A Sense Of Place A Sense Of Time:

Placemaking and the Arts Jennifer Allen Craft, 2018-10-30 What role does place play in the Christian life In this STA volume Jennifer Allen Craft gives a practical theology of the arts contending that the arts place us in time space and community in ways that encourage us to be fully and imaginatively present in a variety of contexts the natural world our homes our worshipping communities and society **Architecture** Martin van der Linden, 2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic

Geographies of Rhythm Dr Tim Edensor, 2012-11-28 In Rhythmanalysis Henri Lefebvre put forward his ideas on the relationship between time and space particularly how rhythms characterize space Here leading geographers advance and expand on Lefebvre's theories examining how they intersect with current theoretical and political concerns within the social sciences In terms of geography rhythmanalysis highlights tensions between repetition and innovation between the need for consistency and the need for disruption These tensions reveal the ways in which social time is managed to ensure a measure of stability through the instantiation of temporal norms whilst at the same time showing how this is often challenged In looking at the rhythms of geographies and drawing upon a wide range of geographical contexts this book explores the ordering of different rhythms according to four main themes rhythms of nature rhythms of everyday life rhythms of mobility and the official and routine rhythms which superimpose themselves on the multiple rhythms of the body A Sense of Place: Regional American Literature , **A Sense of Place** Annie Davy, 2019 Tried and tested accessible strategies that support the wellbeing and learning journey of children through mindfulness with a focus on learning outdoors and connecting with the world Being outside and connecting with nature is key to young children's learning and wellbeing especially in a busy fast changing and digitalised world Outdoors children can more easily connect to their bodies and learn about themselves and others and how to be in the world They use their senses to explore understand and become mindful of the earth and the people around them But how can Early Years practitioners best support young children as they engage with nature while also passing on the values about the future of the planet A Sense of Place is an easily accessible guide that will make outdoor learning more interesting and fun while also supporting children's development of resilience and resourcefulness so that they can survive and thrive in the world as they grow *Sense of Place and Sense of Planet* Ursula K. Heise, 2008-09-29 Sense of

Place and Sense of Planet analyzes the relationship between the imagination of the global and the ethical commitment to the local in environmentalist thought and writing from the 1960s to the present Part One critically examines the emphasis on local identities and communities in North American environmentalism by establishing conceptual connections between environmentalism and ecocriticism on one hand and theories of globalization transnationalism and cosmopolitanism on the other It proposes the concept of eco cosmopolitanism as a shorthand for envisioning these connections and the cultural and aesthetic forms into which they translate Part Two focuses on conceptualizations of environmental danger and connects environmentalist and ecocritical thought with the interdisciplinary field of risk theory in the social sciences arguing that environmental justice theory and ecocriticism stand to benefit from closer consideration of the theories of cosmopolitanism that have arisen in this field from the analysis of transnational communities at risk Both parts of the book combine in depth theoretical discussion with detailed analyses of novels poems films computer software and installation artworks from the US and abroad that translate new connections between global national and local forms of awareness into innovative aesthetic forms combining allegory epic and views of the planet as a whole with modernist and postmodernist strategies of fragmentation montage collage and zooming

Old Wheelways Robert L. McCullough, 2015-10-02 How American bicyclists shaped the landscape and left traces of their journeys for us in writing illustrations and photographs In the later part of the nineteenth century American bicyclists were explorers cycling through both charted and uncharted territory These wheelmen and wheelwomen became keen observers of suburban and rural landscapes and left copious records of their journeys in travel narratives journalism maps photographs illustrations They were also instrumental in the construction of roads and paths wheelways building them funding them and lobbying legislators for them Their explorations shaped the landscape and the way we look at it yet with few exceptions their writings have been largely overlooked by landscape scholars and many of the paths cyclists cleared have disappeared In *Old Wheelways* Robert McCullough restores the pioneering cyclists of the nineteenth century to the history of American landscapes McCullough recounts marathon cycling trips around the Northeast undertaken by hardy cyclists who then describe their journeys in such magazines as *The Wheelman* *Illustrated* and *Bicycling World* the work of illustrators including Childe Hassam before his fame as a painter efforts by cyclists to build better rural roads and bicycle paths and conflicts with park planners including the famous Olmsted Firm who often opposed separate paths for bicycles Today's ubiquitous bicycle lanes owe their origins to nineteenth century versions including New York City's asphalt ribbons Long before there were rails to trails there was a movement to adapt existing passageways including aqueduct corridors trolley rights of way and canal towpaths for bicycling The campaigns for wheelways McCullough points out offer a prologue to nearly every obstacle faced by those advocating bicycle paths and lanes today McCullough's text is enriched by more than one hundred historic images of cyclists often attired in skirts and bonnets suits and ties country lanes and city streets

Jennifer Farnum,2005 Understanding sense of place and related concepts often presents challenges for both managers and researchers Inconsistent application of terms questions regarding their origin and a lack of awareness of research findings contribute to the ambiguity of these concepts This integrative review of research provides relevant current information on the role of sense of place in natural resourcebased recreation and tourism Special focus is given to the foundations of place attachment how place attachment may differ among user types and the relation of place attachment to other psychological phenomena such as attitudes The role of theory in place attachment also is addressed and gaps in theoretical and empirical work are identified This review provides specific recommendations for managers and others wanting to better understand the dynamics of sense of place **Localism, Landscape, and the Ambiguities of Place**

Coolidge Professor of History and Director of Graduate Studies in History David Blackbourn,David Blackbourn,James N. Retallack,University of Toronto Press,2007-01-01 What makes a person call a particular place home Does it follow simply from being born there Is it the result of a language shared with neighbours or attachment to a familiar landscape Perhaps it is a piece of music or a painting or even a travelogue that captures the essence of home And what about the sense of belonging that inspires nationalist or local autonomy movements Each of these can be a marker of identity but all are ambiguous Where you were born has a different meaning if like so many modern Germans you have moved on and now live elsewhere Representing the national interest in parliament becomes more difficult when voters demand attention to local and regional issues or when ethnic tensions erupt In all these situations the landscape of home takes on a more elusive meaning Localism Landscape and the Ambiguities of Place is about the German nation state and the German speaking lands beyond it from the 1860s to the 1930s The authors explore a wide range of subjects music and art elections and political festivities local landscape and nature conservation tourism and language struggles in the family and the school Yet they share an interest in the ambiguities of German identity in an age of extraordinarily rapid socio economic change These essays do not assume the primacy of national allegiance Instead by using the sense of place as a prism to look at German identity in new ways they examine a sense of Germanness that was neither self evident nor unchanging **Environments in Science Fiction**

Susan M. Bernardo,Donald E. Palumbo,C.W. Sullivan III,2014-03-08 The all new essays in this book respond to the question How do

spaces in science fiction both built and unbuilt help shape the relationships among humans other animals and their shared environments Spaces as well as a sense of place or belonging play major roles in many science fiction works This book focuses especially on depictions of the future that include but move beyond dystopias and offer us ways to imagine reinventing ourselves and our perspectives especially our links to and views of new environments There are ecocritical texts that deal with space place and science fiction criticism that deals with dystopias but there is no other collection that focuses on the intersection of the two

General Technical Report NE, 1980

Sense of Place, Health and Quality of Life Allison Williams, 2016-12-05 A significant body of theoretical and empirical studies describes sense of place as an outcome of interconnected psychological social and environmental processes in relation to physical place's Sense of place has been examined particularly in human geography in terms of both the character intrinsic to a place as a localized bounded and material entity and the sentiments of attachment detachment that humans experience and express in relation to specific places Scholars in a wide range of disciplines are increasingly exploring the relationship between place and health and recently the field of public health has been encouraged to recognize sense of place as a potential contributing factor to well being It is evident that over the last few decades sense of place has developed into a versatile construct This important book brings together work related to sense of place and health broadly defined from the perspective of a variety of fields and disciplines It will give the reader an understanding of both the range of applications of this construct within

approaches to human health as well as the breadth of research methodologies employed in its investigation Experience, Evidence, and Sense Anna Wierzbicka, 2010-06-24 This book is based on two ideas first that any language English no less than any other represents a universe of meaning shaped by the history and experience of the men and women who have created it and second that in any language certain culture specific words act as linchpins for whole networks of meanings and that penetrating the meanings of those key words can therefore open our eyes to an entire cultural universe In this book Anna Wierzbicka demonstrates that three uniquely English words evidence experience and sense are exactly such linchpins Using a rigorous plain language approach to meaning analysis she unpacks the dense cultural meanings of these key words disentangles their multiple meanings and traces their origins back to the tradition of British empiricism In so doing she reveals much about cultural attitudes embedded not only in British and American English but also English as a global language An interdisciplinary work *Experience Evidence and Sense* will be of interest to both scholars and students in linguistics and English as well as historians of ideas sociologists anthropologists literary scholars and scholars of communication
