*Beasts* Jeffrey Moussaieff Masson, 2014-03-13 Orcas or killer whales are one of the planet's supreme predators Alongside humans they have the most complex brains to be found in nature But while one of these two species has killed 200 million members of its own kind in the twentieth century alone the other has killed none This is where Jeffrey Masson's fascinating new book begins there is something different about humans Masson has shown us that animals can teach us much about our own emotions about love dogs contentment cats and grief elephants But they have much to teach us about the negative emotions such as anger and aggression as well and in unexpected ways In *Beasts* he demonstrates that the violence we perceive in the wild is

mostly a matter of projection We link the basest human behaviour to animals to beasts and claim the high ground for our species We are least human we think when we succumb to our primitive animal instincts In fact nothing could be further from the truth Animal predators kill to survive but there is nothing in the annals of animal aggression remotely equivalent to the violence mankind has inflicted upon itself Humans and humans in our modern industrialised world in particular are the most violent species in existence We lack what all other animals have a check on aggression that serves the species rather than destroys it And it is here that animals have something vitally important to teach us about ourselves Building an Ark Ethan Smith, Guy Dauncey, 2007-11-01 Building an Ark 101 Solutions to Animal Suffering is a first of its kind inspiring look at practical solutions for the humane treatment of animals and animal liberation Animal cruelty has many forms factory farms habitat destruction animal product testing the abuse and neglect of companion animals the illegal trade in endangered species unsustainable fishing and climate change All these create unnecessary suffering for animals and destroy animal rights For several decades there has been a global movement building an ever increasing consciousness that will soon affect animal welfare and the future of life on Earth if it s given time to do so Building an Ark is the story of this movement Extensively researched and drawing on practical examples from around the world it provides a voice for both the animals and the humans who have dedicated their lives to building a sustainable future for all species The ark is ready for all to board Individuals action groups schools businesses governments farmers fishers developing nations there s a role for everyone on this journey Building an Ark offers a host of solutions that if adopted will ensure that animals will suffer less today and that humans and animals will share a more sustainable planet tomorrow Ethan Smith is a writer animal welfare advocate and author editor of the anthology Softly On This Earth Joining Those Who Are Healing Our Planet Guy Dauncey founded the Solutions Project and is author of several books including Stormy Weather 101 Solutions to Global Climate Change
