass production and high wages for workers *Islam and the Devotional Object* Richard J. A. McGregor,2020-05-28 A new history of Islamic practice told through the aesthetic reception of medieval religious objects

Grand Central Sam Roberts,2013-01-22 A rich illustrated and entertaining history of the iconic Grand Central Terminal from one of New York City's favorite writers just in time to celebrate the train station's 100th fabulous anniversary In the winter of 1913 Grand Central Station was officially opened and immediately became one of the most beautiful and recognizable Manhattan landmarks In this celebration of the one hundred year old terminal Sam Roberts of The New York

Times looks back at Grand Central's conception, amazing history, and the far-reaching cultural effects of the station that continues to amaze tourists and shuttle busy commuters. Along the way, Roberts will explore how the Manhattan transit hub truly foreshadowed the evolution of suburban expansion in the country and fostered the nation's westward expansion and growth via the railroad. Featuring quirky anecdotes and behind-the-scenes information, this book will allow readers to peek into the secret and unseen areas of Grand Central, from the tunnels to the command center to the hidden passageways. With stories about everything from the famous movies that have used Grand Central as a location to the celestial ceiling in the main lobby, including its stunning mistake to the homeless denizens who reside in the building's catacombs, this is a fascinating and exciting look at a true American institution.
